ROWAN CHANCE

Who's in a Family? Tricycle Press

Family is important, but who's in a family? Why, the people who love you the most! This equal opportunity, open-minded picture book has no preconceptions about what makes a family a family. There's even equal time given to some of children's favorite animal families. With warm and inviting jewel-tone illustrations, this is a great book for that long talk with a little person on your lap.

Matisse and Picasso Flammarion-Pere Castor

This well-illustrated guide captures the beauty, diversity, and engaging world of bees and the native plants that support them. Superbly designed and organized, this is an indispensable source of information with extensive profiles for twenty-seven bee genera, plus twelve summary profiles for uncommon genera, and approximately one hundred native trees, shrubs, and perennials for the Midwest, Great Lakes, and Northeast regions. With over 1500 stunning photographs, detailed descriptions, and accessible science, environmental educator and research assistant Heather Holm brings to light captivating information about bees? life cycles, habitats, diet, foraging behaviors, crops pollinated, nesting lifestyles, seasonality, and preferred native forage plants. Bees are a singularly fascinating group of insects and this book makes it possible to observe, attract, and support them in their natural setting or in one's own garden. Not only does this guide assist the reader with bee identification in the field or by photo, it also notes microscopic features for the advanced user. The factors impacting bee populations, and the management of farms and public and residential landscapes for bees are also covered. Included in the bee forage (plant) chapters are plant profiles with range maps, habitat information, floral features and attractants, common bees attracted to the particular plant, and details about the ecological connections between the native plant and other flower-visiting insects. Noted also are birds dependent upon the product of the pollinated flowers (fruits and seeds). This is an excellent reference for amateur and professional naturalists, educators, gardeners, farmers, students, nature photographers, insect enthusiasts, biologists, and anyone interested in learning more about the diversity and biology of bees and their connection to native plants and the natural world.

Wasps Penn State Press

NATIONAL BESTSELLER • The trendsetting designer known for her effortless style shares the secrets of the art of layering, with more than 250 gorgeous photographs of her signature interiors.

"Livability is my true north. The materials I use time and again all

change with age and wear. Not only is that okay, it's how you achieve more than a re-creation of what you've already seen, or what somebody else has done. You can do this, too—I promise."—from the introduction Designing a room with all the vibes comes down to how you layer your décor. The more you can mix the elements of your room—your pillows, objects, patterns, and lighting—the more finished it'll feel: not too new, not too old, but just right. Known for her eclectic approach that stems from her California cool, Amber Lewis trains your eye in *Made for Living*, offering friendly advice on everything from nailing that perfect shade of paint to mismatching patterns with wild abandon to choosing a stone finish for new countertops. These pages will help you design a home that's made to be lived in.

Bees The Museum of Modern Art

"This comprehensive, essential book profiles over 65 perennial native plant species of the Midwest, Great Lakes region, Northeast and southern Canada plus the pollinators, beneficial insects and flower visitors the plants attract ... Readers learn to attract and identify pollinators and beneficial insects as well as customize their landscape planting for a particular type of pollinator with native plants. The book includes information on pollination, types of pollinators, pollinator conservation as well as pollinator landscape plans."--

Outlook Steidl

This second collection by Roger Bagnall brings together a further two dozen of his studies, this time covering Hellenistic, Roman, and Byzantine Egypt, published over the last thirty years. Many of the articles deal with issues of historical and papyrological method: the restoration of papyrus texts, the direction of archaeological work in Egypt, economic models for Roman Egypt, the usefulness of postcolonial theory, and approaches to the defective literary tradition for the Library of Alexandria. Others concentrate on particular bodies of evidence, ranging from inscriptions to ascetic literature, from registers to women's letters.

Hobbies C&T Publishing Inc

When Nicki drops his white mitten in the snow, he goes on without realizing that it is missing. One by one, woodland animals find it and crawl in; first, a curious mole, then a rabbit, a badger and others, each one larger than the last. Finally, a big brown bear is followed in by a tiny brown mouse and what happens next

makes for a wonderfully funny climax. As the story of the animals in the mitten unfolds, the reader can see Nicki in the borders of each page, walking through the woods unaware of what is going on. Once again Jan Brett has created a dramatic and beautiful picture book in her distinctive style. She brings the animals to life with warmth and humor, and her illustrations are full of visual delights and details faithful to the Ukrainian tradition from which the story comes.

