SHELTON GRAHAM

How to Vote Progressive in Australia Black Inc.

The Australian Greens played a pivotal role after the 2010 federal election. It ensured the Gillard minority government went full term and won its first House of Representatives seat. But what do we really know about the Greens in Australia? Is the party really just an extension of the environment movement or a professional party, capable of influencing the major parties? This book examines the people who make the party tick. Uncovers the members and activists of the party. *The Australian Greens: From Activism to Australia's Third Party* asks whether the Greens has made the transition from a home for tree-huggers and alternative lifestylers to a party ready to work in Government. *Julia 2010* Routledge

Over the past three decades, progressive politics in Australia has undergone a gradual but unmistakable transformation. Where the Australian Labor Party once enjoyed dominance over the political left it now shares space with the Greens; at times depending on minor-party support to form government, and even more often to pass contentious legislation. Based on over forty interviews with politicians and party figures, *Whitlam's Children* is the first study of this increasingly important relationship in Australian politics. Did previous attempts at cooperation, particularly minority government under Julia Gillard, deliver successful government, and how do each judge the experiment in hindsight? Why are certain policy areas, like refugee

settlement and environmental policy, so stubborn and divisive? And will we ever see a more lasting coalition on the Australian left, to mirror the established arrangement on the Australian right? While revealing a variety of perspectives, even within parties, the research uncovers a productive, if often hostile relationship; united by a series of shared values, but divided by different approaches to politics, elections and parliament. Featuring a preface by Geoff Gallop

Labor Or Green? University of Queensland Press(Australia)

A visionary book for our wild times. Scott Ludlam draws on his experience as a senator and activist to capture our world on a precipice and explore what comes next. One way or another, we are headed for radical change. We are now in the Anthropocene – humans are changing the earth's climate irreversibly, and political, human and natural systems are on the cusp of collapse. Ludlam shines a light on the bankruptcy of the financial and political systems that have led us here: systems based on the exploitation of the earth's resources, and 99 per cent of the world's population labouring for the wealth of 1 per cent. In *Full Circle*, Ludlam seeks old and new ways to make our systems humane, regenerative and more in tune with nature. He travels the globe to see what happens when ordinary people stand up to corporations and tyrants. He takes the reader on a journey through time to discover the underlying patterns of life. And he finds that we are at a unique moment when billions of tiny actions by individuals and small groups are coalescing into one great movement that could transform history. Bringing together a wealth of new ideas, *Full Circle* outlines a new ecological politics.

'Scott Ludlam's Full Circle ranges very far in space and time – the story stretches over hundreds of millions of years and every inch of our planet. Ludlam's insights are often cogent and deep – and more than that, they're earned. His willingness to engage in the fight he's describing gives his take on these existential questions real power.'—Bill McKibben, author of *The End of Nature* 'Australia lost a senator, the world gained a luminous writer. Scott Ludlam's Full Circle is at once a comic chronicle of the climate apocalypse, a heartbreaking work of paleohistory and a fugitive tourist diary, strange, uncategorisable and magnificent.'—Raj Patel, author of *Stuffed and Starved* and *The Value of Nothing*

Double Disillusion Oxford University Press

An Activist Life is the story of an apparently ordinary woman – a high-school English teacher from northwest Tasmania – who became a fiery environmental warrior, pitted against some of the most powerful business and political forces in the country. In it, Christine Milne tells her story through the objects that have symbolic meaning in both her personal and political life, from the butter pats in her kitchen that represent her journey from farm girl at Wesley Vale to environmental and human rights activist at the national and global level, to the Pride t-shirt she wore walking in Mardi Gras next to her son, after years of fighting for the legal reform of gay rights in Tasmania. She describes how politics actually works: the deals, the promises kept and broken, the horse-trading and treachery involved in some of the most controversial and difficult issues of our time, including the attempts to forge a workable and effective climate change policy for

Australia, and Australia's treatment of refugees and asylum seekers. This is a fascinating insider's account of what it means to be a woman in politics: the sacrifices of family life and relationships, the relentless misogyny and sexism that must be endured, the gritty conviction that you must never, ever give up the pursuit of the greater good. It is the story of Australian politics and the fight to save the world, and essential reading for anyone who cares about either.

A Comparative Study of Web Campaigning Allen & Unwin

Examining the politics of each Pacific Island state and territory, this well-researched volume discusses historical background and colonial experience, constitutional framework, political institutions, political parties, elections and electoral systems, and problems and prospects. Pacific Island countries and territories included are the original seven member states—New Zealand, Australia, Fiji, Samoa, Tonga, Nauru, and the Cook Islands—along with all the new member states and organizations. A wide-ranging political survey, this comprehensive and completely up to date reference will appeal to Pacific peoples and anyone with an interest in politics.

Empowerment and Control in the Australian Welfare State Melbourne

Univ. Publishing

New Parties in Old Party Systems addresses a pertinent yet neglected issue in comparative party research: why are some new parties that enter national parliament able to defend a niche on the national level, while other fail to do so? This book examines the conditions for the survival and success of the 140, organizationally new parties that entered their national parliaments in 17 democracies from 1968 to 2011. It

covers a wide variety of programmatic profiles and performance trajectories. The book theorizes the interplay between the way parties are formed and the choices made by their founders and leaders, whose interplay shapes their evolution before and after entering national parliament. This approach is substantiated empirically by advanced statistical methods assessing the role of party origin for new party performance combined with a wide range of detailed, in-depth case studies capturing how intra-organizational dynamics shape party success and failure.

