After decades of turbulence and acute crises in recent years, how can we build a better future for Higher Education? Thoughtfully edited by Laura Czerniewicz and Catherine Cronin, this rich and diverse collection by academics and professionals from across 17 countries and many disciplines offers a variety of answers to this question. It addresses the need to set new values for universities, trapped today in narratives dominated by financial incentives and performance indicators, and examines those “wicked” problems which need multiple solutions, resolutions, experiments, and imaginaries. This mix of new and well-established voices provides hopeful new ways of thinking about Higher Education across a range of contexts, and how to concretise initiatives to deal with local and global challenges. In an unusual and refreshing way, the contributors provide insights about resilience tactics and collective actions across different levels of higher education using an array of styles and formats including essays, poetry, and speculative fiction. With its interdisciplinary appeal, this book presents itself as a provocative and inspiring resource for universities, students, and scholars. Higher Education for Good courageously offers critique, hope, and purpose for the practice and the trajectory of Higher Education.

Organizational Innovation in the Digital Age Infinite Study

It is a proud feeling for me to publish and present the first edition of my book, *India At A Glance*. The book is being published through reputed publisher Partridge India. The book, which has hit the stands, has been written with an exceptionally optimistic outlook about India. There is no ill-intention to undermine or give any sweeping opinion about any Government or individual. If anything is allowed to happen that is due to circumstances prevailing at a particular time and customary ethical and moral values of countrymen. The issue raised and discussed in this book have been haunting me since long. I have tried to highlight all

issues facing the country so that enlightened public may rise to the occasion and help resolve them to make India a country free from evils like corruption, nepotism, poverty, population explosion, communal intolerance, unemployment and under-employment etc. The problem of the 20th century have continued in the current century as well. The endeavour of this book is to educate the students of all the educational institutions and disciplines, including competitive examinations, and persons who are interested in understanding the social, economic and political problem of India.

Practical Information Security Kluwer Law International B.V.

These proceedings are the fifth in the series *Traffic and Granular Flow*, and we hope they will be as useful a reference as their predecessors. Both the realistic modelling of granular media and traffic flow present important challenges at the borderline between physics and engineering, and enormous progress has been made since 1995, when this series started. Still the research on these topics is thriving, so that this book again contains many new results. Some highlights addressed at this conference were the influence of long range electric and magnetic forces and ambient fluids on granular media, new precise traffic measurements, and experiments on the complex decision making of drivers. No doubt the “hot topics” addressed in granular matter research have diverged from those in traffic since the days when the obvious analogies between traffic jams on highways and dissipative clustering in granular flow intrigued both communities alike. However, now just this diversity became a stimulating feature of the conference. Many of us feel that our joint interest in complex systems, where many simple agents, be it vehicles or particles, give rise to surprising and fascinating phenomena, is ample justification for bringing these communities together: *Traffic and Granular Flow* has fostered cooperation and friendship across the scientific disciplines.

The proposals for national policy statements on energy Routledge

Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa. In Kenya the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving

the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya.

Challenges in Early Years and Primary Education Springer Science & Business Media

While the general agreement in education remains that the more senses involved in learning, the better we learn; the question still remains as to the distinction between the education of children and the education of adults. *Handbook of Research on Teaching and Learning in K-20 Education* provides well-rounded research in providing teaching and learning theories that can be applied to both adults and children while acknowledging the difference between both. This book serves as a comprehensive collection of expertise, research, skill, and experiences which will be useful to educators, scholars, and practitioners in the K-12 education, higher education, and adult education field.

