SINGH SIMPSON

The Student's Sanskrit-English Dictionary B&H

Publishing Group

This book describes and explains the fundamental changes that are now taking place in the most traditional areas of humanities theory and method, scholarship and education. The changes flow from the re-examination of the very foundations of the humanities - its theories of textuality and communication - that are being forced by developments in information technology. A threshold was crossed during the last decade of the twentieth century with the emergence of the World Wide Web, which has (1) globalized access to computerized resources and information, and (2) made interface and computer graphics paramount concerns for work in digital culture. While these changes are well known, their consequences are not well understood, despite so much discussion by digital enthusiasts and digital doomsters alike. In reconsidering these

matters, Radiant Textuality introduces some remarkable new proposals for integrating computerized tools into the central interpretative and critical activities of traditional humanities disciplines, and of literary studies in particular.

This book offers a practical and modern update on radioisotope therapy. Clinically oriented, it provides a thorough guide to patient management, with the latest indications and procedures for the current radioisotopic treatments. It addresses the clinical problems associated with each respective pathology, discussing the management of patients (diagnosis and non-radioisotope therapy), the radiopharmaceuticals available today, and the current radioisotopic procedures. Wherever possible, information on dosimetry is included at the end of each topic, together with a list of and comments on the most recent guidelines with their recommendations for radiometabolic therapy. The book is divided into six main sections: thyroid diseases, hepatic tumors (HCC and hepatic metastases), bone

metastases from prostate cancer, lymphomas, and neuroendocrine tumors. The last section is dedicated to new perspectives of radioisotope treatment. Based on contributions from of a multidisciplinary team of specialists: oncologists, surgeons, endocrinologists, hematologists, urologists, radiopharmacists and nuclear medicine physicians, it provides a comprehensive analysis of the position of radioisotope treatments among the various therapeutic options. Readers interested in targeted therapy, radiometabolic therapy, radioimmunotherapy and radiometabolic imaging will find this book both informative and insightful.

Radiant Black Vol. 3
Institut d'Estudis Catalans
An innovative theory of consciousness, drawing on the phenomenology of Edmund Husserl and supported by brain-imaging, presented in the form of a hardboiled detective story. Professor Grue is dead (or is he?). When graduate student/sleuth Miranda Sharpe discovers him slumped over his keyboard, she does the sensible thing--she grabs her dissertation and runs.

Little does she suspect that soon she will be probing the heart of two mysteries, trying to discover what happened to Max Grue, and trying to solve the profound neurophilosophical problem of consciousness. *Radiant Cool* may be the first novel of ideas that actually breaks new theoretical ground, as Dan Lloyd uses a neo-noir (neuro-noir?), hard-boiled framework to propose a new theory of consciousness. In the course of her sleuthing, Miranda encounters characters who share her urgency to get to the bottom of the mystery of consciousness, although not always with the most innocent motives. Who holds the key to Max Grue's ultimate vision? Is it the computer-inspired pop psychologist talk-show host? The video-gaming geek with a passion for artificial neural networks? The Russian multi-dimensional data detective, or the sophisticated neuroscientist with the big book contract? Ultimately Miranda teams up with the author's fictional alter ego, "Dan Lloyd," and together they build on the phenomenological theories of philosopher Edmund Husserl

