remarkable thing human beings have built since the Pyramids. John Naughton's book intersperses wonderful personal stories with an authoritative account of where the Net actually came from, who invented it and why and where it might be taking us. Most of us have no idea how the Internet works, or who created it. Even fewer have any idea what it means for society and the future. In a

cynical age, John Naughton has not lost his capacity for wonder. He examines the nature of his own enthusiasm for technology and traces its roots in his lonely childhood and in his relationship with his father. A Brief History of the Future is an intensely personal celebration of vision and altruism, ingenuity and determination and, above all, of the power of ideas, passionately felt, to change

the world.

On the northern slope of the island of Serendipity is a small, wonderful kingdom called the Land of Later. In this kingdom there lived a young, beautiful princess who everyone simply called Princess. The castle was governed by the king's simple rules. One of those rules was that when you

woke in the morning, you cleaned your room and made your bed. Princess hated rules. Most of all, she hated doing anything at any time unless it was much, much later. This morning, as on others, she awoke, got dressed, and went outside and took a walk instead of cleaning her room. Princess walked into the forest near the castle. "I should start back before I get lost," she

whispered to a bunny on the path. Then she laughed, "I will go back but just, just a little later!" It was on the journey that Princess met a unicorn called Morgan. And it was on this journey, with the help of Morgan, that she learned that doing things now is always much better than later.

This concise text for advanced undergraduates and

Finance and Financial Markets St Martins Press  
Anthony Jay shows you how the new science of management is a continuation of the old art of government. By looking at

your own corporate organization in a political/historical context, you can fully understand its power structure - what Machiavelli wrote about statecraft in the sixteenth century holds true for business and management in the late twentieth century. Applying Machiavellian precepts to such modern corporations as General Motors, Apple Computer, and Microsoft, Jay discovers

self-contained states with courtiers and diplomats, orthodoxy and heresy lurking under their smooth corporate veneers. Though humorous, Jay's message is clear. To understand the workings of corporation or states, you must understand the nature and behavior of their leaders. And that hasn't changed since the Middle Ages. climb and also come down! Everything is there to conquer and to use patience. Challenge promotes growth. We have to remember it's only when the end comes that we can relax. Getting there requires adjustments - surprises - endurance - even when questions keep coming. We can conquer all, then the life becomes triumphant and happiness and the strength to go on - and on to

even better things! We feel better inside in spite of the ways of others. Please look at things in life kindly, how it affects others and how it makes others react. That is my wish and purpose. *Morgan and Me* Courier Corporation I know you've heard it a thousand times, "I'm too blessed to be stressed." Although a popular cliché, please know that it is possible to be stressed far beyond stress. Too many of

God's precious people have become victimized by unwanted pressure that accompanies the circumstances in their everyday lives. The dreadful aftermath of stress has claimed the lives of some even to the point of death. That is why, I wrote this book to encourage you in the faith. businesses. Few people embody the American entrepreneurial spirit as plainly as Rich DeVos. A prominent businessman, self-made billionaire, philanthropist, worldwide speaker, bestselling author, family man, and devout Christian, DeVos not only helped create Amway, one of the world's biggest companies, but he did it from the ground up with his deep faith in God

Born to poor Dutch immigrants in rural Michigan during the Depression, DeVos learned about the importance of leadership and partnership. His grandfather, father, and teachers taught him valuable lessons and key principles about faith, optimism, and

perseverance that would guide his entire life. In high school, he befriended Jay Van Andel, who later became his business partner. Together, they created a whole new way to sell products and established one of the largest, most successful companies in the world. DeVos also talks about his marriage and family, his experiences as a motivational speaker, his ownership of the NBA

basketball team Orlando Magic, and his philanthropic, religious, and political endeavors.
