process was used until about the 1880's

when it was slowly replaced by the well

known "blueprint" cyanotype process.

Most contemporary alternative process

photographers who use the platinotype

process are aware that the George

Eastman House (GEH) in Rochester has,

among thousands of other important

photographs, the first platinotype

photograph ever made in the US. The

photograph was made in New York in 1877

during the younger Willis' visit to the U.S.