Monthly Weather Review University of Pennsylvania Press
Stop making a living and start making a life with *The New Retirementality™* In 2000, when top financial philosopher and bestselling author Mitch Anthony first presented a new way of thinking about retirement, it was novel, and many critics didn't buy into it. Originally written to get the attention of baby boomers, Mitch ended up starting a revolution by showing us that

everything we had read about retirement was wrong—we needed a "new retirementality." Fast-forward to today, when most of us are facing a very different retirement: fewer pensions, escalating healthcare costs, and inadequate savings. For many of us, retirement may never happen, or it will take place much later than we expected. Far from being full of doom and gloom, *The New Retirementality, Fifth Edition*, offers a message of hope, along with a roadmap for navigating the choppy waters of retirement planning. While most books focus on Return on Investment, Mitch shows us that Return on Life™—living the best life possible with the resources we have—is a more fulfilling and achievable approach. New to this edition: The latest research and studies, as well as a discussion of Life-Centered Planning™—a unique approach to financial and retirement planning, focused on individual goals and needs instead of the outmoded one-size-fits-all approach. Explores the role of purpose in retirement planning, including the expanding role of work in retirement, and why it can take three or four tries to get retirement right. Features the New Retirementality Profile, the ROL Index for helping you analyze and reflect on how you are using your money toward improving your life, and worksheets to help you get organized. Filled with engaging anecdotes, practical advice, and inspirational suggestions, this book will motivate you to rethink what retirement means—and put you in a better position to enjoy the new retirementality you deserve.

Progress in Physics, vol. 2/2017 CRC Press

In the face of the current confusion about the use of arts 290 and 291 TFEU, there is need of further development of the theory of legislative delegation to the EU Commission. This timely book approaches this question from a practical perspective with a detailed examination of how the legislator uses delegated and implementing mandates in different fields of EU law. Offering an analysis of legislative practice and providing concrete evidence of how articles 290 and 291 TFEU are actually handled, it offers new insight into potential developments in EU administrative law.

Education at a Glance 2021 OECD Indicators Taylor & Francis
This incisive book provides a timely and magisterial analysis of offshore wind licensing processes and their regulation from a global perspective. It not only explores the concept of licensing and the governance frameworks and backgrounds in which licensing rules are developed, but also looks at the crucial legal

challenges facing the licensing of offshore wind farms that regulators, legislatures, operators, and legal practitioners are likely to encounter.

Offshore Wind Licensing Routledge

Education at a Glance is the authoritative source for information on the state of education around the world. The 2021 edition includes a focus on equity, investigating how progress through education and the associated learning and labour market outcomes are impacted by dimensions such as gender, socio-economic status, country of birth and regional location.

Plotkin's Vaccines, E-Book John Wiley & Sons

In the aftermath of recent multiple leaks such as the Panama Papers, the Swiss leaks, the Lux leaks, and the Bahama leaks, this book offers an interesting view on the underlying conflicting interests that impede the adoption of more effective legislation to stop money laundering by way of the financial system. The central position of the book is that the declared goals underlying the criminalization of money laundering have not been fulfilled. The effectiveness of the anti-money laundering regime in Germany is assessed by examining the indirect effects, collateral consequences, and positive interpretations of the law in action and of the law inaction; reducing the issue to a question of symbolic effectiveness does not reflect the complexity of the matter. What is demonstrated, is that the goals attributed to the regime were too ambitious, and that a lower degree of effectiveness has been accepted in order to balance the inherent political, economic and financial conflicting interests. Unlike other volumes focusing on this issue, this book deals with the implementation of the legislation and the consequences thereof, and is primarily aimed at legal sociologists, sociology of law researchers, criminal lawyers, criminologists with an interest in white collar crime and political scientists studying measures against illicit financial flows and the concrete implementation of anti-money laundering laws. The book will be of interest to both international policymakers and consultants as well as their counterparts in Germany for instance working on improving the instruments to fight organized crime and prevent the financing of terrorism through money laundering. The complexity of the anti-money laundering regime and all the variables are exhaustively and critically reviewed in the assessment, thereby providing complete instructions for future legislative steps. The case study

