The primary intent of this book is to serve as a rapid review of Urology principles and serve as a study aid to improve performance on Urology written and practical examinations. With this goal in mind, the text is written in rapid-fire, question/answer format. The student receives immediate gratification with a correct answer. Questions themselves often contain a 'pearl' reinforced in association with the question/answer. Additional hooks are often attached to the answer in various forms, including mnemonics, evoked visual imagery, repetition and humour. Additional information not requested in the question may be included in the answer. The same information is often sought in several different questions. Emphasis has been placed on evoking both trivia and key facts that are easily overlooked, are quickly forgotten, and yet somehow always seem to appear on Urology exams.

Interest in this meeting was intense, as approval of the Dornier device had occurred only a few weeks earlier in December of 1984. Because of the success of this initial meeting, subsequent meetings have been held annually in Indianapolis. Following the third annual symposium on extracorporeal shock wave lithotripsy in March of 1987, a number of participants and attendees requested that the information presented at the meeting be made available. Therefore, plans were made to publish the proceedings of the next meeting which occurred March 5 and 6, 1988.
