These inter-disciplinary essays explore the foundational ambiguity of borders, their roles, functions and place in the Anglophone world, whether it be in history, politics, literature, art or music or, theoretically, in the critical relations between space, discourse and representation.

Images of ruins may represent the raw realities created by bombs, natural disasters, or factory closings, but the way we see and understand ruins is not raw or unmediated. Rather, looking at ruins, writing about them, and representing them are acts framed by a long tradition. This unique interdisciplinary collection traces discourses about and representations of ruins from a richly contextualized perspective. In the introduction, Julia Hell and Andreas Schönle discuss how European modernity emerged partly through a confrontation with the ruins of the premodern past. Several contributors discuss ideas about ruins developed by philosophers such as Immanuel Kant, Georg Simmel, and Walter Benjamin. One contributor examines how W. G. Sebald's novel *The Rings of Saturn* betrays the ruins erased or forgotten in the Hegelian philosophy of history. Another analyzes the repressed specter of being bombed out of existence that underpins post-Second World War modernist architecture, especially Le Corbusier's plans for Paris. Still another compares the ways that formerly dominant white populations relate to urban-industrial ruins in Detroit and to colonial ruins in Namibia. Other topics include atomic ruins at a Nevada test site, the connection between the cinema and ruins, the various narratives that have accrued around the Inca ruin of Vilcashuamán, Tolstoy's response in *War and Peace* to the destruction of Moscow in the fire of 1812, the Nazis' obsession with imperial ruins, and the emergence in Mumbai of a new "kinetic city" on what some might consider the ruins of a modernist city. By focusing on the concept of ruin, this collection sheds new light on modernity and its vast ramifications and complexities. Contributors: Kerstin Barndt, Jon Beasley-Murray, Russell A. Berman, Jonathan Bolton, Svetlana Boym, Amir Eshel, Julia Hell, Daniel Herwitz, Andreas Huyssen, Rahul Mehrotra, Johannes von Moltke, Vladimir Paperny, Helen Petrovsky, Todd Presner, Helmut Puff, Alexander Regier, Eric Rentschler, Lucia Saks, Andreas

The period between the French Revolution and the Second World War saw an unprecedented proliferation of mapmaking and map reading across modern European society. This book explores the age of cartophilia through the story of mapmaking in the disputed French-German borderland of Alsace-Lorraine. During the nineteenth and twentieth centuries, both French and Germans claimed Alsace-Lorraine as part of their national territories, fighting several bloody wars with each other that resulted in four changes to the borderland's nationality. In the process, the contested territory became a mapmaker's laboratory, a place subjected to multiple visual interpretations and competing topographies. And the mapmakers were not just professional border surveyors but rather people from all walks of life, including linguists, ethnographers, historians, priests, and schoolteachers. Empowered by their access to affordable new printing technologies and motivated by patriotic ideals, these popular mapmakers redefined the meaning and purpose of European borders during the age of nationalism."

◆ Here rests a happy man, that is to say, a man of high birth and position, which was very lucky for him, otherwise he would have been scarcely worth notice. It is beautiful to observe how wisely nature orders these things. He walked about in a coat embroidered all over, and in the drawing-rooms of society looked just like one of those rich pearl-embroidered bell-pulls, which are only made for show; and behind them always hangs a good thick cord for use. This man also had a stout, useful substitute behind him, who did duty for him, and performed all his dirty work. And there are still, even now, these serviceable cords behind other embroidered bell-ropes. It is all so wisely arranged, that a man may well be in a good humor.

This book explores the ways in which contemporary writers, artists, directors, producers and fans use the opportunities offered by popular fantasy to exceed or challenge norms of gender and sexuality, focusing on a range of media, including television episodes and series, films, video games and multi-player online role-play games, novels and short stories, comics, manga and graphic novels, and board games. Engaging directly with an enormously successful popular genre which is often overlooked by literary and cultural criticism, contributors pay close attention to the ways in which the producers of fantasy texts, whether visual, game, cinematic, graphic or literary texts, are able to play with gender and sexuality, to challenge and disrupt received notions and to allow and encourage their audiences to imagine ways of being outside of the constitutive constraints of socialized gender and sexual identity. With rich case studies from the US, Australia, UK, Japan and Europe, all concentrating not on the critique of fantasy texts which duplicate or reinforce existing prejudices about gender and sexuality, but on examining the exploration of or attempt to make possible non-normative gendered and sexual identities, this volume will appeal to scholars across the social sciences and humanities, with interests in popular culture, fantasy, media studies and gender and sexualities.

Fearless heroes, feisty princesses, sly magicians, terrifying dragons, talking foxes and miniature dogs. They all feature in this enthralling compendium of Chinese fairy tales and legends, along with an array of equally colourful characters and captivating plots. Although largely unknown in the West, the 70-plus stories in this volume are just as beguiling as the more familiar Grimms' Fairy Tales or Arabian Nights. They were collected in the early 20th century by Richard Wilhelm and first translated into English by Frederick H Martens. This beautifully produced revised and edited new edition includes updated notes which not only provide background on the tales, but also offer a fascinating insight into ancient Chinese folk lore and culture. These are stories to return to time and time again. From awesome adventures to quirky allegories, from the exploits of the gods to fables about beggars who outwit their betters, Chinese Fairy Tales and Legends is extraordinarily diverse and endlessly engaging. These wonderful stories have enduring and universal appeal, and will intrigue both children and adults.

In a 'post-everything' world, we have felt more pain than happiness in building and tampering with borders. The term 'border' has been expanded to become a ploy for grim, chauvinistic, self-flattery, and ultra-nationalist bigotry. We have also faced notorious coverage of the 'border' in the media worldwide, and its diverse forms have been extensively deployed in cinema and literature. Centering

on a wide range of literary and cinematic genres, the contributors to this volume explore and explain distinct theoretical and scholarly arguments to promote research on literary, linguistic, and media representations of the word 'border.'

Once upon a time, there was a misty blue mountain. Below the misty blue mountain was a wild, dark forest and by the wild, dark forest was a village. The village had a stream and a duck pond and an old red apple tree and it was home to Cinderella and her fairytale friends. The Fairytale Friends series brings fairy tales into the modern day and features scenarios that young children can relate to and learn from. Each story in this new picture book series focuses on a different fairy tale character, a different strength or core virtue, and a challenge to overcome, often with the help of their friends. Readers will enjoy spotting characters from other books and recognizing key elements of the original fairy tale while enjoying the new twist. Notes and questions at the back of the book will summarize what the character has learnt and prompt further discussion while activities will provide more fairytale fun. The 49th parallel has long held a symbolic importance to Canadian cultural nationalists as a strong, though permeable, border. But in contemporary Canadian culture, the border has multiple meanings, and imbalances of cultural power occur both across the Canada-US border as well as within Canada. *Discrepant Parallels* examines divergent relationships to, and investments in, the Canada-US border in a variety of media, such as travel writing, fiction, poetry, drama, and television. Tracing cultural production in Canada since the 1980s through the periods of FTA and NAFTA negotiations, and into the current, post-9/11 context, Gillian Roberts grapples with the border's changing relevance to Canadian nationalist, Indigenous, African Canadian, and Latin American perspectives. Drawing on Kant and Derrida, she theorizes the 49th parallel to account for the imbalance of cultural, political, and economic power between the two countries, as well as the current challenges to dominant definitions of Canadianness. Focusing on a border that is often overshadowed by the contentious US-Mexico divide, *Discrepant Parallels* analyzes the desire to establish Canadian-American sameness and difference from a multitude of perspectives, as well as its implications for how Canada is represented within and outside its national borders.
