Operating the energy networks involves exposure to electric and magnetic fields (EMFs), which are generated wherever there are currents or voltages. Health concerns from exposure to such fields and exposure levels to employees and members of the public are set within legislation. Electromagnetic fields - Energy Networks Association (ENA) The book gives an introduction to the field of communication circuit engineering and electrical network theory, from the standpoint of both currents and small fields. It provides a basic coverage of the theory of transmission of electric energy in lumped constant circuits, on distributed-constant lines, through waveguides and into space.
