The Definitive Guide to Developing Organizational

Leaders: Easyread Large Bold Edition Routledge

Bertrand Russell defines power as the ability to produce intended effects. Robert Vecchio defines it as the ability to change the behavior of others. Dacher Keltner defines power as your capacity to make a difference in the world by influencing the states of other people. If Russell is right, then your every need, want, passion, cause, and ambition demands power. If Vecchio is right, then power inhabits every act of teaching, encouraging, parenting, storytelling, leading, and mentoring future leaders. If Keltner is correct, then my power changes your world, for better or worse. What if they're all right? What if power is all of the above? Then, at the very least, we'd all benefit from a better grasp of power.

Managing the Unmanageable Routledge

In *Don't Be Such a Scientist*, Randy Olson recounts the lessons from his own hilarious--and at times humiliating--evolution from science professor to Hollywood filmmaker, sharing the secrets of talking substance in an age of style. The key, he argued, is to stay true to the facts while tapping into something more primordial, more irrational--and ultimately more human. Now, in this second edition of his provocative and groundbreaking book, Olson builds upon the lessons and storytelling of *Don't Be Such a Scientist*, providing an epilogue to each chapter for the current times, and adding a fresh introduction and new chapter on the importance of

listening for science communicators (and beyond). *Don't Be Such a Scientist*, Second Edition is a cutting and irreverent manual to speaking out and making your voice heard in an age of attacks on science. Invaluable for anyone looking to break out of the boxes of academia or research, Olson's writing will inspire readers to "make science human"--and to enjoy the ride along the way. *Putting Theory into Practice* Wadsworth Publishing Company *Sharing Lives* explores the most important human relationships which last for the longest period of our lives: those between adult children and their parents. Offering a new reference point for studies on the sociology of family, the book focuses on the reasons and results of lifelong intergenerational solidarity by looking at individuals, families and societies. This monograph combines theoretical reasoning with empirical research, based on the Survey of Health, Ageing and Retirement in Europe (SHARE). The book focuses on the following areas: ● Adult family generations, from young adulthood to the end of life, and beyond ● Contact, conflict, coresidence, money, time, inheritance ● Consequences of lifelong solidarity ● Family generations and the relationship of family and the welfare state ● Connections between family cohesion and social inequality. *Sharing Lives* offers reliable findings on the basis of state-of-the-art methods and the best available data, and presents these findings in an accessible manner. This book will appeal to researchers, policymakers and graduate students in the areas of sociology, political science, psychology and economics.

The Paradox of Persuasion Routledge

Nothing is more important to business success than innovation . . . And here's what you can do about it on Monday morning with the definitive how-to book from the world's leading authority on innovation When it comes to innovation, Curt Carlson and Bill Wilmot of SRI International know what they are talking about—literally. SRI has pioneered innovations that day in and day out are part of the fabric of your life, such as: • The computer mouse and the personal computer interface you use at home and

work • The high-definition television in your living room • The unusual numbers at the bottom of your checks that enable your bank to maintain your account balance correctly • The speech-recognition system used by your financial services firm when you call for your account balance or to make a transaction. Each of these innovations—and literally hundreds of others—created new value for customers. And that's the central message of this book. Innovation is not about inventing clever gadgets or just "creativity." It is the successful creation and delivery of a new or improved product or service that provides value for your customer and sustained profit for your organization. The first black-and-white television, for example, was just an interesting, cool invention until David Sarnoff created an innovation—a network—that delivered programming to an audience. The genius of this book is that it provides the "how" of innovation. It makes innovation practical by getting two groups who are often disconnected—the managers who make decisions and the people on the front lines who create the innovations—onto the same page. Instead of smart people grousing about the executive suite not recognizing a good idea if they tripped over it and the folks on the top floor wondering whether the people doing the complaining have an understanding of market realities, Carlson and Wilmot's five disciplines of innovation focus attention where it should be: on the creation of valuable new products and services that meet customer needs. Innovation is not just for the "lone genius in the garage" but for you and everyone in your enterprise. Carlson and Wilmot provide a systematic way to make innovation practical, one intimately tied to the way things get done in your business. Teamwork isn't enough. Creativity isn't enough. A new product idea isn't enough. True innovation is about delivering value to customers. Innovation reveals the value-creating processes used by SRI International, the organization behind the computer mouse, robotic surgery, and domain names. Curt Carlson and Bill Wilmot show you how to use these practical, tested processes to create great customer value for your organization.
