HAILIE EMILIO

Global Inequality Rowman & Littlefield

The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and

the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.

[Global Capital Markets](#) Harvard University Press

From Anger to Action tells the stories of the citizens' movements

charting new paths to tackle the big global challenges that lie behind the political upheavals of our times. Drawing on candid insights from citizens, activists, and innovators, and their own experiences as leaders of internationally recognized advocacy organizations, the authors give an insider account of the battle for change and how it can be won – as well as trenchant criticism of where traditional civil society has lost its way and needs renewal. While unflinching on the dangers of the current political crises, the book offers hard-edged hope and a vision for citizen-led change to reshape our fractured politics. We meet communities in economically-battered towns welcoming refugees and Syrian peacebuilders reaching across impossible divides, go behind the scenes with Fairtrade banana farmers and hear of frenzied climate campaigners pushing divestment from oil companies and using social media to drive change. Lamb and Jackson explore how citizens' movements are transforming our global politics, refashioning internationalism and fighting back against narrow nationalism. The book analyses why some movements secure lasting change – and others fail. And they show how these insights could shape a wider strategy for grassroots-up transformation. *From Anger to Action* will be of interest to social activists and anyone interested in social movements, global change, and civil society.

Global Mom CSIRO PUBLISHING

The global race for talent is on, with countries and businesses competing for the best and brightest. Talented individuals migrate much more frequently than the general population, and the United States has received exceptional inflows of human capital. This foreign talent has transformed U.S. science and

engineering, reshaped the economy, and influenced society at large. But America is bogged down in thorny debates on immigration policy, and the world around the United States is rapidly catching up, especially China and India. The future is quite uncertain, and the global talent puzzle deserves close examination. To do this, William R. Kerr uniquely combines insights and lessons from business practice, government policy, and individual decision making. Examining popular ideas that have taken hold and synthesizing rigorous research across fields such as entrepreneurship and innovation, regional advantage, and economic policy, Kerr gives voice to data and ideas that should drive the next wave of policy and business practice. *The Gift of Global Talent* deftly transports readers from joyous celebrations at the Nobel Prize ceremony to angry airport protests against the Trump administration's travel ban. It explores why talented migration drives the knowledge economy, describes how universities and firms govern skilled admissions, explains the controversies of the H-1B visa used by firms like Google and Apple, and discusses the economic inequalities and superstar firms that global talent flows produce. The United States has been the steward of a global gift, and this book explains the huge leadership decision it now faces and how it can become even more competitive for attracting tomorrow's talent. Global Security Crown Currency

INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to

thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates “Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases.” - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time

instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

Global Cities and Global Order Cambridge University Press

Global Security is an introduction to the emerging field of global security and reflects its growing knowledge base by educating readers about structures and processes that are the most serious threats on a planetary scale. After multiple perspectives in the field are represented in the opening chapter, students are exposed to key concepts and research findings on topics such as armed conflict, transnational crime, cybersecurity, financial crisis, poverty, health, population dynamics, ecosecurity, natural and technological disasters, threats from outer space, and cultural hybridity. The book concludes with an analysis of the prospects for international human rights. Designed for students at any level who want to familiarize themselves with a set of emerging definitive topics, the backdrop of those topics from various scientific subfields, and directions for future research, this text provides the ideal starting point. The writing is crisp, clear, and to the point. It provides succinct reviews of the literature and lays out the conceptual roadmaps for further study. It shares the best

ideas on how certain problems could be prevented, alleviated, or eradicated. Each chapter features text boxes to summarize key points and support retention, as well as questions to use in classroom discussion or as writing prompts. Designed to meet the needs of a rapidly growing field of study and to serve as a comprehensive introduction to the subject, *Global Security* is well suited to courses in any discipline that is concerned with international or global affairs. Thomas Riley O'Connor holds a Ph.D. in criminology with an emphasis on comparative crime and justice systems. A senior professor in criminal justice and homeland security, Dr. O'Connor also serves as the director of global security studies at Austin Peay State University. In addition to his work with the university, he has been a contractor and consultant with elements of the intelligence and defense communities. Dr. O'Connor is also the author of books on terrorism, cybersecurity, and white collar crime.