regarding the situation in Germany maximizes readers' insights into concrete effects of the implementation of international anti-money laundering standards at a national level, and the opinions of professionals working in the field and of experts on the law-making process are also illuminating. Moreover, the book equips non-German speakers with the information needed to deal with the extensive German legal scholarly production on article 261 of the German criminal code and the current internal political debate on the matter. Verena Zoppei is a Fellow Researcher at the International Security Division of the German Institute for International and Security Affairs in Berlin. Specific to this book: • Broadens your understanding of the complexity of the anti-money laundering regime • Provides complete instructions for future legislative steps • Offers a qualitative and multidisciplinary approach of the money laundering offence • Also equips non-German readers/speakers with a handle on the extensive German legal scholarly production on article 261 of the German criminal code This is Volume 12 in the International Criminal Justice Series *Federal Register* The Stationery Office

ÔLots has changed in Eastern Europe in the past quarter-century and the new edition of this major study of the region sets out these changes in directions for the better and for the worse. Ò Ò Richard Rose, University of Strathclyde, UK ÔThis Handbook offers a historically informed, systematic account of the political development in Central and Eastern Europe. Two chapters lay out a framework for comparison. 26 specialists provide analyses for 19 countries. In an appendix, each of these country chapters documents election results, government composition, the electoral system, and the constitutional framework. The concluding chapter synthesizes the major results. The Handbook is the most comprehensive source for an up-to-date analysis of all Central and Eastern European countries within the sphere of influence of the European Union. It is a Ômust haveÔ for students and scholars interested in how to evaluate the state of democracy in this region of the globe. Ò Ò Hans-Dieter Klingemann, New York University Abu Dhabi, UAE and Social Science Research Center Berlin, Germany This third edition of *The Handbook of Political Change in Eastern Europe* provides an authoritative and thorough analysis of the political changes, which have occurred in Central and Eastern Europe since the demise of communism. It offers an historical, comparative perspective of the region and focuses on

the social consequences of the democratisation process. The country-specific chapters are written by scholars with well-documented area expertise on their respective cases: Estonia, Latvia, Lithuania, Poland, The Czech Republic, Slovakia, Hungary, Slovenia, Romania, Bulgaria, Croatia, Bosnia, Serbia, Montenegro, Macedonia, Albania, Ukraine, Moldova, and Georgia. Each chapter includes detailed examinations of elections, the formation of governments, electoral systems and constitutional arrangements. These in-depth and up-to-date analyses are supplemented by conclusions on the party systems and emerging political structures in the region as a whole, as well as the consolidation of democracy in a post-communist setting. The revised and expanded version of *The Handbook of Political Change in Eastern Europe* provides a state-of-the art companion, which will be indispensable for students and scholars in the social sciences including political science, comparative politics, European studies and political history, as well as for policy makers and practitioners.

Bit-Interleaved Coded Modulation Springer

From the latest vaccination evidence, recommendations, and protocols . . . to new vaccine development and the use of vaccines in reducing disease, Plotkin's *Vaccines*, 8th Edition, covers every aspect of vaccination. Now completely revised and updated from cover to cover, this award-winning text continues to provide reliable information from global authorities, offering a complete understanding of each disease, as well as the latest knowledge of both existing vaccines and those currently in research and development. Described by Bill Gates as "an indispensable guide to the enhancement of the well-being of our world," Plotkin's *Vaccines* is a must-have reference for current, authoritative information in this fast-moving field. - Contains all-new chapters on COVID-19, vaccine hesitancy, and non-specific effects of vaccines, as well as significantly revised content on new vaccine technologies such as mRNA vaccines, emerging vaccines, and technologies to improve immunization. - Presents exciting new data on evolution of adjuvants across the centuries, dengue vaccines, human papillomavirus vaccines, respiratory syncytial virus vaccines, tuberculosis vaccines, and zoster vaccines. - Provides up-to-date, authoritative information on vaccine production, available preparations, efficacy and safety, and recommendations for vaccine use, with rationales and data on the

