The American Business Encyclopædia and Legal Adviser John Wiley & Sons

Law and the Built Environment is a core textbook for all students undertaking compulsory law modules on construction, real estate and property management programmes. This single text provides an accessible introduction to the many areas of law studied by aspiring built environment professionals. Written by a team of lecturers with many years' teaching experience in these areas, key principles of English law are placed in their relevant professional context and clearly explained in exactly the right level of detail for success in the modules studied. The book also focuses in greater depth on some specialist areas of built environment professional practice, including construction contracts, health and safety, rent review, dilapidations, and lease renewals. It provides an essential resource for students studying for qualifications leading to professional membership of the Royal Institution of Chartered Surveyors (RICS) or the Chartered Institute of Building (CIOB). It caters primarily for students studying these subjects at

bachelor's degree level, but will also be suitable for students on programmes at HNC and HND levels, as well as those undertaking professional examinations. It will also provide introductory reading for students undertaking master's level programmes, and particularly for the increasing numbers of graduates from other disciplines who are now studying on RICS-accredited master's degree conversion programmes.

Encyclopædia of the Laws of England with Forms and Precedents by the Most Eminent Legal Authorities John Wiley & Sons

Building Law Encyclopaedia is a concise and authoritative reference, providing information in reasonable depth on an extensive number of legal terms, principles, phrases and issues that are commonly encountered in the construction industry. Most standard contracts are referred to, including the current suite of JCT Contracts, SBC, IC, ICD, MW, MWD, as well as ACA, PPC 2000, GC/Works/1 and NEC. In addition, some contracts which are theoretically out of date, but which are still in common use, are also covered. With over 1050 entries and numerous cross references, it will be an invaluable reference for architects, quantity surveyors, project managers and contractors. With detailed reference to appropriate case law and legislation, construction lawyers will also find it of considerable value in the course of their work.

An Encyclopædia of Architecture John Wiley & Sons

Revised edition of: JCT minor works building contracts 2005 / David Chappell. 4th ed. 2006.

Encyclopedia of Building and Construction Terms Prentice Hall

Throughout its many editions, *The Architect in Practice* has remained a leading textbook used in the education of architects. While the content of the book has developed, the message and philosophy has remained constant: to provide students of architecture and young practitioners with a readable guide to the profession, outlining an architect's duties to their client and contractor, the key aspects of running a building contract, and the essentials of management, finance and drawing office procedure. The eleventh edition follows in that tradition. The text has been brought up to date to ensure it follows the new RIBA Plan of Work 2013 as the guide to the architect's workflow. In addition, a number of changes to standard forms of contract were made with the publication of the JCT 2011 suite of contracts, and the RIBA Standard Form for the Appointment of an Architect 2010 (2012 Revision). These new forms are fully covered. In addition, the opportunity has been taken to reorganise the layout so that the content flows in a way that is more consistent with current architectural practice, and to deal with the increasing use of BIM. The eleventh edition of *The Architect in Practice* continues to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession.

The Encyclopædia Britannica Building Law Encyclopaedia

Books about construction contracts tend to be dense and wordy, but what most architects, quantity surveyors, project managers, builders and employers are looking for is an easily navigable, simple guide to using a contract, written in plain language. The JCT Standard Building Contract 2011 is an uncomplicated book about a complex and commonly used contract. It straightforwardly and concisely sets out exactly what the contract requires in various circumstances, as far as possible without legal jargon and without assuming any particular legal or contractual expertise from the reader. It explains, often from first principles, exactly what is meant by a contract and why certain clauses, such as extension of time clauses or liquidated

damages clauses are present and more importantly, what they mean. The book is divided into many chapters, each with many sub-headings, to make it easy to read and to help readers to find relevant explanations quickly. Tables and flowcharts are used to ensure clarity and most chapters include a section dealing with common problems. Covers the recently issued JCT Standard Building Contract 2011 Straightforward, concise, and as far as possible free of legal jargon. Sets out exactly what the contract requires in various circumstances. Includes many tables and flowcharts to ensure clarity. *A Complete Hand Book of All Matters Ordinarily Coming Before Judges, Attorneys, Justices of the Peace ...
