### Steps 2 and 3 Springer

Together with Consulting Editor Dr. William Rayburn, Dr. Curtis Lowery has put together a unique issue that discusses the telemedicine in obstetrics and gynecology. Expert authors have contributed clinical review articles on the following topics: What is telehealth and what do I need to know about it; Licensing, reimbursement and regulatory issues in the delivery of telemedicine and connected health; Telemedicine for low-risk obstetrics; Telemedicine In high-risk obstetrics; Telemedicine for gynecology; Telemedicine and Connected Health for GYN oncology; Telemedicine and connected health for contraception; Maternal Health and monitoring devices for obstetrics and gynecology; Telepsychiatry and drug treatment in obstetrics; Telemedicine as a method to reduce perinatal mortality; and Telemedicine and distance learning for OB/GYN provider education. Readers will come away with the information they need to incorporate telemedicine into their care of gynecologic or obstetric patients.

### **Gynecologic Tumor Board: Clinical Cases in Diagnosis and Management of Cancer of the Female Reproductive System** Elsevier Health Sciences

Includes free CD-ROM! Completely revised and updated for 2009, the Physicians' Cancer Chemotherapy Drug Manual is an up-to-date guide to the latest information on standard therapy and recent advances in the field. Written by world-class experts in the clinical cancer therapeutics, this essential reference provides a complete, easy-to-use catalogue of over 100 drugs and commonly used drug regimens both on- and off-label for the treatment of all the major cancers. Special features: Features new drugs: Bendamustine, Ixabepilone, and Nilotinib Revised to reflect rapid advances in the field, incorporating new drug and treatment strategies diagrams of drug structures and pathways for each agent Offers a comprehensive discussion of clinical pharmacology, special considerations, indications, and dosages Covers toxicity and drug-drug interactions Includes a section on chemotherapy regimens for all the major cancers Provides an overview of the basic principles of cancer drug therapy Contains an easy to load and use CD-ROM version PDA version of Physicians' Cancer Chemotherapy Drug Manual also available!

*Clinical Scenarios in Surgical Oncology* National Academies Press

Completely revised and updated for 2014, the Physicians' Cancer Chemotherapy Drug Manual 2014 is an up-to-date guide to the latest information on standard therapy and recent advances in the field. Written by world-class experts in clinical cancer therapeutics, this essential reference provides

a complete, easy-to-use catalog of over 100 drugs and commonly used drug regimens both on- and off-label for the treatment of all the major cancers. Special features: Revised to reflect rapid advances in the field A specific chapter focused on profiling antiemetic drug and antiemetic treatment regimens. Diagrams of drug structures and pathways for many of the agents. Offers a comprehensive discussion of clinical pharmacology, special considerations, indications, and dosages. Covers toxicity and drug drug interactions. A section on chemotherapy regimens for all major cancers. Provides an overview of the basic principles of cancer drug therapy."

**Physicians' Cancer Chemotherapy Drug Manual 2016** John Wiley & Sons

"Ovarian Cancer: A Clinical and Translational Update" embraces the most recent advances in diagnosis and treatment of ovarian cancer. With the valuable collaboration of international experts in the field, this book is intended to provide the readership with a comprehensive update in the subject of epithelial ovarian cancer.

**Objectives:** Women in low- and middle-income countries (LMICs) have higher rates of cervical cancer and comparable rates of other gynecologic cancers when compared to women in high-income countries, yet the majority of LMICs have few gynecologic oncologist and lack formal training programs. The management of gynecologic cancers must be adapted to available resources and to potential differences in disease presentation and biology in LMICs. **Methods:** We developed an adaptable but universal curriculum for training in low resource settings. We supported collaborations between high- or middle-income country academic gynecologic oncologists and local mentors and trainees to either launch or strengthen formal gynecologic oncology fellowships. Milestones include: progression through the curriculum, clinical training with local and international mentors, regular Project ECHO tumor boards, logging of cases and educational activities, and observerships at the international mentor's institution. Trainees sit for a final examination; those who pass are awarded a certificate of completion from IGCS. **Results:** In 2019, IGCS is supporting 12 collaborative fellowships. Thirty fellows are in training, supported by 35 international mentors and 24 local mentors, and they have logged 1758 surgical procedures to date. Four major textbooks and the ACOG Prolog series have been donated to fellows. Forty-seven Project ECHO tumor boards were held in 2018; to date IGCS members have volunteered over 1500 hours to ECHO Tumor Boards for fellow training. Fellows have traveled to host institutions in North America, Europe and Asia, and have attended international professional society meetings. **Conclusions:** The IGCS Global Curriculum is a novel model of sustained collaboration yielding academic quality, sub-specialty surgical training in resource limited settings.

