Global Mapper - User's Manual Global Mapper User Manual The Export Global Mapper Grid command allows the user to export any loaded elevation grid data sets to a Global Mapper Grid format file. The Global Mapper Grid format is a highly compressed elevation grid format that loads and draws very quickly and requires very little memory. Global Mapper - User's Manual Global Mapper is a viewer capable of displaying the most popular GIS raster, elevation, and vector datasets, allowing users to easily view, edit and export their Global Mapper -

library.carleton.ca(global\_mapper\_setup.exe or global\_mapper\_setup\_64bit.exe). Installation will take no more than a couple of minutes. The first time you launch Global Mapper, you will see the Register Global Mapper window. The option you select will determine the level of functionality available to you when you run theup and running - Blue Marble GeoConfigure - General Global Mapper setup. Map Layout - Setup Map Layout Display (scale bar, margins, north arrow, etc.) Zoom Tool. The Zoom command selects the zoom tool as the current tool. To zoom in on a specific point, choose the [Zoom tool] from the toolbar or, [Tool/Zoom] from menu bar. Global Mapper - User's Manual The Global

Projection Grid option causes a grid to be displayed in the currently selected global (i.e. display) projection, which can be modified on the Projection tab. The Grid Spacing section allows you to specify whether to allow Global Mapper to automatically determine a good grid spacing to use or to specify a custom grid spacing.
