The geometric designs in Islamic art are often built on combinations of repeated squares and circles, which may be overlapped to form intricate and complex patterns. The complexity and variety of patterns used evolved from simple stars through a variety of 6- to 13-point patterns. Islamic geometric patterns - ARABIC ONLINE Arabic Geometrical Pattern and Design. By forbidding the representation of the human figure, the Mohammedan religion helped push Islamic art along a path much different from that of traditional European art. European abounds with perspective renderings of figures and landscapes, while Islamic translates artistic impulse into elaborate geometric patterns and linear designs. Arabic Geometrical Pattern and Design Based this time on twelve-point geometry rather than the eight-point shown above, there is an evident family feel to the design of the two panels, one that is familiar to many people as characterising their recognition of Arabic or Islamic design. Again the pattern is formed by the use of geometrically arranged ribs set on the same plane, containing foliate decoration, but here with contrasting materials used to emphasise the distinction between the two characters of Islamic design ... Arabic / Islamic geometry 01 - Catnaps design Islamic geometric patterns are one of the major forms of Islamic ornament, which tends to avoid using figurative images, as it is forbidden to create a representation of an

important islamic figure according to many holy scriptures. The geometric designs in Islamic art are often built on combinations of repeated squares and circles, which may be overlapped and interlaced, as can arabesques (with which they are often combined), to form intricate and complex patterns, including a wide variety of Islamic geometric patterns - Wikipedia Arabic Geometrical Pattern and Design.