*Ovarian Cancer* Jones & Bartlett Learning

Includes free CD-ROM! Completely revised and updated for 2010, the Physicians' Cancer Chemotherapy Drug Manual is an up-to-date guide with the latest information on standard therapy and recent advances in chemotherapy. Written by world-class experts in the clinical cancer

therapeutics, this essential reference provides a complete, easy-to-use catalogue of over 100 drugs and commonly used drug regimens - both on-and off-label - or the treatment of all major cancers. Special features include: \* New drugs: Degarelix, Everolimus, and Nelarabine \* Revised to reflect rapid advances in the field, incorporating new drug and treatment strategies \* Diagrams of drug structures and pathways for each agent \* Offers a comprehensive discussion of clinical pharmacology, special considerations, indications, and dosages \* Covers toxicity and drug-drug interactions \* Includes a section on osteogenic sarcoma and chemotherapy regimens for all major cancers \* Provides an overview of the basic principles of cancer drug therapy \* Contains an easy to load and use CD-ROM version PDA version of Physicians' Cancer Chemotherapy Drug Manual also available!

Ovarian Cancers Demos Medical Publishing

SHARPEN YOUR CRITICAL THINKING SKILLS AND IMPROVE PATIENT CARE Experience with clinical cases is key to mastering the art and science of medicine and ultimately to providing patients with competent clinical care. Case Files®: Obstetrics & Gynecology provides 60 true-to-life cases that illustrate essential concepts in obstetrics and gynecology. Each case includes an easy-to-understand discussion correlated to key concepts, definitions of key terms, clinical pearls, and USMLE®-style review questions to reinforce your learning. With Case Files®, you'll learn instead of memorize. · Learn from 60 high-yield cases, each with board-style questions · Master key concepts with clinical pearls · Cement your knowledge with 25 new integrated challenge questions · Polish your approach to clinical problem solving and to patient care · Perfect for medical students, physician assistant students, nurse midwife and nurse practitioner students

Building a Clinical Practice Lippincott Williams & Wilkins

Mozambique has a high prevalence of gynecologic cancers .Does not have a trained gynecologic oncologist or a formal training program in gynecologic oncology. There are challenges associated with building a new training program in this setting. The International Gynecologic Cancer Society (IGCS) Gynecologic Oncology Global Curriculum & Mentorship Program is a two-year training program to train gynecologists in gynecologic oncology in countries without a formal training program. Training includes self-study, assessments, regular in-country surgical training with IGCS international mentors who travel from Brazil and the US. The program uses the Project ECHO (Extension for Community HealthCare Outcomes), telementoring model for multidisciplinary monthly tumor boards. Fellows present cases and discuss management with international mentors, and receive didactic lectures and record clinical cases in REDCap, a web database application. The Mozambican fellows also travel to Brazil to learn best practices for diagnosis, and management of women with gynecologic cancers in different resource settings. Prior to this program there were limited options for surgical treatment of women with gynecologic tumors in Mozambique. Developing support and resources for a new training program in a busy hospital requires that fellows and mentors clearly explain the program and provide regular updates to supervisors, hospital and Ministry of Health leadership. The program should not adversely impact other hospital services. A senior gynecology faculty member serves as the local mentor and the three fellows in Mozambique developed strategies to work together, particularly in the operating room, to support each other. The international mentors has travelled to Mozambique 9 times and the fellows has travelled 2 times to

Brazil. The training model is multidisciplinary, and it took time to engage other specialities in the patient care. The program, initiated in 2017, has matured as administrative and resource challenges have been successfully met. In February 2020 the 3 fellows are expected to complete their training and become the first gynecologic oncologist of Mozambique. This program offers a unique opportunity to build a specialty training program with support from an international society and experienced clinicians and lays the foundation to develop a training program in Mozambique. Knowledge, surgical skills and patient care has improved. Patients with gynecologic cancers can now receive appropriate care locally, including surgery.

