Written from the perspectives of both a user interface designer and a software engineer, this book demonstrates rather than just describes how to build technology that cooperates with people. It begins with a set of interaction design principles that apply to a broad range of technology, illustrating with examples from the Web, desktop software, cell phones, PDAs, cameras, voice menus, interactive TV, and more. It goes on to show how these principles are applied in practice during the development process -- when the ideal design can conflict with other engineering goals. The authors demonstrate how their team built a full-featured instant messenger application for the wireless Palm and PC. Through this realistic example, they describe the many subtle tradeoffs that arise between design and engineering goals. Through simulated conversations, they show how they came to understand each other's goals and constraints and found solutions that addressed both of their needs -- and ultimately the needs of users

who just want their technology to work.

*Designing Interactive Systems: People, Activities, Contexts, Technologies* is an exciting, new, forward-looking textbook in Human Computer Interaction (HCI). Authoritative in its coverage, this innovative book takes a top-down approach, starting with what is familiar to students and working down to theory/abstract underpinnings. This makes it suitable for beginners with a less technical background as well as advanced students of HCI and can be used at all stages of the curriculum for courses in this dynamic field. The book focuses on and explores this emerging discipline by bringing together the best practice and experience from HCI and interaction design (ID). The approach takes traditional human-centred concepts from HCI, but recognizes that we have gone beyond computers and are concerned with designing engaging interactions between people and a wide range of devices, products and systems. New areas explored include information appliances, supported cooperation and ubiquitous computing and systems.

*Modern Architecture in Latin America: Art, Technology, and Utopia* is an introductory text on the issues, polemics, and works that represent the complex processes of political, economic, and cultural modernization in the twentieth century. The number and types of projects varied greatly from country to country, but, as a whole, the region produced a significant body of architecture that has never before been presented in a single volume in any language. *Modern Architecture in Latin America* is the first comprehensive history of this important production. Designed as a survey and focused on key examples/paradigms arranged chronologically from 1903 to 2003, this volume covers a myriad of countries; historical, social, and political conditions; and projects/developments that range from small houses to urban plans to architectural movements. The book is structured so that it can be read in a variety of ways—as a historically developed narrative of modern architecture in Latin America, as a country-specific chronology, or as a treatment of traditions centered on issues of art, technology, or utopia. This structure allows readers to see the development of multiple and parallel branches/historical strands of architecture and, at times, their interconnections across countries. The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations.

The newly expanded "Learn to Listen, Listen to Learn" series prepares students for the rigors of academic classwork, helping them acquire the listening-comprehension and note-taking skills necessary for success. This two-book series offers students valuable tips for getting the most from college lectures, including note-taking skills, organization of information, recognition of language cues, and the acquisition of vocabulary. Students are shown how a typical lecture is organized, using extensive excerpts and transcripts from authentic lectures on high-interest topics from a wide range of academic discipline. Features: Includes new and updated material, including expanded vocabulary, extension, and post-lecture activities to encourage students to discuss, research, and write about ideas raised in the lectures. Teaches students how to recognize lecture organization, and how to evaluate and predict information. Focuses on the acquisition of vocabulary, especially from the Academic Word List, and on the recognition of language cues. Prepares students for academic testing with TOEFL-style test questions throughout the text. Audio CDs are also available for this text. Click on the links to the left of this page to purchase the Audio CDs. See also "Learn to Listen, Listen to Learn 1."

The bestselling book that changed the way we talk about sex... 'They say men think about sex every eight seconds - I want to know what they think about for the other seven...' Abby Lee is smart, sassy, and perpetually single. Frustrated with her mediocre love-life, she's now looking for the kind of sex she's always wanted. This is the intimate diary of her extraordinary journey. Never one to turn down an opportunity - even if it does include the use of a whip, the thrill of the outdoors, or the involvement of a third party - Abby enthusiastically romps her way through a series of one-night stands, casual flings, and same-sex shags. But as she revels in her sexual quest, Abby meets Blog Boy and begins to wonder: will she ever be able to give up the bed-hopping and finally settle down?