(1859-1938) to construct testable hypotheses about the implementation of consciousness in the brain. Will the clues of phenomenology and neuroscience converge in time to avert a catastrophe? (The dramatic ending cannot be revealed here.) Outside the fictional world of the novel, Dan Lloyd (the author) appends a lengthy afterword, explaining the proposed theory of consciousness in more scholarly form. *Radiant Cool* is a real metaphysical thriller--based in current philosophy of mind--and a genuine scientific detective story--revealing a new interpretation of functional brain imaging. With its ingenious plot and its novel theory, *Radiant Cool* will be enjoyed in the classroom and the study for its entertaining presentation of phenomenology, neural networks, and brain imaging; but, most importantly, it will find its place as a groundbreaking theory of consciousness. AWARD In the last weeks of her pregnancy, a Muslim Indian lesbian living in San Francisco receives a visit from her estranged mother and sister that surfaces long held secrets and betrayals in this "sweeping family saga . . . with the beautiful specificity of real lives lived, loved, and fought for" (Entertainment Weekly) Working as a consultant for Kamala Harris's attorney general campaign in Obama-era San Francisco, Seema has constructed a successful life for herself in the West, despite still struggling with her father's long-ago decision to exile her from the family after she came out as lesbian. Now, nine months pregnant and estranged from the Black father of her unborn son, Seema seeks solace in the company of those she once thought lost to her: her ailing mother, Nafeesa, traveling alone to California from Chennai, and her devoutly religious sister, Tahera, a doctor living in Texas with her husband and children. But instead of a joyful reconciliation anticipating the birth of a child, the events of this fateful week unearth years of betrayal, misunderstanding, and complicated layers of love—a tapestry of

emotions as riveting and disparate as the era itself. Told from the point of view of Seema's child at the moment of his birth, and infused with the poetry of Wordsworth and Keats and verses from the Quran, *Radiant Fugitives* is a moving tale of a family and a country grappling with acceptance, forgiveness, and enduring love.

Radiant Cool MIT Press

A nuanced satire--both hilarious and disconcerting--that probes the blurred lines between empowerment, spirituality, and consumerism in our online lives. Lilian Quick is 40, single, and childless, working as a pet portrait artist. She paints the colored light only she can see, but animal aura portraits are a niche market at best. She's working hard to build her brand on social media and struggling to pay the rent. Her estranged cousin has become internet-famous as "Eleven" Novak, the face of a massive feminine lifestyle empowerment brand, and when Eleven comes to town on tour, the two women reconnect. Despite twenty years of unexplained silence, Eleven offers Lilian a place at The Temple, her

Manhattan office. Lilian accepts, moves to New York, and quickly enrolls in The Ascendency, Eleven's signature program: an expensive, three-month training seminar on leadership, spiritual awakening, and marketing. Eleven is going to help her cousin become her best self: confident, affluent, and self-actualized. In just three months, Lilian's life changes drastically: She learns how to break her negative thought patterns, achieves financial solvency, grows an active and engaged online following, and builds authentic friendships. She finally feels seen for who she really is. Success! . . . But can Lilian trust everything Eleven says? This compelling, heartfelt satire asks us: How do we recognize authenticity when storytelling and magic have been co-opted by marketing? [Report of the ... Meeting](#) Springer

The Radiant Way Motilal Banarsidass Publ. Develop a powerful practice of deep

relaxation and transformative self-inquiry with this essential guide to yoga nidra, accompanied by downloadable audio meditations. Yoga nidra is a practice devoted to allowing your body and mind to rest while your consciousness remains awake and aware, creating the opportunity for you to tap into a deeper understanding of yourself and your true nature. At its heart, yoga nidra is about waking up to the fullness of your life. In *Radiant Rest*, Tracee Stanley draws on over twenty years of experience as a yoga nidra teacher and practitioner to introduce the history of yoga nidra, mind and body relaxation, and the surprising power of rest in our daily lives. This accessible guide shares six essential practices arranged around the koshas, the five subtle layers of the body: the physical, energetic, mental, intuitive, and bliss bodies. It also offers shorter, accessible practices for people pressed for time. Each practice is explained through step-by-step instructions and ends with self-inquiry prompts. A set of guided audio meditations provide

further instruction. Feel a greater sense of stability, peace, and clarity in all aspects of your life as you deepen your yoga nidra practice and discover its true power.