**The MD Anderson Manual of Medical Oncology** Springer

This textbook combines essential information on clinical cancer medicine with a guide to the latest advances in molecular oncology and tumor biology. Providing a systematic overview of all types of solid tumors, including epidemiology and cancer prevention, genetic aspects of hereditary cancers, differential diagnosis, typical signs and symptoms, diagnostic strategies and staging, and treatment modalities, it also discusses new and innovative cancer treatments, particularly targeted therapy and immunotherapy. Expert commentaries at the end of each chapter highlight key points, offer insights, suggest further reading and discuss clinical application using case descriptions. This textbook is an invaluable, practice-oriented tool for medical students just beginning their clinical oncology studies, as well as for medical oncology residents and young professionals.

**UCSF General Catalog** McGraw Hill Professional

This volume presents the actual case studies of 157 patients who were discussed at recent tumour board conferences. The case presentations follow the structure of the tumour board conference, in which an interdisciplinary group of physicians examined a specific case, explored various treatment options, and reached a consensus on treatment. Each case presentation includes comments from physicians representing diverse specialities and treatment approaches.

*Physicians' Cancer Chemotherapy Drug Manual 2010* Springer Nature

Written by world-class experts in clinical cancer therapeutics, *Physicians' Cancer Chemotherapy Drug Manual 2018* provides a complete, easy-to-use catalog of over 100 drugs and commonly used drug regimens—both on- and off-label—for the treatment of all the major cancers.

Physicians' Cancer Chemotherapy Drug Manual 2015 Jones & Bartlett Publishers

Rare gynecological cancers kill all too commonly Gynecological cancer is a frightening prospect for women. It is terrifying also for physicians who need, but often can't find, guidance on how to investigate and appropriately treat the tumors. Rare cancers provide greater challenges as information can be harder to find and more difficult to verify. *Rare Gynecologic Cancers: Diagnosis and Management* brings together all you need to know on these life-threatening diseases. Straightforward summaries of pathophysiologic processes lead to the investigations that will improve your diagnostic accuracy. This provides the basis for you to identify effective treatment strategies for your patients. Written by a world-leading team of Editors and Authors and covering cancers of the • Ovaries • Uterus • Vulva • Vagina • Cervix *Rare Gynecologic Cancers: Diagnosis and Management* will guide you to the best life-saving treatment for your patients.

Physicians' Cancer Chemotherapy Drug Manual 2017 Jones & Bartlett Publishers

Comprehensive and practice-oriented, the fully updated 3rd Edition of this easy-to-use text covers

the full range of obstetric and gynecologic pathology, including information on treatment and patient management. Written largely by the pathology and clinical faculty at Harvard's Brigham and Women's Hospital, it covers the most up-to-date information available in the field, including molecular genetics and diagnostics. Drs. Christopher P. Crum and Marisa R. Nucci are joined by new editors Scott R. Granter, Brooke E. Howitt, Mana M. Parast, and Theonia K. Boyd, to provide complete, beautifully illustrated coverage of both neoplastic and non-neoplastic disorders of the female genital system, ideal for improving pathological diagnosis. Provides distinct diagnostic/differential diagnostic criteria for any potential obstetric/gynecologic specimen encountered in practice. Features more than 2,250 full-color images, key points at the end of each chapter, and an appendix with commonly used ICD-10 codes Covers topics not often found in gynecologic pathology textbooks, such as vulvodynia, and diseases of the anus. Approaches topics from a practice-oriented point of view, beginning with clinical presentation and progressing through histopathology, differential diagnosis, and treatment for each disorder. Emphasizes new practice issues and their biologic basis including approaches to vulvar, cervical and endometrial precursors as well as the underpinnings of cervical, endometrial and ovarian cancer. A comprehensive look at mesenchymal neoplasia, including not only lower genital tract and uterus but also the retroperitoneum.

#### A Case Study Approach Jones & Bartlett Learning

This unique case-based review of surgical oncology offers excellent preparation for oral board examinations, which emphasize both general knowledge and case management. The book presents 91 cases structured to reflect the surgeon's decision-making process. Each case begins with a patient presentation and imaging studies or pathology results and proceeds through a series of decision points—differential diagnosis, requests for additional tests, diagnosis, surgical approach, discussion of potential pitfalls, and follow-up. Cases are grouped by organ system and each section ends with a treatment algorithm summarizing the decision points. Nearly 400 radiologic images and other relevant illustrations accompany the text.

