“An awe-inspiring, helter-skelter journey through mind-blowing SF, western dime novel, noir mystery, and near-future dystopian horror” (Publishers Weekly, starred review). The debut novel from Zack Parsons, editor of the Something Awful website and author of *My Tank Is Fight!*, is a mind-bending journey through time and genres. Beginning in 1874, with a blood-soaked western story of revenge, *Liminal States* follows a trio of characters through a 1950s noir detective story and twenty-first-century sci-fi horror. Their paths are tragically intertwined—and their choices have far-reaching consequences for the course of American history. It’s a remarkable mashup that “somehow manages to become a cohesive, thought-provoking whole . . . There’s no way a novel with this many moving parts should hold together, but it does, and even readers initially daunted by the jumble will soon be glad to go wherever Parsons takes them” (Publishers Weekly, starred review). “Parsons’s debut is a tour-de-force, a justifiably showy demonstration of the author’s chameleon-like ability to write in several genres all at once, and it emerges as one of the scariest and bleakest tales I can remember.” —Cory Doctorow

Providing a personal, informed and cultural perspective on rites of passage for general readers, this text illustrates the power of rites to help us navigate life's troublesome transitions.

Do I Have to Wear Black? Taylor & Francis

The book explores the links between mythic and rituals, arguing that the connectedness with ritual endows a story with a mythic essence. Detailed discussions of various rituals exemplify the major theoretical discourse. The book is of interest to scholars in the areas of religious studies, the anthropology of religion, and Halakhah (law and ritual).

This classic work of anthropology explores the transitional stages of an individual's life and the societal rituals involved. Arnold van Gennep's masterwork, *The Rites of Passage*, has been a staple of anthropological education for more than a century. First published in French in 1909, and translated into English by the University of Chicago Press in 1960, this landmark book explores how the life of an individual in any society can be understood as a succession of transitions: birth, puberty, marriage, parenthood, old age, and, finally, death. Van Gennep's great insight was discerning a common structure in each of these seemingly different transitions, involving rituals of separation, liminality, and incorporation. With compelling precision, he set out the terms that would both define twentieth-century ritual theory and become a part of our everyday lexicon. This new edition of his work demonstrates how we can still make use of its enduring critical tools to understand our own social, religious, and political worlds, and even our personal and professional lives. In his new introduction, Pulitzer Prize-winning historian and anthropologist David I. Kertzer sheds new light on van Gennep, on the battles he fought, and on the huge impact the book has had since publication of the first English edition. With a new introduction by Pulitzer Prize-winner David I. Kertzer

Rituals and Ritual Theory in Ancient Israel University of Chicago Press

Challenging the idea that rituals are static and emotions irrational, the volume explores the manifold qualities

of emotions in ritual practices. Focusing explicitly on the relationship between emotions and rituals, it poses two central questions. First, how and to what extent do emotions shape rituals? Second, in what way are emotions ritualized in and beyond rituals? Strong emotions are generally considered to be more spontaneous and uncontrolled, whereas ritual behaviour is regarded as planned, formalized and stereotyped, and hence less emotional. However, as the volume demonstrates, rituals often reveal strong emotions among participants, are motivated by feelings, or are intended to generate them. The essays discuss the motivation for rituals; the healing function of emotions; the creation of new emotions through new media; the aspect of mimesis in the generation of feelings; individual, collective, and non-human emotions; the importance of trance and possession; staged emotions and emotions on stage; emotions in the context of martyrdom; emotions in Indian and Western dance traditions; emotions of love, sorrow, fear, aggression, and devotion. Furthermore, aesthetic and sensory dimensions, as well as emic concepts, of emotions in rituals are underscored as relevant in understanding social practice.

