Learn how to build an affordable hot rod following the advice of the masters! In *How to Build Affordable Hot Rods*, author and lifelong hot rod aficionado Tony Thacker takes you through the process of building a hot rod on a budget. Drawing on his own extensive experience of both buying and building rods, Thacker explores the good, the bad, and the ugly. The good was setting a land speed record at Bonneville, the bad was buying a rod from which the previous owner had "swapped out" the good engine, and the ugly--well, let's just not go there. *How to Build Affordable Hot Rods* includes extensive how-to sections that cover step-by-step chassis builds for Model A, 1932, and 1936 Fords, including front- and rear-end setups. The in-depth chassis builds are complimented with sections on powertrain choices, bodywork and roof chops, wheels and tires, and wiring and paint. Also included are chapters on interiors and the all-important details that individualize any project to ensure that it stands out from the rest. When Henry Ford introduced his beloved Model T, he unwittingly gave the average person the means to go racing. Prior to the T, racing was mostly a sport of the rich, but that changed with the Model T. Stripped of fenders and hopped up with speed

parts, T speedsters ruled, and it wasn't long before enthusiasm on the track translated to the street and the term hot rod entered the vernacular. Of course, it didn't need to be a Ford (and still doesn't), but the easiest and therefore cheapest route to Hot Rod Boulevard is down the Ford road. The journey accelerated after World War II, as hot rodding boomed with the growth of speed shops, car shows, drag racing, talented and trained GIs returning home, and the launch of Hot Rod magazine to spread the gospel far and wide. More than 100 years after the original Model T, hot rodding remains alive and well in the Australasia, Europe, and (of course) its birthplace the US. Learn from the best and get started building your affordable hot rod today!

#### **Aviation Equipment Red Book**

Vols. for 1955 includes an issue with title Product design handbook issue; 1956, Product design digest issue; 1957, Design digest issue.

*Chilton's Instruments & Control Systems*

Beginning with 1937, the April issue of each vol. is the Fleet reference annual.

*Commercial Carrier Journal for Professional Fleet Managers*

Vols. for 1958- include an annual Factbook issue.

*National Petroleum News*

Some issues for 1972-1975 include section: The fleet specialist.