#### Guideline and Case Reviews in Oncology Springer Nature

Tumor Board Review utilizes the knowledge and expertise of oncology specialists to enhance learning the practice of oncology. Each of the 32 chapters follows a uniform format: a concise summary of the epidemiology, risk factors, natural history, and pathology of each major organ-specific tumor type; an abbreviated display of the relevant staging (generally based on the American Joint Commission on Cancer [AJCC] Staging, 7th Edition); and several illustrative patient case summaries (representative of major stage categories of each tumor), each followed by an evidence-based case discussion which reviews the current guidelines and rationale for the diagnostic and therapeutic steps taken. Algorithms and decision tree graphics are used extensively to provide visual support of the decision process. The combination of case presentations and evidence-based management discussions make this volume a unique tool for keeping current with clinical guidelines and provides the reader with a clear understanding of applications of new information for use in daily practice. The case presentations and authoritative discussions make Tumor Board Review a valuable resource for board study and self-assessment. Features of Tumor Board Review Include: Comprehensive coverage of all areas of oncology Presentation of most recent

guidelines and management standards in concise, user-friendly format In-depth "tumor board" presentations showing clear clinical applications Special focus on indications and use of new drugs, and treatment of new side effects Extensive use of algorithms Color atlas section of pathology photomicrographs

#### **Avoiding Common Obstetrics and Gynecology Errors** Demos Medical Publishing

Completely revised and updated for 2011, the Physicians' Cancer Chemotherapy Drug Manual is an up-to-date guide to the latest information on standard therapy and recent advances in the field. Written by world-class experts in clinical cancer therapeutics, this essential reference provides a complete, easy-to-use catalog of over 100 drugs and commonly used drug regimens—both on- and off-label—for the treatment of all the major cancers. Special features: • Revised to reflect rapid advances in the field, incorporating treatment strategies and new drugs like Cabazitaxel, Ofatumumab, Pazopanib, and Pralatrexate • A specific chapter focused on profiling antiemetic drug and antiemetic treatment regimens • Diagrams of drug structures and pathways for each agent • Offers a comprehensive discussion of clinical pharmacology, special considerations, indications, and dosages • Covers toxicity and drug-drug interactions • A section on chemotherapy regimens for all major cancers • Provides an overview of the basic principles of cancer drug therapy • Contains an easy to load and use CD-ROM version

#### *The Challenges of Creating a Fellowship in Gynecologic Oncology in Mozambique, a Country with No Formal Training Program in Gynecologic Oncology* Jones & Bartlett Publishers

Written by two expert oncologists, specializing in female cancers, Dx/Rx: Gynecologic Cancer is a perfect pocket reference for all professionals involved in the care of women with gynecologic cancer. This handy, 136-page book provides comprehensive, up-to-date information on the epidemiology, symptoms, diagnosis, and management of malignancies of the ovaries, cervix, uterus, and fallopian tubes. Topics include a review of gynecologic tumors, detailed analysis on treatment strategies, and a discussion of past and current literature that has shaped the field. Presented in a concise, quick-reference format, Dx/Rx: Gynecologic Cancer is an essential guide for the care of women with malignancies of the reproductive system.

#### Uncommon Gynecologic Cancers Lippincott Williams & Wilkins

This book explains how telemedicine can offer solutions capable of improving the care and survival rates of cancer patients and can also help patients to live a normal life in spite of their condition. Different fields of application - community, hospital and home based - are examined, and detailed attention is paid to the use of tele-oncology in rural/extreme rural settings and in developing countries. The impact of new technologies and the opportunities afforded by the social web are both discussed. The concluding chapters consider eLearning in relation to cancer care and assess the scope for education to improve prevention. No medical condition can shatter people's lives as cancer does today and the need to develop strategies to reduce the disease burden and improve quality of life is paramount. Readers will find this new volume in Springer's TELe Health series to be a rich source of information on the important contribution that can be made by telemedicine in achieving these goals.

#### Physicians' Cancer Chemotherapy Drug Manual 2013 Jones & Bartlett Learning

This book provides an overview of the unique aspects related to a university based clinical practice.

The development of relationships with senior colleagues and referring providers, building multidisciplinary programs within an academic institution, financing of academic medicine, and issues specific to the speciality are discussed. Building a Clinical Practice aims to highlight the importance of developing a successful clinical practice in an academic setting and to help guide

readers through the challenges associated with that process. This book is relevant to senior surgical trainees and young surgical faculty who are facing the challenges associated with developing a clinical practice.
