*Single-Case Research Methods for the Behavioral and Health
Sciences* SAGE

With the Handbook of Action Research hailed as a turning point in how action research is framed and understood by scholars, this student edition has been structured to provide an easy inroad into the field for researchers and students. It includes concise chapter summaries and an informative introduction that draws together the different strands of action research and reveals their diverse applications as well as their interrelations. Divided into four parts, there are important themes of thinking and practice running throughout.

The SAGE Handbook of Performance Studies SAGE

This book captures the state of the art in visual research. Margolis and Pauwels have brought together, in one volume, a unique survey of the field of visual research that will be essential reading for scholars and students across the social sciences, arts and humanities. The SAGE Handbook of Visual Research Methods encompasses the breadth and depth of the field, and points the way to future research possibilities. It illustrates 'cutting edge' as well as long-standing and recognized practices. This book is not only 'about' research, it is also an example of the way that the visual can be incorporated into data collection and the presentation of research findings. Chapters describe a methodology or analytical framework, its strengths and limitations, possible fields of application and practical guidelines on how to apply the method or technique. The Handbook is

organized into seven main sections: - Framing the Field of Visual Research - Producing Visual Data and Insight - Participatory and Subject-Centered Approaches - Analytical Frameworks and Approaches - Visualization Technologies and Practices - Moving Beyond the Visual - Options and Issues for Using and Presenting Visual Research. Eric Margolis is an Associate Professor in the Hugh Downs School of Human Communication. He is President of the International Visual Sociology Association. Luc Pauwels is Professor of Visual Culture at the University of Antwerp. He is Chair of the Visual Communication Studies Division of the ICA and Vice-President of the International Visual Sociology Association (IVSA).

The SAGE Handbook of Fieldwork SAGE

The new edition of *The SAGE Handbook of E-Learning Research* retains the original effort of the first edition by focusing on research while capturing the leading edge of e-learning development and practice. Chapters focus on areas of development in e-learning technology, theory, practice, pedagogy and method of analysis. Covering the full extent of e-learning can be a challenge as developments and new features appear daily. The editors of this book meet this challenge by including contributions from leading researchers in areas that have gained a sufficient critical mass to provide reliable results and practices. The 25 chapters are organised into six key areas: 1. THEORY 2. LITERACY & LEARNING 3. METHODS & PERSPECTIVES 4. PEDAGOGY & PRACTICE 5. BEYOND THE CLASSROOM 6. FUTURES

The SAGE Handbook for Research in Education SAGE

Case study research has a long history within the natural

sciences, social sciences, and humanities, dating back to the early 1920's. At first it was a useful way for researchers to make valid inferences from events outside the laboratory in ways consistent with the rigorous practices of investigation inside the lab. Over time, case study approaches garnered interest in multiple disciplines as scholars studied phenomena in context. Despite widespread use, case study research has received little attention among the literature on research strategies. The *Encyclopedia of Case Study Research* provides a compendium on the important methodological issues in conducting case study research and explores both the strengths and weaknesses of different paradigmatic approaches. These two volumes focus on the distinctive characteristics of case study research and its place within and alongside other research methodologies. Key Features Presents a definition of case study research that can be used in different fields of study Describes case study as a research strategy rather than as a single tool for decision making and inquiry Guides rather than dictates, readers' understanding and applications of case study research Includes a critical summary in each entry, which raises additional matters for reflection Makes case study relevant to researchers at various stages of their careers, across philosophic divides, and throughout diverse disciplines Key Themes Academic Disciplines Case Study Research Design Conceptual Issues Data Analysis Data Collection Methodological Approaches Theoretical Traditions Theory Development and Contributions From Case Study Research Types of Case Study Research

Design and Methods SAGE

This text introduces readers to the history, epistemology, and

strategies of single-case research design. The authors offer concrete information on how to observe, measure, and interpret change in relevant outcome variables and how to design strategies that promote causal inferences. Key Features Includes case vignettes on specific single-case designs Describes clinical and applied case studies Draws on multiple examples of single-case designs from published journals across a wide range of disciplines Covers recent developments in applied research, including meta-analysis and the distinction between statistical and clinical significance Provides pedagogical tools to help readers master the material, including a glossary, interim summaries, end-of-chapter review questions, and activities that encourage active processing of material. Intended Audience This text is intended for students and practitioners in a variety of disciplines—including psychology, nursing, physical therapy, and occupational therapy—who are increasingly called upon to document the effectiveness of interventions.