impact of vaccination programs on morbidity and mortality. - Provides complete coverage of each disease, including clinical characteristics, microbiology, pathogenesis, diagnosis, and treatment, as well as epidemiology and public health and regulatory issues. - Keeps you up to date with information on each vaccine, including its stability, immunogenicity, efficacy, duration of immunity, adverse events, indications, contraindications, precautions, administration with other vaccines, and disease-control strategies. - Covers vaccine-preventable diseases, vaccine science, and licensed vaccine products, as well as product technologies and global regulatory and public health issues. - Analyzes the cost-benefit and cost-effectiveness of different vaccine options. - Helps you clearly visualize concepts and objective data through an abundance of tables and figures. - Enhanced eBook version included with purchase. Your enhanced eBook allows you to access all of the text, figures, and references from the book on a variety of devices.

Metrology for Inclusive Growth of India CRC Press

The effective delivery of primary care requires the good working of a multi-professional team who provide that care. This accessible and concise text explores the ways in which primary care teams can collaborate well to advance the quality of clinical care and enhance collaborative working across the healthcare system as a whole. Taking a workbook approach, and including examples, narratives, case histories and further reading, *Collaborative Practice in Primary and Community Care* brings together theory and good practice to offer the reader viable models for achieving excellence. Addressing specific challenges to practising collaboratively throughout, it contains chapters exploring the contemporary context of primary care, collaboration with patients, collaboration between different professional groups, collaboration amongst organisations, and the respective roles of education and technology in promoting collaboration. Written by a multi-professional selection of experienced authors, practitioners and educators, this textbook is designed for a wide audience of healthcare professionals with an interest in primary care.

India at a Glance Routledge

This book describes the significance of metrology for inclusive growth in India and explains its application in the areas of physical-mechanical engineering, electrical and electronics,

Indian standard time measurements, electromagnetic radiation, environment, biomedical, materials and Bhartiya Nirdeshak Dravyas (BND®). Using the framework of "Aswal Model", it connects the metrology, in association with accreditation and standards, to the areas of science and technology, government and regulatory agencies, civil society and media, and various other industries. It presents critical analyses of the contributions made by CSIR-National Physical Laboratory (CSIR-NPL), India, through its world-class science and apex measurement facilities of international equivalence in the areas of industrial growth, strategic sector growth, environmental protection, cybersecurity, sustainable energy, affordable health, international trade, policy-making, etc. The book will be useful for science and engineering students, researchers, policymakers and entrepreneurs.

Trust, Accountability and Capacity in Education System Reform Edward Elgar Publishing

This unique textbook seeks to promote students' critical and analytical skills and to provide a teacher-friendly resource featuring: in-depth scholarly introductions to each chapter, multiple questions for discussion and reflection, and an extensive bibliography and annotated filmography.

Researching Domestic Abuse and Sexual Violence Edward Elgar Publishing

This open access book highlights knowledge and expertise in Urban Water Demand Management (WDM) in ASEAN through comprehensive literature review and analysis, as well as stakeholder consultations. It documents urban WDM policies, initiatives, and practices that have demonstrated effective implementation outcomes across various contexts and which are expected to be relevant for cities in ASEAN. A WDM typology developed for this book identifies four key WDM measures, namely: water losses, economic instruments, non-price mechanisms, and alternative water reuse systems in the ASEAN context. Case illustrations of their effective implementation in different ASEAN cities are also included.

The Right of States to Regulate in International Investment Law Taylor & Francis

The Aerospace Supply Chain and Cyber Security - Challenges Ahead looks at the current state of commercial aviation and cyber security, how information technology and its attractiveness to cyber attacks is affecting it, and the way supply chains have