In *The Ritual Process: Structure and Anti-Structure*, Victor Turner examines rituals of the Ndembu in Zambia and develops his now-famous concept of "Communitas." He characterizes it as an absolute inter-human relation beyond any form of structure. *The Ritual Process* has acquired the status of a small classic

since these lectures were first published in 1969. Turner demonstrates how the analysis of ritual behavior and symbolism may be used as a key to understanding social structure and processes. He extends Van Gennep's notion of the "liminal phase" of rites of passage to a more general level, and applies it to gain understanding of a wide range of social phenomena. Once thought to be the "vestigial" organs of social conservatism, rituals are now seen as arenas in which social change may emerge and be absorbed into social practice. As Roger Abrahams writes in his foreword to the revised edition: "Turner argued from specific field data. His special eloquence resided in his ability to lay open a sub-Saharan African system of belief and practice in terms that took the reader beyond the exotic features of the group among whom he carried out his fieldwork, translating his experience into the terms of contemporary Western perceptions. Reflecting Turner's range of intellectual interests, the book emerged as exceptional and eccentric in many ways: yet it achieved its place within the intellectual world because it so successfully synthesized continental theory with the practices of ethnographic reports."

"Why do some people succeed at change while others fail? It's the way they think! Liminal thinking is a way to create change by understanding, shaping, and reframing beliefs. What beliefs are stopping you right now? You have a choice. You can create the world you want to live in, or live in a world created by others. If you are ready to start making changes, read this book."

supplement, of a modern classic published in 1960. The invention of the mechanical clock was one of the most important turning points in the history of science and technology. This study revealed six centuries of mechanical clockwork preceding the first mechanical escapement clocks of the West of about AD 1300. Detailed and fully illustrated accounts of elaborate Chinese clocks are accompanied by a discussion of the social context of the Chinese inventions and an assessment of their possible transmission to medieval Europe. For this revised edition, Dr Joseph Needham has contributed a new foreword on recent research and perceptions. In a supplement John H. Combridge details a modern reconstruction of Su Sung's timekeeping device, which together with textual studies modifies our understanding of this important early technology.

The human transformation available at the 'limen' (literally: the edge or threshold), noticed across different cultures by anthropologists, is at the heart of the Gospel. Indeed the liminal place is the place of transformation and change par excellence. We live in age of enormous and rapid change to which we do not yet see an end. There is therefore a 'kairos' moment here for the church to understand the importance of liminality through this unique book. Reading this book will offer new 'lenses' to understand humanity, God's world, the shape of Christian discipleship, the church and its mission differently. The authors believe engaging with liminality can help both readers' faith and the church to be re-imagined - and have included case studies, exercises and questions in each chapter to help this

process.

Integrating psychology and religion, this unique encyclopedia offers a rich contribution to the development of human self-understanding. It provides an intellectually rigorous collection of psychological interpretations of the stories, rituals, motifs, symbols, doctrines, dogmas, and experiences of the world's religious traditions. Easy-to-read, the encyclopedia draws from forty different religions, including modern world religions and older religious movements. It is of particular interest to researchers and professionals in psychology and religion.

The Ritual Process W. W. Norton & Company

This book urges contemporary healers to utilize premodern tribal principles of sacred space and ritual process long considered lost or inaccessible to modern culture. Properly prepared "ritual elders" can guide people through ritual steps from (a) the challenge of a life-crisis, into (b) sacred space and time for needed reorganization, and then into (c) a newly transformed personal and social world. These steps derive from key concepts in the scholarship of Arnold van Gennep, Mircea Eliade, Joseph Campbell, and Victor Turner, reformulated with new insights from extensive field research and psychoanalytic practice. "Here Robert Moore's deeply penetrating mind awakens us to the urgency of what time it is' time to reclaim the sense of sacred space in our secularized culture, time to grow a mature ritual leadership that can hold and steward that space, time to restore the processes of a comprehensive initiation into wholeness which alone can re-create a habitable

world for humanity." Don Jones, Past International Chairman, The ManKind Project "These materials articulate my conviction that our species has evolved to the point where we either must continue to provide conscious, creative, and responsible rituals of life that serve the maturation and healing of all its people, or face the alternative of unconscious and destructive participation in rituals of personal, social, and global death." Author's Preface Reading Clocks, Alla Turca Cambridge University Press

Women's Rites of Passage grew out of Abigail Brenner's desire to answer some fundamental questions about the role of rites of passage in contemporary women's lives. Relying on a research study involving over 50 women, Brenner shows how women today understand the need to take responsibility for their lives and for directing their own paths, and are beginning to do so by creating their own very personal rites of passage.