Encyclopedia of Case Study Research SAGE

"An excellent guidebook through different approaches to social science measurement, including the all-important route-maps that show us how to get there." - Roger Jowell, City University "In this wide-ranging collection of chapters, written by acknowledged experts in their fields, Outhwaite and Turner have brought together material in one volume which will provide an extremely important platform for consideration of the full range of contemporary analytical and methodological issues." - Charles Crothers, Auckland University of Technology This is a jewel among methods Handbooks, bringing together a formidable collection of international contributors to comment on every

aspect of the various central issues, complications and controversies in the core methodological traditions. It is designed to meet the needs of those disciplinary and nondisciplinary problem-oriented social inquirers for a comprehensive overview of the methodological literature. The text is divided into 7 sections: Overviews of methodological approaches in the social sciences Cases, comparisons and theory Quantification and experiment Rationality, complexity and collectivity Interpretation, critique and postmodernity Discourse construction Engagement. Edited by two leading figures in the field, the Handbook is a landmark work in the field of research methods. More than just a 'cookbook' that teaches readers how to master techniques, it will give social scientists in all disciplines an appreciation for the full range of methodological debates today, from the quantitative to the qualitative, giving them deeper and sharpen insights into their own research questions. It will generate debate, solutions and a series of questions for researchers to exploit and develop in their research and teaching.

The SAGE Handbook of Social Media Research Methods
SAGE

The definitive reference resource for mentoring courses and affiliated courses in business and management, health, education, psychology, counselling and psychotherapy.

Recent decades have seen an upsurge of research with and about young children, their families and communities. The Handbook of Early Childhood Research will provide a landmark overview of the field of early childhood research and will set an agenda for early childhood research into the future. It includes 31

chapters provided by internationally recognized experts in early childhood research. The team of international contributors apply their expertise to conceptual and methodological issues in research and to relevant fields of practice and policy. The Handbook recognizes the main contexts of early childhood research: home and family contexts; out-of-home contexts such as services for young children and their families; and broader societal contexts of that evoke risk for young children. The Handbook includes sections on: the field of early childhood research and its key contributions new theories and theoretical approaches in early childhood research collecting and analysing data applications of early childhood research This Handbook will become the valuable reference text for students, practitioners and researchers from across the social sciences and beyond who are engaged in research with young children.

The SAGE Handbook of Workplace Learning SAGE

For the first time, this benchmark handbook brings together a systematic framework and state-of-the-art thinking to provide complete coverage of the social marketing discipline. It presents a major retrospective and prospective overview of social marketing, helping to define and shape its current and future developments by: - examining the defining elements of social marketing, their intellectual origins, evolution, current status and direction of travel; - discussing how these have been used in practice, emphasising emerging areas and recent innovations; and - setting the agenda for future research and development in the discipline. For academics, this book will fill the gap in comprehensive social marketing literature, while being of interest to policymakers and post-graduate marketing and health studies

students alike as it explores the idea that tools used to market fast-moving consumer goods and financial services can also be applied to pressing social problems.

The SAGE Handbook of Case-Based Methods SAGE

How we understand and define qualitative data is changing, with implications not only for the techniques of data analysis, but also how data are collected. New devices, technologies and online spaces open up new ways for researchers to approach and collect images, moving images, text and talk. The SAGE Handbook of Qualitative Data Collection systematically explores the approaches, techniques, debates and new frontiers for creating, collecting and producing qualitative data. Bringing together contributions from internationally leading scholars in the field, the handbook offers a state-of-the-art look at key themes across six thematic parts: Part I Charting the Routes Part II Concepts, Contexts, Basics Part III Types of Data and How to Collect Them Part IV Digital and Internet Data Part V Triangulation and Mixed Methods Part VI Collecting Data in Specific Populations

The SAGE Handbook of Qualitative Data Collection SAGE

Cross-disciplinary and critical in its approach, The SAGE Handbook of Housing Studies is an elucidating look at the key issues within the field. It covers the study of housing retrospectively, but also analyses the future directions of research and theory, demonstrating how it can contribute to wider debates in the social sciences. A comprehensive introductory chapter is followed by four parts offering complete coverage of the area: Markets: examines the perception of housing markets, how they function in different contexts, and the importance of housing behaviour and neighbourhoods

Approaches: looks at how other disciplines - economics, geography, and sociology - have informed the direction of housing studies Context: traces the interactions between housing studies and other aspects of society, providing context to debate housing through issues of space, social, welfare and the environment. Policy: is a multi-disciplinary and comprehensive take on the major policy issues and the causes and possible solutions of housing problems such as regeneration and homelessness. Edited by leading names in the field and including international contributions, the book is a stimulating, wide-ranging read that will be an invaluable resource for academics and researchers in geography, urban studies, sociology, social policy, economics and politics.