become a vital part of the industry's cyber-security strategy. More than ever before, commercial aviation relies on information and communications technology. Some examples of this include the use of e-tickets by passengers, electronic flight bags by pilots, wireless web access in flight, not to mention the thousands of sensors throughout the aircraft constantly gathering and sharing data with the crew on the ground. The same way technology opens the doors for speed, efficiency and convenience, it also offers the unintended opportunity for malicious cyber attacks, with threat agents becoming bolder and choosing any possible apertures to breach security. Supply chains are now being seriously targeted as a pathway to the vital core of organizations around the world. Written in a direct and informative way, *The Aerospace Supply Chain and Cyber Security - Challenges Ahead* discusses the importance of deeply mapping one's supply chain to identify risky suppliers or potential disruptions, developing supplier monitoring programs to identify critical suppliers, and identifying alternative sources for IT/ICT products or components, to name a few of the necessary actions to be taken by the industry. *The Aerospace Supply Chain and Cyber Security - Challenges Ahead* also discusses the standardization of communications platforms and its pitfalls, the invisible costs associated with cyber attacks, how to identify vulnerabilities of the supply chain, and what future scenarios are likely to play out in this arena. For those interested in the many aspects of cyber security, *The Aerospace Supply Chain and Cyber Security - Challenges Ahead* is a must-read.

The Aerospace Supply Chain and Cyber Security John Wiley & Sons

Vacuum technology has enormous impact on human life in many aspects and fields, such as metallurgy, material development and production, food and electronic industry, microelectronics, device fabrication, physics, materials science, space science, engineering, chemistry, technology of low temperature, pharmaceutical industry, and biology. All decorative coatings

used in jewelries and various daily products—including shiny decorative papers, the surface finish of watches, and light fixtures—are made using vacuum technological processes. Vacuum analytical techniques and vacuum technologies are pillars of the technological processes, material synthesis, deposition, and material analyses—all of which are used in the development of novel materials, increasing the value of industrial products, controlling the technological processes, and ensuring the high product quality. Based on physical models and calculated examples, the book provides a deeper look inside the vacuum physics and technology.

Globalizing Employment Relations American Bar Association
The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Handbook of Research on Teaching and Learning in K-20 Education Edward Elgar Publishing

Due to the ongoing recent expansion of public interest issues worldwide, the state's right to regulate has been recaptured as a prominent concept in international investment law. The fair and equitable treatment (FET) standard provision in the text of an international investment agreement (IIA) has become a detailed clause clarifying the specific obligations of a state towards an investor under the FET standard. However, striking the right balance between the interests of host states and investors in these new treaty formulations has proved to be challenging. This

book greatly clarifies the field by offering the in-depth analysis of the application of the state's right to regulate in relation to FET standard provisions in IIAs and to decisions by arbitral tribunals in FET cases. Recognising that the role of tribunals is to balance the state's public interests and the interests of the investor when interpreting and applying the FET standard, the author pursues such seminal issues and topics as the following: the legitimacy of the objective of the state's measure; obligations and responsibilities of investors towards a host state; the nature and impact of a change to a national regulatory framework; special economic and sociopolitical circumstances in a host state; and due diligence and risk assessment as a condition for the protection of an investor's legitimate expectations. Multiple IIAs concluded by the OECD Member States, as well by Russia and China between the developing countries, and the prominent investment law cases on the FET standard are examined in detail. The analysis pays particular attention to how investment jurisprudence in FET cases has been reflected in such new IIAs as the Comprehensive Economic and Trade Agreement between the European Union (EU) and Canada (CETA), the EU-Vietnam FTA and the EU-Singapore FTA. These case studies demonstrate the evolution of the IIAs' FET standard provisions and how they balance the application of the FET standard and the state's right to regulate. Suggestions are provided for drafting formulations of the FET standard that can contribute to achieving such a balance. In the clear light it sheds on the legal conditions under which states may regulate in the public interest and its contribution to the reforms that are currently taking place in the field of international investment law, this book constitutes an exemplary framework to evaluate investment decisions on the FET standard and the right to regulate. It is sure to prove extremely useful for practitioners who work on investment cases, policymakers involved in negotiating and drafting of IIAs, policy advisors of governmental and non-governmental organisations and academics in international investment law.