Contemporary Art and Anthropology takes a new and exciting approach to representational practices within contemporary art and anthropology. Traditionally, the anthropology of art has tended to focus on the interpretation of tribal artifacts but has not considered the impact such art could have on its own ways of making and presenting work. The potential for the contemporary art scene to suggest innovative representational practices has been similarly ignored. This book challenges the reluctance that exists within anthropology to pursue alternative strategies of research, creation and exhibition, and argues that contemporary artists and anthropologists have much to learn from

each others' practices. The contributors to this pioneering book consider the work of artists such as Susan Hiller, Francesco Clemente and Rimer Cardillo, and in exploring topics such as the possibility of shared representational values, aesthetics and modernity, and tattooing, they suggest productive new directions for practices in both fields.

This book "challenges our relationship to the environment and to each other, not only now but across generations. It is an important question for our time, when communities have become fragmented by a global consumer society, when our selves have become isolated in a competitive and technology-driven economy, and when our spiritual, social, and ecological impacts on human and other-than-human beings extend farther than ever imagined due to globalization and climate change. Through interviews and poetic snapshots into the experience of Indigenous people and others, this book demands that the reader think about how contemporary concerns oblige us to see ourselves as someone's future ancestor and, in turn, creates for the reader a different way of looking at his or her traditions and self"--

Ritual is part of what it means to be human. Like sports, music, and drama,

ritual defines and enriches culture, putting those who practice it in touch with sources of value and meaning larger than themselves. Ritual is unavoidable, yet it holds a place in modern life that is decidedly ambiguous.

What is ritual? What does it do? Is it useful? What are the various kinds of ritual? Is ritual tradition bound and conservative or innovative and transformational? Alongside description of a number of specific rites, this Very Short Introduction explores ritual from both theoretical and historical perspectives. Barry Stephenson focuses on the places where ritual touches everyday life: in politics and power; moments of transformation in the life cycle; as performance and embodiment. He also discusses the boundaries of ritual, and how and why certain behaviors have been studied as ritual while others have not. Stephenson shows how ritual is an important vehicle for group and identity formation; how it generates and transmits beliefs and values; how it can be used to exploit and oppress; and how it has served as a touchstone for thinking about cultural origins and historical change.

Encompassing the breadth and depth of modern ritual studies, Barry Stephenson's Very Short Introduction also develops a narrative of ritual's place in social and cultural life. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. The Hero with a Thousand Faces BRILL

The French writer Arnold van Gennep first called attention to the phenomena of status passages in his *Rites of Passage* one hundred years ago. In *Status Passage*, first published in 1971, the movement of individuals and groups in contemporary society from one status to another is examined in the light of Gennep's original theory. Glaser and Strauss demonstrate that society emerges as a comparative order. In this order, every organized action, collective or individual, can be seen as a form of status passage. From one status to another—from childhood to adolescence to adulthood, from being single to being married, movement from one income group, social class or religion to another—there are passages that entail movement into different parts of a social structure and loss or gain in privileges. Types of status passage are described

by their proper ties. The authors present a formal theory of status passage in the form of a running theoretical discussion. The concepts and categories discussed in *Status Passage* are illuminated by a large number of examples chosen from a wide range of human behavior, and the applicability of the theory to still other examples is made apparent. The result is a stimulating and provocative book that will interest a wide range of sociologists, social psychologists, and other social scientists, and will be useful in a variety of courses.