Concise Paperback Edition SAGE

The Web has been with us now for almost 25 years. An integral part of our social, cultural and political lives, 'new media' is simply not that new anymore. Despite the rapidly expanding archives of information at our disposal, and the recent growth of interest in web history as a field of research, the information available to us still far outstrips our understanding of how to interpret it. The SAGE Handbook of Web History marks the first comprehensive review of this subject to date. Its editors emphasise two main different forms of study: the use of the web as an historical resource, and the web as an object of study in its own right. Bringing together all the existing knowledge of the field, with an interdisciplinary focus and an international scope, this is an incomparable resource for researchers and students alike. Part One: The Web and Historiography Part Two: Theoretical and Methodological Reflections Part Three: Technical

and Structural Dimensions of Web History Part Four: Platforms on the Web Part Five: Web History and Users, some Case Studies Part Six: The Roads Ahead

The SAGE Handbook of Propaganda SAGE

Online research methods are popular, dynamic and fast-changing. Following on from the great success of the first edition, published in 2008, The SAGE Handbook of Online Research Methods, Second Edition offers both updates of existing subject areas and new chapters covering more recent developments, such as social media, big data, data visualization and CAQDAS. Bringing together the leading names in both qualitative and quantitative online research, this new edition is organised into nine sections: 1. Online Research Methods 2. Designing Online Research 3. Online Data Capture and Data Collection 4. The Online Survey 5. Digital Quantitative Analysis 6. Digital Text Analysis 7. Virtual Ethnography 8. Online Secondary Analysis: Resources and Methods 9. The Future of Online Social Research The SAGE Handbook of Online Research Methods, Second Edition is an essential resource for anyone interested in the contemporary practice of computer-mediated research and scholarship.

The SAGE Handbook of Qualitative Methods in Health Research

SAGE

Publisher description

The SAGE Handbook of Social Research Methods SAGE

The wide range of approaches to data analysis in qualitative research can seem daunting even for experienced researchers. This handbook is the first to provide a state-of-the art overview of the whole field of QDA; from general analytic strategies used in

qualitative research, to approaches specific to particular types of qualitative data, including talk, text, sounds, images and virtual data. The handbook includes chapters on traditional analytic strategies such as grounded theory, content analysis, hermeneutics, phenomenology and narrative analysis, as well as coverage of newer trends like mixed methods, reanalysis and meta-analysis. Practical aspects such as sampling, transcription, working collaboratively, writing and implementation are given close attention, as are theory and theorization, reflexivity, and ethics. Written by a team of experts in qualitative research from around the world, this handbook is an essential compendium for all qualitative researchers and students across the social sciences.

The SAGE Handbook of Survey Methodology SAGE Publications

One of our bestselling handbooks, The SAGE Handbook of Qualitative Research in Psychology is back for a second edition, with updated chapters and three new chapters introduced on Thematic Analysis, Interpretation and Netnography.

The SAGE Handbook of Qualitative Data Analysis SAGE Publications

With coverage of the entire research process in social media, data collection and analysis on specific platforms, and innovative developments in the field, this handbook is the ultimate resource for those looking to tackle the challenges that come with doing research in this sphere.

The SAGE Handbook of Social Marketing SAGE Publications

There has been a huge growth of interest in action research in educational settings over the past 20 years across the Americas,

Europe, Australia and Africa - this Handbook provides a scholarly reference text that will inform the development of the field.

The SAGE Handbook of Qualitative Geography SAGE

In this comprehensive handbook, an examination of the complexities of contemporary evaluation contributes to the ongoing dialogue that arises in professional efforts to evaluate people-related programs, policies, and practices. The SAGE Handbook of Evaluation is a unique and authoritative resource consisting of 25 chapters covering a range of evaluation theories and techniques in a single, accessible volume. With contributions from world-leading figures in their fields overseen by an eminent international editorial board, this handbook is an extensive and user-friendly resource.

The SAGE Handbook of Qualitative Business and Management Research Methods SAGE Publications

"Overall, its breaking of disciplinary isolation, enhancing of mutual understanding, and laying out of a transdisciplinary platform makes this Handbook a milestone in identity studies." - Sociology Increasingly, identities are the site for interdisciplinary initiatives and identity research is at the heart of many transdisciplinary research centres around the world. No single social science discipline 'owns' identity research which makes it a difficult topic to categorize. The SAGE Handbook of Identities systematizes this complex field by incorporating its interdisciplinary character to provide a comprehensive overview of its themes in contemporary research while still acknowledging the historical and philosophical significance of the concept of identity. Drawing on a global scholarship the Handbook has four parts: Frameworks: presents the main theoretical and

methodological perspectives in identities research. Formations: covers the major formative forces for identities such as culture, globalisation, migratory patterns, biology and so on. Categories: reviews research on the core social categories central to identity such as ethnicity, gender, sexuality, disability and intersections

between these. Sites and Context: develops a series of case studies of crucial sites and contexts where identity is at stake such as social movements, relationships, work-places and citizenship.