The radiation regime and architecture of plant stands John Wiley & Sons
How it happened that technological prowess and national glory (or “radiance,” which also means “radiation” in French) became synonymous in France as nowhere else. In the aftermath of World War II, as France sought a distinctive role for itself in the modern, postcolonial world, the nation and its leaders enthusiastically embraced large technological projects in general and nuclear power in particular. The *Radiance of France* asks how it happened that technological prowess and national glory (or “radiance,” which also means “radiation” in French) became synonymous in France as nowhere else. To answer this question, Gabrielle Hecht has forged an innovative combination of technology studies and cultural and political history in a book that, as Michel Callon writes in the new foreword to this edition, “not only sheds

new light on the role of technology in the construction of national identities” but is also “a seminal contribution to the history of contemporary France.” Proposing the concept of technopolitical regime as a way to analyze the social, political, cultural, and technological dynamics among engineering elites, unionized workers, and rural communities, Hecht shows how the history of France's first generation of nuclear reactors is also a history of the multiple meanings of nationalism, from the postwar period (and France's desire for post-Vichy redemption) to 1969 and the adoption of a “Frenchified” American design. This paperback edition of Hecht's groundbreaking book includes both Callon's foreword and an afterword by the author in which she brings the story up to date, and reflects on such recent developments as the 2007 French presidential election, the promotion of nuclear power as the solution to climate change, and France's aggressive exporting of nuclear technology.

Chicago Press
The solar radiant energy is in fact the only source of energy for the basic physical processes taking place in the atmosphere and on the earth's surface. When passing through the atmosphere and being reflected by the ground surface, solar radiation undergoes changes and conversions. Some of it is absorbed in the atmosphere and converted into other forms of energy, mainly into heat, and some is scattered by gases, by dust and by water vapour. Because of absorption and scattering in the atmosphere, solar radiation is changed by the time it reaches the earth's surface. That part of it which arrives as a beam of parallel rays is referred to as direct solar radiation, and that which is scattered in the atmosphere and reaches the earth's surface from all directions of the sky is called diffuse solar radiation. Both of them are reflected back into the atmosphere when they reach the earth's surface, and this third type of radiation is defined as reflected radiation. All of these radiations differ from solar radiation arriving at the upper level of the atmosphere in

intensity as well as in spectral composition although they all fall within the spectral region of solar radiation. In atmospheric physics these types of radiation are known as short-wave radiation (SWR) as distinguished from long-wave or infrared radiation (LWR) emitted by the atmosphere and the earth's surface.

doorstep, and \$2.5 million hidden in the air vents of her house, she's going to have to decide who she is, and quickly—before the world chooses for her.

Radiant Mommy Image Comics
Xhea has no magic. Born without the power that everyone else takes for granted, Xhea is an outcast-no way to earn a living, buy food, or change the life that fate has dealt her. Yet she has a unique talent: the ability to see ghosts and the tethers that bind them to the living world, which she uses to scratch out a bare existence in the ruins beneath the City's floating Towers. When a rich City man comes to her with a young woman's ghost tethered to his chest, Xhea has no idea that this ghost will change everything. The ghost, Shai, is a Radiant, a rare person who generates so much power that the Towers use it to fuel their magic, heedless of the pain such use causes. Shai's home Tower is desperate to get the ghost back and force her into a body-any body-so that it can regain its position, while the Tower's rivals seek the ghost to use her magic for their own ends. Caught between a multitude of

enemies and desperate to save Shai, Xhea thinks herself powerless-until a strange magic wakes within her. Magic dark and slow, like rising smoke, like seeping oil. A magic whose very touch brings death. With two extremely strong female protagonists, Radiant is a story of fighting for what you believe in and finding strength that you never thought you had.

Prescient and chilling, DeMille's #1 New York Times bestselling novel takes us into the heart of a new Cold War with a clock-ticking plot that has Manhattan in its crosshairs. After a showdown with the notorious Yemeni terrorist known as The Panther, John Corey has left the Anti-Terrorist Task Force and returned home to New York City, taking a job with the Diplomatic Surveillance Group. Although Corey's new assignment with the DSG-surveilling Russian diplomats working at the

U.N. Mission-is thought to be "a quiet end," he is more than happy to be out from under the thumb of the FBI and free from the bureaucracy of office life. But Corey realizes something the U.S. government doesn't: The all-too-real threat of a newly resurgent Russia. When Vasily Petrov, a colonel in the Russian Foreign Intelligence Service posing as a diplomat with the Russian U.N. Mission, mysteriously disappears from a Russian oligarch's party in Southampton, it's up to Corey to track him down. What are the Russians up to and why? Is there a possible nuclear threat, a so-called radiant angel? Will Corey find Petrov and put a stop to whatever he has planned before it's too late? Or will Corey finally be outrun and outsmarted, with America facing the prospect of a crippling attack unlike anything it's ever seen before?

