The Universe Within takes the reader on a wondrous journey across space and time. Through an artful melding of science and personal narrative, Neil Turok -- one of the world's leading theoretical physicists -- conveys not only the excitement of forefront research, but the gripping human

drama of exploring ourselves and the cosmos.

Quantum fluctuations claimed to be linked to the creation of the baby universe The paper Spontaneous creation of the universe from nothing which appeared recently on ArXiv links quantum fluctuations with the baby universe.

The Universe Within: From Quantum to Cosmos by Neil Turok ...

★ The Universe Within: From Quantum to Cosmos by Neil Turok Neil Turok, a South African-born theoretical physicist, is the executive director of the Perimeter Institute for Theoretical Physics and one of the winners of the 2008 TED Prize, which he received in part for helping to found the African Institute of Mathematical Sciences. *Could quantum fluctuations create a universe within our own?*

If the Standard Model is correct, the particles and forces we observe in our universe exist as they do because of underlying quantum fields. Quantum fields can have states of differing stability, including 'stable', 'unstable', or 'metastable' (meaning very long-lived but not completely stable). If a more stable vacuum state were able to arise, then

existing particles and forces would no longer arise as they do in the universe's present state.