Modern Art Despite Modernism Penguin

From the creator of the immensely popular *Happy Planner* and *Me and My BIG Ideas*, Stephanie Fleming, comes *Plan a Happy Life(TM)*--a delightfully practical book that shows you how to simplify, organize, and live with intention, all while having fun.

Harper's Bazaar Clarkson Potter

This book was developed from the proceedings of the first North American Tannin Conference held in Port. Angeles, Washington, August 1988. The objective of the conference was to bring together people with a common interest in condensed tannins and to promote interdisciplinary interactions that will lead to a better understanding of these important substances. Anot. her objective was the publicat. ion of this book because there has not been a monograph devoted to the chemistry and significance of tannins for several decades. The book is organized into sections dealing with the biosynthesis, structure, re actions, complexation with other biopolymers, biological significance, and use of tannins as specialty chemicals. The authors made a special attempt to focus on what we don't know as well as to provide a summary of what we do know in an effort to assist in planning future research. Our thanks go to the authors who so kindly contributed chapters and so pa tiently responded to our requests. We also thank Rylee Geboski and the Conference Assist. ance Staff, College of Forestry, Oregon State University, for their assistance in planning and conducting t. he conference, and Julia Wilson, Debbie Wolfe, Helen Coletka, and Nancy Greene of the Southern Forest Experiment Station, Pineville, Louisiana, who typed the chapt. ers. Linda Chalker-Scott was especially helpful in assisting us wit. h editing. Dick Hemingway is indebted t. o the staff of the Alexandria Forest.

Schroeder's Antiques Price Guide Martingale

WASPS is the first full-color, illustrated guide featuring approximately 150 species of flower-visiting wasps that occur in

eastern North America, and the specific native plants and habitat each species depends upon. Written with an ecological lens, this richly-illustrated book details wasp diversity and has full-page profiles for each wasp species that include identification tips, geographic range maps, biology, prey, natural history and habitat. Five introductory chapters cover wasp taxonomy, nesting biology, prey-hunting behaviors, diet, anatomy, as well as wasp habitat enhancement and management, and the ecosystem services provided by wasps-insect pest population control and pollination. Profiles of each wasp species comprise the major part of the book and are organized by family, showcasing twelve families and sixty-eight wasp genera. Also included are eastern North American regional native plant guides, tips on wasp observation, and over 1000 stunning photographs. This is an essential book for conservationists, naturalists, insect enthusiasts, biologists, nature photographers, native plant aficionados, and anyone interested in beneficial insects and pollinators.

Ladies' Home Journal and Practical Housekeeper

Stephenson's volume is a wonderful resource for parents seeking thoughtful, sound advice on raising well-grounded children in a chaotic world. Presenting Montessori principles in clear and eloquent prose, Stephenson's legacy will be a tremendous service to generations of parents to come. -Angeline Lillard, PhD, Professor of Psychology, U. of Virginia, author of *Montessori, The Science behind the Genius*

Raising Children with Roots, Rights & Responsibilities

The definitive edition of Joel Sternfeld's seminal *American Prospects*, featuring new photographs, and a revised format and cover First published in 1987 to critical acclaim, the seminal *American Prospects* has been likened to Walker Evans' *American Photographs* and Robert Frank's *The Americans* in both its ability to visually summarize the zeitgeist of a decade and to influence the course of photography following its publication. This definitive edition of *American Prospects* contains 12 new pictures, most of which have neither been published nor exhibited. Freed from the size constraints of previous editions, Sternfeld includes portraits and portraits in the landscape that elucidate the human condition in America. The result is a more complex and rounded view of American society that strongly anticipates Sternfeld's *Stranger Passing* series (1985-2000) and links the two bodies of work. A major figure in the photography world, Joel Sternfeld was born in New York City in 1944. He has received numerous awards,

including two Guggenheim fellowships, a Prix de Rome and the Citibank Photography Award. Sternfeld's books published by Steidl include *American Prospects* (2003), *Sweet Earth* (2006), *Oxbow Archive* (2008), *First Pictures* (2012) and *Landscape as Longing* (2016) with Frank Gohlke.