Global Governance Princeton University Press

"Illuminating." - The New York Times Book Review Named one of "Ten Books to Read this April" by the BBC What is the future of fiction in an age of globalization? In *The Global Novel*, acclaimed literary critic Adam Kirsch explores some of the 21st century's best-known writers--including Orhan Pamuk, Chimamanda Ngozi Adichie, Mohsin Hamid, Margaret Atwood, Haruki Murakami, Roberto Bolano, Elena Ferrante, and Michel Houellebecq. They are employing a way of imagining the world that sees different places and peoples as intimately connected. From climate change and sex trafficking to religious fundamentalism and genetic engineering, today's novelists use 21st-century subjects to address the perennial concerns of fiction, like morality, society,

and love. The global novel is not the bland, deracinated, commercial product that many critics of world literature have accused it of being, but rather finds a way to renew the writer's ancient privilege of examining what it means to be human.

The Global Soul Springer Nature

This second edition of *Global Security in the Twenty-first Century* offers a thoroughly updated and balanced introduction to contemporary security studies. Sean Kay examines the relationship between globalization and international security and places traditional quests for power and national security in the context of the ongoing search for peace. Sean Kay explores a range of security challenges, including fresh analysis of the implications of the global economic crisis and current flashpoints for international security trends. Writing in an engaging style, Kay integrates traditional and emerging challenges in one easily accessible study that gives readers the tools they need to develop a thoughtful and nuanced understanding of global security.

Child Migration and Human Rights in a Global Age SAGE

In recent years the spread of diseases such as AIDS, SARS and avian flu has pushed health issues towards the top of the international agenda. Such outbreaks have serious political, economic, and social consequences and remind the world of the necessity of global cooperation in order to deal effectively with the challenges they pose. *Global Health Governance* offers a comprehensive introduction to the changing international legal environment, the governmental and non-governmental actors involved with health issues, and the current regime's ability to adapt to new crises. Part 1 focuses on the evolution of

international regulations aimed at stopping the spread of health problems across borders. Over the last 150 years, the nature of such cooperation, the motivations of the parties involved, and the diseases covered, has changed radically. Part 2 examines some of the most prominent actors in global health governance today, ranging from traditional intergovernmental organizations, such as the WHO and the World Bank, to private philanthropic organizations that exist outside regular global governance structures. Part 3 concentrates on some of the most pressing issues facing global health governance today, including access to pharmaceuticals, the costs and benefits of making health a security issue, and the role of civil society organizations. Global Health Governance provides an accessible and insightful analysis of an evolving realm of global governance and cooperation. It will appeal to students of global health politics, global governance, international organization, and human security.

A War on Global Poverty Flatiron Books

Winner of the Bruno Kreisky Prize, Karl Renner Institut A Financial Times Best Economics Book of the Year An Economist Best Book of the Year A Livemint Best Book of the Year One of the world's leading economists of inequality, Branko Milanovic presents a bold new account of the dynamics that drive inequality on a global scale. Drawing on vast data sets and cutting-edge research, he explains the benign and malign forces that make inequality rise and fall within and among nations. He also reveals who has been helped the most by globalization, who has been held back, and what policies might tilt the balance toward economic justice. "The data [Milanovic] provides offer a clearer picture of great economic puzzles, and his bold theorizing chips

away at tired economic orthodoxies." —The Economist "Milanovic has written an outstanding book...Informative, wide-ranging, scholarly, imaginative and commendably brief. As you would expect from one of the world's leading experts on this topic, Milanovic has added significantly to important recent works by Thomas Piketty, Anthony Atkinson and François Bourguignon...Ever-rising inequality looks a highly unlikely combination with any genuine democracy. It is to the credit of Milanovic's book that it brings out these dangers so clearly, along with the important global successes of the past few decades.

