An exiled man wonders if he should forsake his new life and risk returning to his homeland. A troubled girl seeks redemption for a terrible crime she has committed. A solitary tracker breaks an oath in order to communicate with an infamous, supernatural criminal. A vagabond thief chances leaving behind the world he knew for an unknown destiny. An unlikely cast of characters, they are thrown together by chance, or perhaps by fate, willingly embarking upon an eccentric wizard's mission to recover a magical stone: Raven's Heart. A piece of the "Stone of Undoing", Raven's Heart is deadly. Though the stone has the ability to unravel the very essence of magic, it brings Arcturus, Kariayla, Hawkwing, and Jinx together in a mission beyond individual ambition that could determine the fate of the world in which they live.

Appropriate for Supervision, Supervision Management, and Intro to Management. Supervision Today has earned a reputation of being the one of the most effective supervision books because it blends traditional and contemporary topics, as well as theories and experiential skills. Offering a three-tier learning system, it focuses on building

readers' knowledge, improving their comprehension and applying concepts directly to skill development. Known for its lively tone and four-color design, it captures the latest in supervision literature and includes cases to invigorate any lecture. This edition includes new information on contingent workforces, entrepreneurship, employee theft, work/life balance, IM, texting, and workplace diversity.

This third book in the GISDATA series focuses on the widespread use of geographical information systems GIS in European local government. The editors include a wide range of applications carried out by different professional groups, and offer the opportunity of studying the extent to which diffusion of innovations like GIS are sensitive to national issues such as cultural context, institutional setup and the availability of data.; The book answers key questions such as: what can be learnt from research on organizational behaviour in relation to technological innovation?; what are the classical features of the GIS diffusion process?; to what extent is the adoption and utilization of GIS facilitated - or impeded - by the organizational culture within which it takes place?; and what mechanisms can be applied to enhance the diffusion of GIS? The book covers aspects of diffusion in the following European countries: UK, France, Italy, Poland, Denmark, The Netherlands, Germany, Greece and Portugal.

Raven's Heart Haynes Manuals

"Chest pain can be terrifying. Many people panic, or hope that if they ignore it, it will go away. But angina must be taken seriously - and in addition to taking medical advice, it's important to find out what you can do about it, and what you can do to help yourself reduce the risk of a heart attack." "This book answers key questions for anyone worried about angina: What is it, and why is it happening? Does it mean I'm going to have a heart attack? What should I do when I have chest pain? How do I tell if it's serious?" "Living with Angina is also packed with useful advice about what you can do to deal with high cholesterol or high blood pressure, develop a sensible exercise program, and make crucial lifestyle changes that will help you live life to the full."--BOOK JACKET.
