Any organization must ask three interrelated questions in order to develop its strategy: where are we, where do we want to be, and how will we get there? While the questions do not change over time, the realities and environments that companies face do. Given today's realities, how should companies answer these questions as they face the challenges of the 21st century? In this book, leading business school educators use their academic, yet managerially-relevant, research to explore these questions. They divide the book into three sections - Understand Your Situation, Develop Your Options, and Lead the Change - and take the reader through some of the latest thinking that helps answer these questions. All the authors have extensive international experience of working with senior managers and are well known academic researchers in their field. They present their ideas in a straightforward, lively, and purposeful way. Their goal is to inform, challenge, and provide practical advice and tools. The book serves as a guide to a range of contemporary business challenges, such as managing uncertainty, creating new markets through innovation, energizing people, leading clever people in organizations with limited hierarchy, and introducing radical change. The central focus is on the core concerns and responsibilities of senior management - strategy and leadership. Clear, crisp, and to the point, this book provides an invaluable and coherent summary of some of the best current business school thinking on contemporary challenges facing organizations. It will be an ideal guide for both MBAs and practicing managers.

Banking on Self-help Groups reviews the existing state of affairs in respect of the SHG (Self-help Group) movement and addresses the question of what should be the next phase of development of the SHGs. It identifies the policy gaps and opportunities that exist for the SHGs to be mainstreamed further into the formal financial

system. The author examines elements of strategy and design being adopted by the National Rural Livelihoods Mission as also the potential role of NABARD in the development of SHGs in the future. The study focuses on three core issues pertaining to SHGs. These relate to (i) cost-effectiveness, (ii) sustainability, and (iii) impact, i.e., the development cost of SHGs and SHG-based institutions, the sustainability of SHG models and community institutions fostered by them, and the economic and social impact on SHG members. The book concludes with a discussion of proposals and institutional arrangements that provide the way forward for the continued and uninterrupted growth of SHGs as an agency for change in the rural sector of India.

Whether man-made or naturally occurring, large-scale disasters can cause fatalities and injuries, devastate property and communities, savage the environment, impose significant financial burdens on individuals and firms, and test political leadership. Moreover, global challenges such as climate change and terrorism reveal the interdependent and interconnected nature of our current moment: what occurs in one nation or geographical region is likely to have effects across the globe. Our information age creates new and more integrated forms of communication that incur risks that are difficult to evaluate, let alone anticipate. All of this makes clear that innovative approaches to assessing and managing risk are urgently required. When catastrophic risk management was in its inception thirty years ago, scientists and engineers would provide estimates of the probability of specific types of accidents and their potential consequences. Economists would then propose risk management policies based on those experts' estimates with little thought as to how this data would be used by interested parties. Today, however, the disciplines of finance, geography, history, insurance, marketing, political science, sociology, and the decision sciences

combine scientific knowledge on risk assessment with a better appreciation for the importance of improving individual and collective decision-making processes. The essays in this volume highlight past research, recent discoveries, and open questions written by leading thinkers in risk management and behavioral sciences. The Future of Risk Management provides scholars, businesses, civil servants, and the concerned public tools for making more informed decisions and developing long-term strategies for reducing future losses from potentially catastrophic events. The Development of Its Laws and Constitution MacMillan India

This is the story of the carefully planned resurgence of the State Bank of India (SBI) from a laid-back incumbent under threat from private players to a customer-oriented competitive organization that has outperformed rivals despite several constraints. The leadership at SBI succeeded in reshaping perspectives and profitability at the bank, which employs a staggering 200,000 people, not withstanding salary restrictions and regulatory bottlenecks. While the primary thrust was on changing employee attitude towards their own organization and, of course, its customers, the transformation exercise was broad-based encompassing fundamental changes in technology, processes and business-mix alike. In about three years beginning 2006, SBI not only defended its own lair against the siege of younger, leaner, meaner rivals but actually took the battle to the attacker' domains. SBI's size and setting make the story an inspiring example to other organizations, particularly in the public sector. Written in a fluid and engaging style, and backed by facts, figures, analysis and anecdotes, the book challenges several stereotypes and dogmas common in today's management circles.

Microfinance India: State of the Sector Report 2011 presents the growth of the microfinance sector in India in its entirety. It offers in-depth, well-researched and thoroughly analyzed evidence on how the sector has made an impact at various levels of the economy and society. The report collects information from authoritative sources, studies and reports on the sector and field studies on specific developments of interests. It also brings perspectives from key policy makers through exclusive interviews. Highlighting on more topical themes, this year's report begins with an overview of the microfinance sector, which faced significant problems during 2010-11. It then evaluates the performances of the SHG and MFI models and discusses thematic issues such as social performance management and financial inclusion in detail.

The Future of Risk Management SAGE Publications Pvt. Limited

Microfinance India: State of the Sector Report is an annual publication which quantifies the growth and performance of Indian microfinance in addition to documenting recent

developments, analyzing critical issues, and identifying policy choices with the overall objective of deepening the understanding of the sector. Besides making available the latest statistical data on growth, performance and expansion across regions and population segments, the document provides a thorough review of the operational climate and the recent innovations in the realms of products, services and processes. This year's State of the Sector Report is structured in line with the critical themes of current microfinance discourse. The report locates itself within the financial inclusion debate, as that is the overarching philosophical foundation of microfinance. Specifically, the report attempts to (a) unravel the major patterns of change within three major legal-organizational forms—self-help groups, for-profit microfinance companies and non-profit microfinance organizations; (b) explain the relationship among the major channels of microfinance, and between them and the other system players (banks, investors, government, central bank); and (c) review the main facets of the recent policy and regulatory changes that have a bearing on financial inclusion in general and microfinance in particular. This report is a valued reference document for researchers, practitioners and policy makers in the microfinance sector.