—Martin Wolf, Financial Times

Global Entertainment Media: A Critical Introduction Oxford University Press

NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER •

From two winners of the 2024 Nobel Prize in Economic Sciences, "who have demonstrated the importance of societal institutions for a country's prosperity" "A wildly ambitious work that hopscotches through history and around the world to answer the very big question of why some countries get rich and others don't."—The New York Times FINALIST: Financial Times and Goldman Sachs Business Book of the Year Award • ONE OF THE BEST BOOKS OF THE YEAR: The Washington Post, Financial Times, The Economist, BusinessWeek, Bloomberg, The Christian Science Monitor, The Plain Dealer Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, or geography that determines prosperity or poverty? As *Why Nations Fail* shows, none of these factors is either definitive or destiny. Drawing on fifteen years of original research, Daron Acemoglu and James

Robinson conclusively show that it is our man-made political and economic institutions that underlie economic success (or the lack of it). Korea, to take just one example, is a remarkably homogenous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The differences between the Koreas is due to the politics that created those two different institutional trajectories. Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, the Soviet Union, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, among them: • Will China's economy continue to grow at such a high speed and ultimately overwhelm the West? • Are America's best days behind it? Are we creating a vicious cycle that enriches and empowers a small minority? "This book will change the way people think about the wealth and poverty of nations . . . as ambitious as Jared Diamond's *Guns, Germs, and Steel*."—BusinessWeek

Latin America in Global International Relations Oxford University Press

Balancing provocative criticism with clear explanations of complex ideas, this student-friendly introduction investigates the crucial role global entertainment media has played in the emergence of transitional capitalism. Examines the influence of global entertainment media on the emergence of transnational capitalism, providing a framework for explaining and understanding world culture as part of changing class relations and media practices Uses action adventure movies to demonstrate the complex relationship between international

media political economy, entertainment content, global culture, and cultural hegemony Draws on examples of public and community media in Venezuela and Latin America to illustrate the relations between government policies, media structures, public access to media, and media content Engagingly written with crisp and controversial commentary to both inform and entertain readers Includes student-friendly features such as fully-integrated call out boxes with definitions of terms and concepts, and lists and summaries of transnational entertainment media *Governing Global Health* Rowman & Littlefield Publishers A startling look at the unexpected places where violent hate groups recruit young people Hate crimes. Misinformation and conspiracy theories. Foiled white-supremacist plots. The signs of growing far-right extremism are all around us, and communities across America and around the globe are struggling to understand how so many people are being radicalized and why they are increasingly attracted to violent movements. Hate in the Homeland shows how tomorrow's far-right nationalists are being recruited in surprising places, from college campuses and mixed martial arts gyms to clothing stores, online gaming chat rooms, and YouTube cooking channels. Instead of focusing on the how and why of far-right radicalization, Cynthia Miller-Idriss seeks answers in the physical and virtual spaces where hate is cultivated. Where does the far right do its recruiting? When do young people encounter extremist messaging in their everyday lives? Miller-Idriss shows how far-right groups are swelling their ranks and developing their cultural, intellectual, and financial capacities in a variety of mainstream settings. She demonstrates how young people on the margins of our communities are

targeted in these settings, and how the path to radicalization is a nuanced process of moving in and out of far-right scenes throughout adolescence and adulthood. Hate in the Homeland is essential for understanding the tactics and underlying ideas of modern far-right extremism. This eye-opening book takes readers into the mainstream places and spaces where today's far right is engaging and ensnaring young people, and reveals innovative strategies we can use to combat extremist radicalization.

Diversity and Inclusion in Global Higher Education

Workman Publishing

How do we take stock of the state and direction of the world's environment, and what can we learn from the experience? Among the myriad detailed narratives about the condition of the planet, the Global Environment Outlook (GEO) reports—issued by the United Nations Environment Programme—stand out as the most ambitious. For nearly three decades the GEO project has not only delivered iconic global assessment reports, but through its multitude of contributors has inspired hundreds of similar processes worldwide from the regional to the local level. This book provides an inside account of the evolution of the GEO project from its earliest days. Building on meticulous research, including interviews with former heads of the United Nations Environment Programme, diplomats, leading contributing scientists, and senior leaders of collaborating organizations, the story is told from the perspective of five GEO veterans who all played a pivotal role in shaping the periodic assessments. The GEO's history provides striking insights and will save valuable time to those who commission, design and conduct, as well as critique and improve, assessments of environmental

development in the next decade.