A "New & Noteworthy" selection of The New York Times Book Review "Alexis Clark illuminates a whole corner of unknown World War II history." —Walter Isaacson, New York Times bestselling author of *Leonardo da Vinci* "[A]n irresistible human story. . . . Clark's voice is engaging, and her tale universal." —Jon Meacham, Pulitzer Prize-winning author of *Thomas Jefferson: The Art of Power* and *American Lion: Andrew Jackson in the White House* A true and deeply moving narrative of forbidden love during World War II and a shocking, hidden history of race on the home front This is a love story like no other: Elinor Powell was an African American nurse in the U.S. military during World War II; Frederick Albert was a soldier in Hitler's army, captured by the Allies and shipped to a prisoner-of-war camp in the Arizona desert. Like most other black nurses, Elinor pulled a second-class assignment, in a dusty, sun-baked—and segregated—Western town. The army figured that the risk of fraternization between black nurses and white German POWs was almost nil. Brought together by unlikely circumstances in a racist world, Elinor and Frederick should have been bitter enemies; but instead, at the height of World War II, they fell in love. Their dramatic story was unearthed by journalist Alexis Clark, who through years of interviews and historical research has pieced together an astounding narrative of race and true love in the cauldron of war. Based on a New York Times story by Clark that drew national attention, *Enemies in Love* paints a tableau of dreams deferred and of love struggling to survive, twenty-five years before the Supreme Court's Loving decision legalizing mixed-race marriage—revealing the surprising possibilities for human connection during one of history's most violent conflicts.

An exploration of how brain structure and cultural content interacted in the Neolithic period 10,000 years ago to produce unique life patterns and belief systems. What do the headless figures found in the famous paintings at Catalhoyuk in Turkey have in common with the monumental tombs at Newgrange and Knowth in Ireland? How can the concepts of "birth," "death," and "wild" cast light on the archaeological enigma of the domestication of cattle? What generated the revolutionary social change that ended the Upper Palaeolithic? David Lewis-Williams's previous book, *The Mind in the Cave*, dealt with the remarkable Upper Palaeolithic paintings, carvings, and engravings of western Europe. Here Dr. Lewis-Williams and David Pearce examine the intricate web of belief, myth, and society in the succeeding Neolithic period, arguably the most significant turning point in all human history, when agriculture became a way of life and the fractious society that we know today was born. The authors focus on two contrasting times and

places: the beginnings in the Near East, with its mud-brick and stone houses each piled on top of the ruins of another, and western Europe, with its massive stone monuments more ancient than the Egyptian pyramids. They argue that neurological patterns hardwired into the brain help explain the art and society that Neolithic people produced. Drawing on the latest research, the authors skillfully link material on human consciousness, imagery, and religious concepts to propose provocative new theories about the causes of an ancient revolution in cosmology and the origins of social complexity. In doing so they create a fascinating neurological bridge to the mysterious thought-lives of the past and reveal the essence of a momentous period in human history. 100 illustrations, 20 in color.

"Who better to raise teens' awareness of mental illness and health than the YA authors they admire?" —Booklist (starred review) "[A] much-needed, enlightening book." —School Library Journal (starred review) Your favorite YA authors including Ellen Hopkins, Maureen Johnson, and more recount their own experiences with mental health in this raw, real, and powerful collection of essays that explores everything from ADD to PTSD. Have you ever felt like you just couldn't get out of bed? Not the occasional morning, but every day? Do you find yourself listening to a voice in your head that says "you're not good enough," "not good looking enough," "not thin enough," or "not smart enough"? Have you ever found yourself unable to do homework or pay attention in class unless everything is "just so" on your desk? Everyone has had days like that, but what if you have them every day? You're not alone. Millions of people are going through similar things. However issues around mental health still tend to be treated as something shrouded in shame or discussed in whispers. It's easier to have a broken bone—something tangible that can be "fixed"—than to have a mental illness, and easier to have a discussion about sex than it is to have one about mental health. *Life Inside My Mind* is an anthology of true-life events from writers of this generation, for this generation. These essays tackle everything from neurodiversity to addiction to OCD to PTSD and much more. The goals of this book range from providing a home to those who are feeling alone, awareness to those who are witnessing a friend or family member struggle, and to open the floodgates to conversation.

