RANDALL ALEENA

Open EDI and Law in Europe GRIN Verlag

The ubiquity of the Internet contrasts with the territorial nature of national legal orders. This book offers a comprehensive analysis of jurisdiction,

choice of law and enforcement of judgments issues concerning online activities in the areas in which private legal relationships are most affected by the Internet. It provides an in-depth study of EU Law in this particularly dynamic field, with references to major developments in other jurisdictions. Topics comprise information society

services, data protection, defamation, copyright, trademarks, unfair competition and contracts, including consumer protection and alternative dispute resolution.

Internet Banking and the Law in Europe

Kluwer Law International B.V.

Electronic commerce applications all allow the transfer of electronic data from one point to another. Open EDI--a particular application of electronic commerce--also permits commercial transactions to take place in a fully automated and highly organised trading environment. This volume focuses on open EDI and its relationship with law. When confronted with technology, the typical reaction of the law is to support interpretations and amendments of existing statutes so that old laws can

accommodate the change. Open EDI, however, does not fit within this traditional regulatory method. Open EDI permits ad hoc open electronic transactions irrespective of geographical border and jurisdictions among trading partners with no prior trade relationship. By doing so, open EDI limits the possibility of using up-front interchange agreements to address the legal problems of the interchange. It therefore requires the use of legal instruments supported by information technology to overcome legal problems. Openness in an electronic environment has the potential to initiate an unobserved change in law. Possible regulations should address users' need to act in such a trading environment without the inhibition of basic legal concerns. Open

EDI and Law in Europe concludes that the challenge of open EDI necessitates working toward a new legal framework based on international law and supported by information technology. This volume will assist lawyers and laypersons concerned with the practical and theoretical aspects of the legal issues of the application of open EDI by pointing out subtle issues in the application of law in this area and by provoking thought regarding possible solutions.

E-Commerce Law in Europe and the USA
Springer Nature

This unique text deals with the most important legal areas for e-commerce related business in most of the member states in Europe as well as the USA. Topics that are dealt with include:

contract law, consumer protection, intellectual property law, unfair competition, antitrust law, liability of providers, money transactions, privacy and data protection.

A Cross-Border-Only Regulation for Consumer Transactions in the EU Kluwer Law International B.V.

Electronic Commerce and International Private Law examines the maximization of consumer protection via the consumer's jurisdiction and law. It discusses the proposition that a new connecting factor be used to improve the efficiency of juridical protection for consumers who contract with foreign sellers by electronic means and offers recommendations as to how to amend existing jurisdiction and choice of law rules to provide a basis for the consumer

to sue in his own jurisdiction and for the law of the consumer's domicile to apply. The book will be a valuable resource for academics, students and practitioners working in the areas of international private law, electronic commerce law and consumer law.

EU Electronic Commerce Law Taylor & Francis

This book outlines and analyses the legislative activity of the Union in terms of Internet and Electronic Commerce Law.

EU Regulation of E-Commerce Springer

This extensively revised and updated third edition of EU Internet Law offers a state of the art overview of the key areas of EU Internet regulation, as well as a critical evaluation of EU policy-making and governance in the field. It

provides an in-depth analysis of the ways in which relevant legal instruments interact, as well as comparative discussions contrasting EU and US solutions.

E-Commerce Law in Germany Edward Elgar Publishing

This book outlines and analyses the legislative activity of the Union in an area which is currently experiencing exponential growth in terms of both commercial activity and legal significance. The scope of the book is current, pending and proposed Internet-related law on contracts, copyright, data protection, commercial communications, financial services, electronic cash and electronic signatures. John Dickie argues that the Union is in the process of displacing Member State autonomy in

the regulation of the Internet. Within that frame, it is argued that there is a lack of focus on the individu.

Conflict of Laws and the Internet

Springer Science & Business Media

Doing business over the Internet may raise a wide array of legal questions that can be crucial to the commercial success of the venture. Recently revised, updated and expanded, the second edition of e-Business Law of the European Union contains the text of the EU legislation which is of particular relevance to e-business, covering a broad spectrum of legal issues such as data protection, distance selling, electronic signatures, liability of online intermediates, electronic money, applicable law and jurisdiction in international disputes.

