Written by those in the know--exceptional nurse leaders in practice, education, and politics--this is a practical, "how-to" book written to help advanced students and nurse leaders develop health policy skills to advocate for patients from the bedside to the larger political arena. Co-published with the American Nurses Association (ANA), the book examines the pivotal role of nurses' involvement in health

policy and describes the requisite steps for facilitating policy change--from understanding the political system through activating a plan and beyond. It features the voices of a wide variety of nurse leaders who discuss policy work both locally and nationally through descriptive case histories. The book discusses those qualities and skill sets that are needed for advocacy at the bedside and other arenas where health policy is determined. It examines

the political system and opportunities for nurse involvement, and clarifies the process of identifying issues that need a policy solution.