Just like Mark Twain's Tom Sawyer and Huckleberry Finn, this novel about life "back in the day" for an imaginative farm boy is an endearing, timeless coming-of-age adventure that is sure to become a classic. Through Teddy's eyes and heart, the idyllic farm life viewed in magazines and on TV appears to be out of reach. For Teddy, life looks so much better over the fence or down the road. He experiences his young life filled with disappointments, bullies, broken dreams, fear, strained relationships, and even death. In spite of it all, Teddy never quits believing in his dream of the way life can be. What keeps his dream alive? Why does Teddy run in the deep darkness of a cow pasture? What causes his cascade of confusing emotions? How do the eyes of Teddy's heart enable him to come through a transformation? Readers, young and older, will find some of themselves in Teddy's story—in his everyday struggles, wonderings, and moments of joy. One only has to read with the eyes of the heart and have the courage and hope to become a more complete self. In the transformation, there is always a blessing.

*SolidWorks 2013 Tutorial with Video Instruction* is targeted towards a technical school, two year college, four year university or industry professional that is a beginner or intermediate CAD user. The text provides a student who is looking for a step-by-step project based approach to learning SolidWorks with an enclosed 1.5 hour video instruction DVD, SolidWorks model files, and preparation for the CSWA exam. The book is divided into two sections. Chapters 1 - 7 explore the SolidWorks User Interface and CommandManager, Document and System properties, simple machine parts, simple and complex assemblies, design tables, configurations, multi-sheet, multi-view drawings, BOMs, Revision tables using basic and advanced features along with Intelligent Modeling Techniques, SustainabilityXpress, SimulationXpress and DFMXpress. Chapters 8 - 11 prepare you for the new Certified SolidWorks Associate Exam (CSWA). The CSWA certification indicates a foundation in and apprentice knowledge of 3D CAD and engineering practices and principles. Follow the step-by-step instructions and develop multiple assemblies that combine over 100 extruded machined parts and components. Formulate the skills to create, modify and edit sketches and solid features. Learn the techniques to reuse features, parts and assemblies through symmetry, patterns, copied components, design tables and configurations. Learn by doing, not just by reading! Desired outcomes and usage competencies are listed for each chapter. Know your objective up front. Follow the steps in each chapter to achieve your design goals. Work between multiple documents, features, commands, custom properties and document properties that represent how engineers and designers utilize SolidWorks in industry.

Modern culture would have you believe that everyone has a soul mate; that romance is the most important part of a successful marriage; that marriage does not mean 'til death do us part, but merely for as long as my needs are being met; and that when serious differences arise, divorce is

the best solution. According to the Bible, all of these modern-day assumptions miss what marriage is all about. In this six-session video-based Bible study (DVD/digital video sold separately), Timothy Keller, along with Kathy, his wife of forty years, draws a profound portrait of marriage from the pages of Scripture that neither idealizes nor rejects the institution but points us back to the relationship between God and man. The result is a vision for marriage that is refreshingly frank and unsentimental, yet hopeful and beautiful. This study is for anyone from singles to couples considering marriage to those who have been married recently or for a long time. Sessions include: Service: Marriage Isn't about You Covenant: Created to Make Promises Roles: Loving through Mutual Submission Singleness: Strengthening the Spiritual Family Sex: The Act of Covenant Renewal Hope: Seeing the Great Horizon Designed for use with The Meaning of Marriage Video Study (sold separately).