Global Security in the Twenty-first Century OUP Oxford

A history of US involvement in late twentieth-century campaigns against global poverty and how they came to focus on women A War on Global Poverty provides a fresh account of US involvement in campaigns to end global poverty in the 1970s and 1980s. From the decline of modernization programs to the rise of microcredit, Joanne Meyerowitz looks beyond familiar histories of development and explains why antipoverty programs increasingly focused on women as the deserving poor. When the United States joined the war on global poverty, economists, policymakers, and activists asked how to change a world in which millions lived in need. Moved to the left by socialists, social democrats, and religious humanists, they rejected the notion that economic growth would trickle down to the poor, and they proposed programs to redress inequities between and within nations. In an emerging “women in development” movement, they positioned women as economic actors who could help lift families and nations out of destitution. In the more conservative 1980s, the war on global poverty turned decisively toward market-based projects in the private sector. Development experts and antipoverty advocates recast women as entrepreneurs and imagined microcredit—with its tiny loans—as a grassroots solution. Meyerowitz shows that at the very moment when the overextension of credit left poorer nations bankrupt, loans to impoverished women came to replace more ambitious proposals that aimed at redistribution. Based on a wealth of sources, A War on Global Poverty looks at a critical transformation in antipoverty efforts in the late twentieth century

and points to its legacies today.

The Gift of Global Talent Oxford University Press

How to Globalize to Survive in the New Economy At a time in which globalization impacts corporate strategy as never before, corporate leaders are challenged to consider all the implications of a new global economy. Characterized by a myriad of competing forces, this new global economy is highlighted by unprecedented advances in technology of all kinds. With such unrelenting change blurring the view, corporate leaders need the benefit of the best thinking in order to focus on the right global strategies. *World View* offers just such thinking, featuring examples of strategies and best practices used by successful companies worldwide in moving toward global markets. In his introduction to this collection of *Harvard Business Review* articles, editor Jeffrey Garten pinpoints five emerging themes: * Operating in a global market requires CEOs to rethink every aspect of their strategies. * The best strategies require that organizations gather massive amounts of information and process it effectively. * Companies that succeed on a global scale are constant innovators, learning and implementing simultaneously. * Great global companies create cultures conducive to extensive internal and external collaboration and networking. * Radical change brings unprecedented opportunity to capture markets and enhance shareholder value. Seeing globalization through the eyes of leading thinkers and executives who have mastered its challenges, *World View* presents forward-thinking insights for corporate leaders determined to succeed in the always-new and uncertain global economy. A *Harvard Business Review* Book. *What Is Global History?* Cambridge University Press

Since the onset of the pandemic, progressive opinion has been clear that hard lockdowns are the best way to preserve life, while only irresponsible and destructive conservatives like Trump and Bolsonaro oppose them. But why should liberals favor lockdowns, when all the social science research shows that those who suffer most are the economically disadvantaged, without access to good internet or jobs that can be done remotely; that the young will pay the price of the pandemic in future taxes, job prospects, and erosion of public services, when they are already disadvantaged in comparison in terms of pension prospects, paying university fees, and state benefits; and that Covid's impact on the Global South is catastrophic, with the UN predicting potentially tens of millions of deaths from hunger and declaring that decades of work in health and education is being reversed. Toby Green analyses the contradictions emerging through this response as part of a broader crisis in Western thought, where conservative thought is also riven by contradictions, with lockdown policies creating just the sort of big state that it abhors. These contradictions mirror underlying irreconcilable beliefs in society that are now bursting into the open, with devastating consequences for the global poor.

