In this graphic novel from the co-creator/showrunner of AMC's acclaimed show *Halt and Catch Fire*, a disturbed 15-year-old girl obsessively searches for the truth behind a mysterious flying woman who explodes in the sky one day. Over the course of 51 days in Chicago, an unknown woman appears publicly 11 times, flying at speeds of 120 miles per hour and at heights reaching

2,000 feet. Then she suddenly dies in a fiery explosion mid-air. No one knows who she was, how she flew, or why. A disturbed 15-year-old girl named Luna becomes obsessed with learning everything about her, even as rumors and conspiracy theories roil. As Luna comes closer to the truth--all while defense contractors, government investigators, and foreign sources creep around the fringes--she hopes that cracking the secrets of the Flying Woman's inner life will somehow lead to liberation from her own troubled mind. Dimenticare Darwin Sounds True

Animal lovers everywhere will be captivated by this thrilling story of a trail ride gone very wrong when three riders and their horses are swept away in a rampaging river.

The Land of Stories: The Wishing Spell Houghton Mifflin Harcourt

This book's Italian title, *Dimenticare Darwin*, means "Forget Darwin," and its prologue bears the title "Evolution is dead!" The author, Dr. Giuseppe Sermonti, is a respected Italian biologist who boldly shatters the myth that all critics of Darwinian evolution are American religious fundamentalists. This delightful little book is loaded with scientific facts that aren't taught in standard biology classes, but it is also full of history and poetry. *Why is a Fly Not a Horse?* does not have all the answers, but it asks many of the right questions-in a style that is both entertaining and inspiring. Giuseppe Sermonti is retired Professor of Genetics at the University of Perugia. He discovered genetic recombination in antibiotic-producing *Penicillium* and *Streptomyces* and was Vice President at the XIV International Congress of Genetics (Moscow, 1980). Sermonti is Chief Editor of *Rivista di Biologia/Biology Forum*, one of the oldest still-published

biology journals in the world, and he has published seven other books, including *Dopo Darwin* (¿After Darwin), with R. Fondi (1980-1984).

The Flight of the Horse Dark Horse Comics

Our "American Girl" of horses, each novel in the Breyer Horse Collection—based on Breyer Animal Creations' top-selling horse breeds—tells a compelling story that captures the true essence and personality of each horse. And now, for the first time, we have a historical novel. Annie Wedekind takes us back to Europe in World War II—a time and place that tested the courage of the noble Lipizzaner horses. In 1930's Austria, life for Favory Mercurio, a Lipizzaner stallion bearing the crest of the renowned Piber stud, begins with his mother's abandonment. From that moment on, the young horse feels different, as if he has a missing piece— even though, despite his doubters, he has talent enough to be accepted into the famed Spanish Riding School. Slowly, but doggedly, Mercury perseveres through the rigors of his years of training. But then, as the war bears down on Vienna and the school is forced to flee two advancing armies, his beloved trainer and rider, Max, with whom he has formed a true bond, is suddenly gone, and Mercury is abandoned once more. Will he have the chance to become one of the great Lipizzaner stallions, or will he lose the people, horses, and home that he loves?

WINNER OF THE 800-CEO-READ BUSINESS BOOK OF THE YEAR

2015 In the vein of Susan Cain's QUIET and Malcolm Gladwell's DAVID AND GOLIATH, HOW TO FLY A HORSE is a smart, empowering book that dispels the myths around genius and creativity. There is a myth about how something new comes to be; that geniuses have dramatic moments of insight where great things and thoughts are born whole. Symphonies are composed complete. Science is accomplished with eureka shrieks. Businesses are built by magic touch. The myth is wrong. Anyone can create. Acclaimed technology pioneer Kevin Ashton takes us behind the scenes of creation to reveal the true process of discovery and how 'new' comes to be. From Archimedes to Apple, from Kandinsky to the Coke can, from the Wright brothers - who set out to 'fly a horse' - to Woody Allen, he exposes the seemingly unremarkable individuals, gradual steps, multiple failures and countless ordinary and often uncredited acts that led to our most astounding breakthroughs.

Horse Sense for People Parents Magazine Press

As a technology pioneer at MIT and as the leader of three successful start-ups, Kevin Ashton experienced firsthand the all-consuming challenge of creating something new. Now, in a tour-de-force narrative twenty years in the making, Ashton leads us on

a journey through humanity's greatest creations to uncover the surprising truth behind who creates and how they do it. From the crystallographer's laboratory where the secrets of DNA were first revealed by a long forgotten woman, to the electromagnetic chamber where the stealth bomber was born on a twenty-five-cent bet, to the Ohio bicycle shop where the Wright brothers set out to "fly a horse," Ashton showcases the seemingly unremarkable individuals, gradual steps, multiple failures, and countless ordinary and usually uncredited acts that lead to our most astounding breakthroughs. Creators, he shows, apply in particular ways the everyday, ordinary thinking of which we are all capable, taking thousands of small steps and working in an endless loop of problem and solution. He examines why innovators meet resistance and how they overcome it, why most organizations stifle creative people, and how the most creative organizations work. Drawing on examples from art, science, business, and invention, from Mozart to the Muppets, Archimedes to Apple, Kandinsky to a can of Coke, *How to Fly a Horse* is a passionate and immensely rewarding exploration of how "new" comes to be.