Implementing a Basic Income in Australia ANU Press

"Glenn Kefford has dragged scholarship about party campaigning into the modern day, with a study that for the first time properly integrates the campaign elements of data, digital and field work." -Stephen Mills, University of Sydney, Australia "This compellingly written, ground-breaking book is underpinned by a treasure trove of original analyses: from participant observation in fieldwork campaigns, extensive interviews with party insiders, to public opinion data." -Ariadne Vromen, Australian National University, Australia "Kefford offers the most extensive analysis of contemporary campaigning to date in the field.... This is a fascinating and nuanced account of how data is powering digital and field campaigning, and how its effects might be less directly on voters and more on parties as organizations." -Daniel Kreiss, University of North Carolina, Chapel Hill, USA "Presenting unparalleled insight into the activities of Australian parties, Glenn Kefford dives beneath the hype and sensationalised reporting of political campaigns to offer a detailed, and vitally

important discussion of how parties actually work... this book makes an important contribution to debates on political parties that will resonate far beyond Australia's shores." -Katharine Dommett, University of Sheffield, United Kingdom Big data and microtargeting steal the headlines about campaigning. But how important are they really to the way that political parties campaign? This book provides a fine-grained account of the campaign practices of three Australian political parties. It explores how prevalent data-driven campaigning is, introduces an original theoretical framework to understand these practices, and demonstrates that there is a disconnect between what Australian voters think about these issues and the way that parties campaign in the 21st century. Drawing on 161 interviews, participant observation and original survey data, it shows that the reality of contemporary campaigning is often different to what we are led to believe. Glenn Kefford is a lecturer in political science at the University of Queensland in Brisbane, Australia. He is an Australian Research Council Discovery Early Career Researcher Award Fellow for 2019-2021. **Leadership and the Construction of Environmental Concern** CUP Archive MS Acc10.166 comprises the five-page agreement signed by Senator Bob Brown, Senator Christine Milne, Adam Bandt MP-Elect, the Hon. Julia Gillard MP and the Hon. Wayne Swan MP, following the 2010 federal election. The election resulted in a minority government formed by the Australian Labor Party with the support of the Australian Greens and independent Members of Parliament, Rob Oakeshott and Tony Windsor. The agreement establishes a basis for stable and effective government, based on the Greens voting

with the ALP government to ensure supply and opposing any motion of no confidence in the government from non-Green members. The principles on which the agreement is founded are: transparent and accountable government; improved process and integrity of parliament; policies which promote the national interest; and policies which address climate change. Other policy issues to be addressed include action on dental care and High Speed Rail, and a full parliamentary debate on the war in Afghanistan. The remainder of the agreement sets out the steps to be taken to achieve the stated principles (1 packet).

Australian Political Institutions

Springer

This book explores the tensions between the competing social rights and social control functions of the modern Australian welfare state. By critically examining the history and rhetoric of the Australian welfare state from 1972 to the present day, and using the author's long-standing research on the Australian Council of Social Service and other welfare advocacy groups, it analyses the transformation from rights-based to conditional welfare. The Labor Party Government from 1972-75 is identified as the only clear cut example of Australia positively using welfare payments and services as an instrument to promote greater social equity, inclusion and participation. Since the mid-1970s, the Australian welfare state has gradually retreated from the social rights agenda conceived by the Whitlam Government. Australia has followed other Anglo-Saxon countries in adopting increasingly conditional and paternalistic measures that undermine the protection of social citizenship outside the labour market. In contrast, this text makes the

case for an alternative participatory and decentralized welfare state model that would prioritize social care by empowering and supporting welfare service users at a local community level. This book will be of interest to academics, students and policy-makers working within social policy, social work and political sociology.

Climate Politics And The Climate

Movement In Australia Routledge

Climate change is the hottest topic of the twenty-first century and the climate movement a significant global social movement. This book examines the broad context of Australian climate politics and the place of the climate movement within it. Acting 'from above' are the most powerful forces—corporations and governments, both Labor and Coalition—with the media framing the issues. Climate movement actors 'in the middle' include the Australian Greens, major environmental and climate organisations, think-tanks, academics, public intellectuals and the union movement. Acting 'from below' are the numerous local climate action groups and various regional and national networks. This lowest level is the

primary location of the climate movement; and grassroots mobilisation the source of its vitality. To advocate a safe climate and climate justice, the book ends by offering a vision for an alternative Australia based upon the principles of social equity and environmental sustainability.

Springer

Recognizing that climate politics has been an increasingly contentious and heated topic in Australia over the past two decades, this book examines Australian capitalism as a driver of climate change and the nexus between the corporations and Coalition and Australian Labor parties. As a highly developed country, Australia is punching above its weight in terms of contributing to greenhouse gas emissions despite rising temperatures, droughts, water shortages and raging bushfires, storm surges and flooding, and the bleaching of the Great Barrier Reef. Drawing upon both archival and ethnographic research, Hans Baer examines Australian climate politics at the margins, namely the Greens, the labour union, the environmental NGOs, and the grass-roots climate movement. Adopting a climate justice perspective which calls for "system change, not climate change" as opposed to the conventional

approach of seeking to mitigate emissions through market mechanisms and techno-fixes, particularly renewable energy sources, this book posits system-challenging transitional steps to shift Australia toward an eco-socialist vision in keeping with a burgeoning global socio-ecological revolution. Accessibly written and including an interview with renowned comedian and climate activist Rod Quantock OAM, this book is essential reading for academics, students and general readers with an interest in climate change and climate activism.