Global Economic History: A Very Short Introduction Vintage

One mother's touching memoir of the adventures and hardships she faced while raising a family internationally for over 20 years. After more than twenty years living abroad—sixteen addresses, eight countries, and five different languages—writer Melissa Bradford shares a fantastic journey of motherhood that will inspire any family. Follow this family of six on their passage—extraordinary, hilarious and heartbreakingly

poignant—from Bright Lights (of New York City) to the Northern Lights (of Norway) to the City of Light (Paris) to the speed-of-light of the Autobahn (in Munich). Continue deep into the tropics of Southeast Asia (Singapore) and end your voyage in the heights of the Swiss Alps (Geneva). As varied as the topography—the craggy fjords, the meandering Seine, the black forests, the muggy tropics, the soaring Alps—this international tale traverses everything from giving birth in a château in Versailles to living on an island in a fjord. From singing jazz on national Norwegian T.V. to judging an Indonesian beauty contest. From navigating the labyrinth of French bureaucracy and the traffic patterns of Singapore to sitting around a big pine table where the whole family learns languages, cultures, and cuisines—where they learn to love this complex world and, most importantly, each other. Praise for *Global Mom* “A stunning picture of life.” —The Deseret News “Here is a rich, frank and funny book in which the essentials of family and friendship and community are combined with interesting travelogue and the best kind of spiritual writing. In short, this is a book about love.” —Kate Braestrup, New York Times–bestselling author of *Here If You Need Me* “A brilliant hero's journey highlighting the challenges and triumphs of motherhood under unique cross-cultural circumstances. With honesty, sensitivity, and humor, Dalton-Bradford is a role model for all parents who will be relocating with children, especially those who will relocate for their spouse's career.” —Paula Caligiuri, PhD, author of *Cultural Agility: Building a Pipeline of Successful Global Professionals*
Keeping the World's Environment under Review Stanford University Press

This dynamic collection presents a new way of writing national and global histories while developing our understanding of France in the world through short, provocative essays that range from prehistoric frescoes to Coco Chanel to the terrorist attacks of 2015. Bringing together an impressive group of established and up-and-coming historians, this bestselling history conceives of France not as a fixed, rooted entity, but instead as a place and an idea in flux, moving beyond all borders and frontiers, shaped by exchanges and mixtures. Presented in chronological order from 34,000 BC to 2015, each chapter covers a significant year from its own particular angle—the marriage of a Viking leader to a Carolingian princess proposed by Charles the Fat in 882, the Persian embassy's reception at the court of Louis XIV in 1715, the Chilean coup d'état against President Salvador Allende in 1973 that mobilized a generation of French left-wing activists. France in the World combines the intellectual rigor of an academic work with the liveliness and readability of popular history. With a brand-new preface aimed at an international audience, this English-language edition will be an essential resource for Francophiles and scholars alike.

From Global to Local Princeton University Press

This book is an economic survey of international capital mobility from the late nineteenth century to the present.

Radical Documentary and Global Crises Oxford University Press
 Attitudes to GM crops continue to generate tension, even though they have been grown commercially for over 20 years. Negative sentiment towards their development limits their adoption in Western countries, despite there being no evidence of harm to human health. These unfounded concerns about genetically

modified crops have also inhibited uptake in many countries throughout Africa and Asia, having a major impact on agricultural productivity and preventing the widespread cultivation of potentially life-saving crops. *GM Crops and the Global Divide* traces the historical importance that European attitudes to past colonial influences, aid, trade and educational involvement have had on African leaders and their people. The detrimental impact that these attitudes have on agricultural productivity and food security continues to be of growing importance, especially in light of climate change, drought and the potential rise in sea levels –

the effects of which could be mitigated by the cultivation of GM and gene-edited crops. Following on from her previous books *Genes for Africa*, *GM Crops: The Impact and the Potential* and *Food for Africa*, Jennifer Thomson unravels the reasons behind these negative attitudes towards GM crop production. By addressing the detrimental effects that anti-GM opinions have on nutrition security in developing countries and providing a clear account of the science to counter these attitudes, she hopes to highlight and ultimately bridge this global divide.
