The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical

concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Central Teaching Eligibility Test or CTET is the national level examination that is conducted to recruit the most eligible candidates as teachers at Primary and Upper Primary Levels. It is held twice a year in the month of July and December. The exam is divided into 2 Papers, As per the CTET 2020 Exam Pattern, Paper -1 is for the Classes 1-5 whereas Paper - 2 is meant for those who want to become a teacher of classes 6-8. To teach the students of Class 6-8 one has to appear for both the exams. The new edition of "CTET 15 Practice Sets Mathematics & Science (Paper II)" is the one point solution prepared on the basis of latest exam pattern. As the title suggests this book provides 15 practice sets for the complete practice sets. After every practice set OMR

Sheets and Performance Indicator that give the estimation of level preparation and Answer & Explanations are provided to clear the concepts of the syllabus. Along with the Practice sets the book also consists of 5 Previous Years Solved Papers in beginning which that give the hint of solving the papers. This book will prove to be highly useful for the CTET Paper 2 exam as it will help in achieving good rank in the exam. As in previous editions, the focus in PREALGEBRA & INTRODUCTORY ALGEBRA, remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. The role of active participant is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately work similar problems, helps them build their confidence and eventually master the concepts. To this point, simplicity plays a key factor in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully-constructed hierarchy of objectives. This objective-based approach not only serves the needs of students, in terms of helping them to clearly organize their thoughts around the content, but instructors as well, as they work to design syllabi, lesson plans, and other administrative documents. The Second Edition features a new design, enhancing the Aufmann Interactive Method and the organization of the text around objectives, making the pages easier for both students and instructors to follow.