[The Radiance of France, new edition](#) Image Comics Did you know that God's light can shine through every facet of your identity? Radiant is an invitation for teen girls and young women to enjoy a candid conversation on identity with bestselling author Priscilla Shirer. You'll hear

reflections on life lessons she's gathered from her teen years until now. She'll show you how the light of God's Word shaped her identity, and she'll teach you how it can change and shape your life as well. The culture will try to define you, but this world is starving for something different that comes only from the creative genius of your God. You were created to reflect His light. . . . You were created to be radiant. *Radiant Rest* Allied Publishers A revolutionary exploration of the relationship between human energy and color, visualized through more than 200 photographs from the "the Annie Leibovitz of aura photography" (New York Times) and a "Dutch painter on acid" (Vogue). The prodigal daughter of a visionary painter mother and a two-time commune founding father, Christina Lonsdale was raised by her parents on a commune in Taos, New Mexico, at the dawn of the digital age in the 1990s—formative years when science (the advent of the worldwide web, the introduction of the cell phone) and spiritualism (New Age) occupied equal

bandwidth. Having her aura photograph taken awoke a passion that combined her spiritual and technological interests (an aura is an energy field emanating around a living being comprised of mental, spiritual, and emotional levels; an aura camera captures the colors of the aura on Polaroid film). With her first aura camera—the Auracam 6000—she began photographing and analyzing family and friends, then in 2014, took her skills and equipment on the road. *Radiant Human* includes hundreds of Polaroids selected from the author's vast archives of some 45,000 images she has taken over a six-year period. The book explores the nature of the human aura, and the notion that aura images may not only capture a person's essence in that moment, but reveal characteristics of their overall disposition. As Lonsdale describes what all the colors suggest, considering their many variations and nuances, and in relationship to each other. To illuminate her discoveries, she shares her subjects' stories throughout the book, sometimes accompanied by a single

shot, other times by a series of images taken over a period of year. She also includes profiles of well-known people she has photographed including Chloë Sevigny, Joseph Altuzarra, Busy Philipps, and SZA. Lonsdale makes clear that we are not just physical bodies, but collections of energy as well—giving consideration to the relationship of how we present ourselves to the world and who we are as well as the potential reality of the space in between. Her aura work is a study of humanity, and the energy we radiate and receive—the good, the bad, and the weird vibes—helping us understand better who we are.

She Who Became the Sun reimagines the

rise to power of the Ming Dynasty's founding emperor. To possess the Mandate of Heaven, the female monk Zhu will do anything "I refuse to be nothing..." In a famine-stricken village on a dusty yellow plain, two children are given two fates. A boy, greatness. A girl, nothingness... In 1345, China lies under harsh Mongol rule. For the starving peasants of the Central Plains, greatness is something found only in stories. When the Zhu family's eighth-born son, Zhu Chongba, is given a fate of greatness, everyone is mystified as to how it will come to pass. The fate of nothingness received by the family's clever and capable second daughter, on the other hand, is only as expected. When a bandit attack orphans the two children, though, it is Zhu Chongba who succumbs to despair and dies. Desperate to escape her own fated death, the girl uses her brother's identity to enter a monastery as a young male novice. There, propelled by her burning desire to survive, Zhu learns she is capable of doing whatever it takes, no matter how callous, to stay hidden from her fate. After her sanctuary is

destroyed for supporting the rebellion against Mongol rule, Zhu takes the chance to claim another future altogether: her brother's abandoned greatness. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
