Video game fans and book lovers alike will be swept into an undercover mission that might destroy the balance between good and evil forever in the conclusion to the Talespinners series, perfect for readers of *The Land of Stories*. After saving all of *Fable* twice now, Indira is recruited by the Anti-Heroes, a secret group trying to help overthrow the current tyrannical leader of Fester and rival

Antagonist Academy for villains-in-training. Indira poses as a new student and starts navigating the school's hierarchy, which includes participating in a virtual warfare called the Badlands. Facing monster teachers, plotting classmates, distracting love interests and combative old foes is all second nature to a hero like Indira. But what happens when that heroic nature is turned against her like a weapon? Can Indira get to the bottom of what's going on in Fester before this virtual battlescape spills over into a real war between good and evil for ultimate control of Imagination? *The Tyrant's Daughter* Bethany House Publishers

The fifth novel of adventure set upon His Majesty's New World. With new allies joining the war against the blue men, humans living on the new world have reason for optimism. But the enemy has not been sitting idly by, and having identified the weaknesses of the American Pacifica Territory, he is now poised to launch a new offensive. Reinforced by veteran General Sir Andrew Skeen and a division of elite soldiers from the Indian Army, the Royal Newfoundland Regiment must help defeat a blue assault, or both new and old worlds might be in peril. A battle will be fought amongst the rocks of The Badlands...

Tyrannosaurus Rex, the Tyrant King Yearling

Summary: Twelve-year-old Ricky goes undercover in Alberta, Canada, to infiltrate the gang of thugs that are thought to be vandalizing his great-aunt's mobile home park.

Lost Beneath Manhattan Pan Macmillan

The horned dinosaurs, a group of rhinoceros-like creatures that lived 100 to 65 million years ago, included one of the greatest and most popular dinosaurs studied today: Triceratops. Noted for his flamboyant appearance--marked by a striking array of horns over the nose and eyes, a long bony frill at the back of the head, and an assortment of lumps and bumps for attracting females--this herbivore displayed remarkable strength in its ability to fight off Tyrannosaurus rex. It was also among the last dinosaurs to walk the earth. In telling us about Triceratops and its relatives, the Ceratopsia, Peter Dodson here re-creates the sense of adventure enjoyed by so many scientists who have studied them since their discovery in the mid-nineteenth century. From the badlands of the Red Deer River in Alberta to the Gobi Desert, Dodson pieces together fossil evidence to describe the ceratopsians themselves--their anatomy, biology, and geography--and he evokes the

human dimension of their discovery and interpretation. An authoritative survey filled with many original illustrations, this book is the first comprehensive presentation of horned dinosaurs for the general reader. Dodson explains first the fascinating ways in which the ceratopsians dealt with their dangerous environment. There follows a lesson on ceratopsian bone structure, which enables the reader quickly to grasp the questions that still puzzle scientists, concerning features such as posture, gait, footprints, and diet. Dodson evenhandedly discusses controversies that continue, for example, over sexual dimorphism and the causes of the dinosaurs' disappearance. Throughout his narrative, we are reminded that dinosaur study is a human enterprise. We meet the scientists who charmed New York high society into financing expeditions to Mongolia, home of Triceratops' predecessors, as well as those who used their poker winnings to sustain paleontology expeditions. Rich in fossil lore and in tales of adventure, the world of the Ceratopsia is presented here for specialists and general readers alike. Originally published in 1996.
