In recent years there has been a remarkable evolution in the design of hotels, with mainstream hotel chains rejecting characterless functionalism in favour of style-led individualism. This book gathers together over 40 of the best examples of hotel architecture and interiors from around the world,

illustrating the impressive diversity of styles and forms. Identifying the latest industry trends, Riewoldt makes plain how both chains and independents have adopted individual design strategies to enhance their brand image in an increasingly global marketplace. It features the work of Michael Graves, Jean Nouvel and Philippe Starck amongst other big names.

The New York Times Bestselling Travel Memoir! The author of Turn Right at Machu Picchu travels the globe in search of the world's most famous lost city. "Adventurous, inquisitive and mirthful, Mark Adams gamely sifts through the eons of rumor, science, and lore to find a place that, in the end, seems startlingly real indeed."—Hampton Sides A few years ago, Mark Adams made a strange discovery: Far from alien conspiracy theories and other pop culture myths, everything we know about the legendary lost city of Atlantis comes from the work of one man, the Greek philosopher Plato. Stranger still: Adams learned there is an entire global sub-culture of amateur explorers who are still actively and obsessively searching for this sunken city, based entirely on Plato's detailed clues. What Adams didn't realize was that Atlantis is kind of like a virus—and he'd been exposed. In Meet Me in Atlantis, Adams racks up frequent-flier miles tracking down these Atlantis obsessives, trying to determine why they believe it's possible to find the world's most famous lost city—and whether any of their theories could prove or disprove its existence. The result is a classic quest that takes readers to fascinating locations to meet irresistible characters; and a deep, often humorous look at the human longing to rediscover a lost world.

European colonization played a major role in the acquisition, formation, and destruction of different ways of knowing. Recently, many scholars and activists have come to ask: Are there ways in which knowledge might be decolonized? Epistemic Decolonization examines a variety of such projects from a critical and philosophical perspective. The book introduces the unfamiliar reader to the wide variety of approaches to the topic at hand, providing concrete examples along the way. It argues that the predominant contemporary approach to epistemic decolonization leads one into various intractable theoretical and practical problems. The book then closely investigates the political and scientific work of Frantz Fanon and Amílcar Cabral, demonstrating how their philosophical commitments can help lead one out of the practical and theoretical issues faced by the current, predominant orientation, and concludes by forging links between their work and that of some contemporary feminist epistemologists.

Does the end of the Mayan Calendar start the countdown to Judgment Day? Biblical and historical researcher David Montaigne concludes that this is the case. He says that the end of the Mayan Long Count is the official start of the Bible's seven-year tribulation-both were focused on the same astronomical events that occur from 2012 to 2019. The world as we know it will be gone by 2020. Texts from ancient India tell us about great cycles of destruction. The Egyptians told the same basic story with different names. The Maya reveal another version of the story, and were very clear about the timing of events from December 2012 to 2019. Your average American is no expert on these cultures, but most people do have a Bible at home-and the clearest details on what is about to happen can be found in the Bible, if you don't let someone else tell you which parts you should focus on. No, this isn't what you were taught in Sunday school. Religious leaders guide us between the raindrops of curious comments in the Bible. We are discouraged from focusing on the parts they say we weren't meant to understand. But if we stop glossing over these important passages we will understand a flood of details about the End Times. Our "leaders" are not ignorant of these events. The elite already know what is about to happen and they have made preparations most rational people would not believe, because evidence is suppressed to avoid chaos. They want us to remain ignorant, or at least to believe that the details are secrets that cannot be known. But the coming events (and their timing) are not secrets. Years ago, this book's publication would not have been tolerated by those in power. But by now it doesn't matter much-their plans are not going to be interfered with at this point. Your plans, however, can still be formulated, if you make the choice to understand. Topics include: Bible Prophecy; Matthew 24:36- Knowing the hour and the day; The Mayan Calendar and Mythology; Pole Shifts; Galactic Superwaves; Ancient Egypt; Ancient India; World Mythology; The Georgia Guidestones; The real Star of Bethlehem and the exact birthday of Christ; Calculating the Second Coming, and Judgment Day; more.

After enjoying the gift of psychic future predictive awareness for more than fifty years, Prophet Wildman had a deep understanding of the psychic and parapsychic experience. A Critical Investigation into the Anticolonial Politics of Knowledge Lerner Publications

There are giants among us, passing largely unnoticed, intent on carrying out a secret plan to enslave all humanity. They may not look like giants today, but their bloodlines extend all the way back to the Nephilim—the offspring of angels who mated with human women—described in Genesis 6 when giants roamed the land. Gary Wayne, author of The Genesis 6 Conspiracy: How Secret Societies and the Descendants of Giants Plan to Enslave Humankind, details the role of modern-day Nephilim in Satan's plan to install the Antichrist at the End of Days. When God cast the angel Lucifer and his followers out of heaven, Lucifer set into motion a scheme to ensure the Nephilim survived. Why? Because from the bloodlines of these Nephilim the Antichrist will come. To keep his plan alive, Satan has enlisted the loyalty of secret societies such as the Freemasons, the Templars, and the Rosicrucians to conspire in teaching a theology and a history of the world that is contrary to the biblical one. This Genesis 6 Conspiracy marches toward the Great Tribulation, when the loyalty of the Terminal Generation—this generation—will be tested. The Bible, along with many other ancient sources, clearly records the existence of giants. Wayne provides copious citations from many society insiders, along with extensive Bible references, other religious references, and historical material to bolster his contention. What he uncovers will astonish you—and it will challenge you to prepare for the fulfilling of God's promises.

The Politics of Perfection: Technology and Creation in Literature and Film provides an exploration of the relationship between modern technological progress and classical liberalism. Each chapter provides a detailed analysis of a film or novel, including Fritz Lang's Metropolis, Ridley Scott's Prometheus, Michael Gondry's Eternal Sunshine of the Spotless Mind, Kazuo Ishiguro's Never Let Me Go, and Margaret Atwood's Oryx and Crake. These works of fiction are examined through the lens of political thinkers ranging from Plato to Hannah Arendt. The compatibility of classical liberalism and technology is questioned, using fiction as a window into Western society's views on politics, economics, religion, technology, and the family. This project explores the intersection between human nature and creation, particularly artificial intelligence and genetic engineering, using works of literature and film to access cultural concerns. Each of the works featured asks a question about the relationship between technology and creation. Technology also allows humanity to create new types of life in the forms of artificial intelligence and genetically engineered beings. This book studies works of literature and film as evidence of the contemporary unease with the progress of technology and its effect on the political realm.