European Data Privacy Law and Online Business Djoef Publishing

Legal problems abound in the information society. Electronic commerce, copyright, privacy, illegal and harmful content, taxes, wiretapping governments face an enormous challenge to meet the advent of the Internet and ICT with a flexible, up-to-date, and adequate legal framework. Yet one aspect makes this challenge even more daunting: internationalisation. Law is still to a great extent based on nation states, but the information society is above all a borderless and global society. Territoriality and national sovereignty clash with the need for a global approach to address ICT-law issues. Should states leave everything to the global market, or should they

intervene to protect vital national interests? How can one enforce national rules in a world where acts take place somewhere' in Cyberspace? This book presents the positions on these issues of the governments of the Netherlands, Germany, France, the UK, and the US, as well as of international organisations. How do they think about co-regulation, law enforcement, harmonisation, international cooperation, and alternative dispute resolution? How do they deal with applicable law and online contracts, privacy, international liability of Internet providers, and electronic signatures? What are the implications of the European Electronic Commerce Directive and the draft Crime in Cyberspace convention? Any legal framework that is to fit the global

information society must take into account internationalisation. This volume shows to what extent governments are meeting this challenge.

Europe E-Commerce Business Law Handbook Volume 1 Strategic Information and Basic Regulations
Woodhead Publishing

Information technology is continuing to transform global communications and the world economy with innovative products and services. In this dynamic environment, events tend to be market-driven and it may be difficult for the regulators to keep up. At the same time, there is a need for public authorities to promote effective competition within a clear, coherent, and predictable framework. This useful reference work summarizes the major rules and policies

for information technology at the European level. It describes the institutional framework and general policies for the 'information society', examines the detailed rules for external trade, competition and intellectual property, and discusses the Internet and electronic commerce. It provides an excellent overview of the subject as well as a good starting point for additional research on particular issues. This unique work will be of great value for practising lawyers, corporate counsel, business executives, consultants, academics, and government or trade association officials.

Internet and Electronic Commerce Law in the European Union Springer Science & Business Media

Argues that the European Union is failing

adequately to protect consumers' critical interests in the area of e-commerce.

Business and Law on the Internet Kluwer Law International B.V.

This innovative book provides an overview of the latest developments and controversies in European Internet law. It is grouped in sections that correspond to the most disputed areas, looking consecutively at policy and governance, copyright, private in

E-Commerce Law in Europe and the USA McGraw-Hill Companies

Master's Thesis from the year 2004 in the subject Law - Media, Multimedia Law, Copyright, grade: first, distinction (mit Auszeich, University of Wales, Aberystwyth, course: LL.M. Programm, language: English, abstract: This Dissertation aims to assess the

effectiveness and suitability of European regulation in respect to E-Commerce. Taking the European 'Lisbon Strategy' as set out in 2000 as a starting point, this paper examines whether Europe is on the right track to becoming "the most competitive and dynamic knowledge-based economy (...) by 2010". Hereby, the scope of this paper is limited to E-Commerce only as one essential part of a 'knowledge-based economy' and an 'e-ready' Europe. After outlining the special nature of E-Commerce, the rationale behind regulation and the historical background of European regulation in this field, this paper concentrates on four issues where the EU has become active in regulating E-Commerce, namely, the essential prerequisite of an existing 'e-infrastructure', e-signatures, privacy and

consumer protection. The European approach to each of these issues is assessed to reveal its strengths and weaknesses. Moreover, this European way of regulating E-Commerce is then compared with other regulative attempts. Hereby, special attention is paid to the US approach to regulating E-Commerce which is mostly based on self-regulation. Thus, this paper comes to the conclusion that Europe is on the right track to becoming 'e-ready' in respect to E-Commerce. Basic regulatory decisions have the potential to lead in the right direction, although they do not always provide the most effective solution. Often European Directives do not reach far enough and are outdated. Thus, they do not address E-Commerce sufficiently, give too much discretion to

the Member States and leave prevalent gaps or do not interoperate properly. Therefore, the European regulation on E-Commerce needs some revision and has to take some brave and innovative steps to establish

Digital Consumers and the Law

Springer

The historic European Union Directive on Data Protection will take effect in October 1998. A key provision will prohibit transfer of personal information from Europe to other countries if they lack "adequate" protection of privacy. If enforced as written, the Directive could create enormous obstacles to commerce between Europe and other countries, such as the United States, that do not have comprehensive privacy statutes. In this book, Peter Swire and Robert Litan

provide the first detailed analysis of the sector-by-sector effects of the Directive. They examine such topics as the text of the Directive, the tension between privacy laws and modern information technologies, issues affecting a wide range of businesses and other organizations, effects on the financial services sector, and effects on other prominent sectors with large transborder data flows. In light of the many and significant effects of the Directive as written, the book concludes with detailed policy recommendations on how to avoid a coming trade war with Europe. The book will be of interest to the wide range of individuals and organizations affected by the important new European privacy laws. More generally, the privacy clash discussed in the book will prove a major

precedent for how electronic commerce and world data flows will be governed in the Internet Age.

ICT Law and Internationalisation: A Survey of Government Views Hart Publishing

With the massive explosion of e-commerce, and especially the use of the Internet as a transnational and instant medium for business transactions, has come a whole range of new laws and regulations - and, inevitably, a minefield of accompanying uncertainties and potential pitfalls. So what exactly are the legal issues companies need to address, and what are their implications in real terms for the business world? Find the answers in this groundbreaking study undertaken for the European Commission within the framework of the

ECLIP project. With a brief to provide practical help for businesses and e-commerce initiatives, this series of cutting-edge reviews examines and evaluates the special rules designed to regulate the Internet - both at a European and at national level in the Member States. It also explains the relevant technological developments and evaluates them against the legal background. This is an essential guide for legal and corporate practitioners alike, as well as software developers and the consultancy community internationally. A publication of the ECLIP network
The Law of Electronic Commerce and the Internet in the UK and Ireland Europa Law Publishing

The European Union has long sought to create a single financial area across

Europe where consumers in one country benefit from financial markets and activities in other countries. With the emergence of the Internet as a platform for the provision of online banking services, the creation of a pan-European market for banking services appeared a realistic proposition. In practice, however, this has not happened. This book asks why and argues that the creation of banking markets via the Internet relies on both available technologies and appropriate laws and regulations. The institutional and legal framework for online banking services in the single European market are examined, as is the level of legal harmonization achieved in the UK, France and Germany under the influence of the EU Directives pertaining to online

banking activities.

E-business Law of the European Union
Ashgate Publishing, Ltd.

'Internet law' and 'electronic commerce law' are new entities and as such there is some difficulty in defining this rapidly changing area of the law. Scholars are divided as to whether it is a subject in its own right or part of a broader area and there is also debate concerning its status as a new law or as old law which needs interpreting in a new way. This text helps the student to unravel this complicated area of law and provides guidance through the wealth of literature

available on the topic. The text is for law students coming towards the end of their first degree, or taking a Masters. The first half focuses on the principles of electronic commerce law and includes an introduction to the law of the Internet, basic concepts in intellectual property law, privacy law and data protection. The second part deals with rights and duties in the online world including, liabilities, ownership and contracts. Technical operations are explained in the text as necessary and a glossary provides a guide to the more commonly encountered computer technicalities. With a supporting website providing links to online further reading, this textbook is ideal for students of e-commerce law and will provide those studying information technology law or

practising commercial law with an indispensable introduction to Internet issues.

E-Directives: Guide to European Union Law on E-Commerce - Commentary on the Directives on Distance Selling, Electronic Signatures, Electronic Commerce, Copyright in the Information Society, and Data Protection Edward Elgar Publishing

"Since the last edition ten years ago the pace of technological and legal change has stepped up even more than before with previous editions. New legislation is in force such as the General Data Protection Regulation (GDPR) and UK Data Protection Act 1998 and from 1 January 2021 "UKGDPR". The UK Information Commissioner has been

looking closely at "Ad Tech" and what has become known as "big data" and how data are gathered on-line. Intellectual Property law in the ecommerce area has also changed. There is a very recently agreed new EU copyright directive which is due to be implemented in the 27 EU member states (but not the UK) in 2021. The post-Brexit transition period expired on 31 December 2020 which has implications for the application of ecommerce law in a number of different areas which are all addressed in the new addition. The 2010 EU vertical regulation and guidelines have recently been built on with the EU "geo-blocking" regulation and the related EU Commission's initiatives in relation to ecommerce in the anti-trust area. In 2020 the UK

implemented changes in relation to EU law in the revised 2018 Audiovisual Media Services Directive (AVMS) through the Audiovisual Media Services Regulations 2020 which are addressed in the new edition as post-Brexit the UK is retaining this legislation. Other updates include the distance selling legislation in the Consumer Contracts (Information, Cancellation and Additional Charges) Regulations 2013 and the Consumer Rights Act 2015 which came into force since the last edition."--...

Shaping the Future Through Standardization Bloomsbury Publishing
With the explosion of e-commerce, and especially the use of the internet for business transactions, the "paperless office" should surely already have become a reality. Its progress has,

however, been impeded by the lack of sufficient information security and a workable legal framework. So where are we now? Can we really trust electronic business transactions to be reliable, provable and enforceable, even on an international basis? Find the answers in this ground-breaking study undertaken for the European Commission. Carried out by the Interdisciplinary Centre for Law and Information Technology of the

Katholieke Universiteit Leuven, it provides a country-by-country review of the technology and deployment of electronic signatures. It also examines the legal and regulatory issues and the legal framework relating to their use in Europe and beyond. An essential guide for anyone involved in e-commerce or company/contract law. Country-by-country review. Thorough explanation of all related legal issues.
