To really nail the Science section of the ACT standardized exam, you have to understand basic principles of science - experimentation, data collection, numerical and graphic data analysis, and how to develop conceptual conclusions.

Who better to write the test prep book than an engineer who loves science? Michael Cerro uses his background as a chemical engineer, chess player, and highly-impactful ACT tutor with years of test prep experience to write a book that offers a new approach to ACT Test Prep rooted in: LOGIC. He brings together copious opportunities to practice with sample problems at each strategic lesson, using customized questions that feel just like the real test. Michael has an ability to create essential teaching moments on each page, as you walk through the book; and you may even have fun doing it! Above all, his love of the exam and of science ensure that anyone who uses this book - from teachers to tutors to students - will master the ACT Science section as well as gain a valuable understanding about the world of science that will be beneficial throughout life.

Two best friends document their post-college lives in a hilarious, relatable, and powerfully honest epistolary memoir. Fast friends since they met at Brown University during their freshman year, Jessica Pan and Rachel Kapelke-Dale vowed to keep in touch after their senior year through in-depth—and brutally honest—weekly e-mails. After graduation, Jess packs up everything she owns and moves to Beijing on a whim, while Rachel heads to New York to work for an art gallery and to figure out her love life. Each spends the next few years tumbling through adulthood and reinventing themselves in various countries, including France, China, and Australia. Through their messages from around the world, they swap tales of teaching classes of military men, running a magazine, and flirting in foreign languages, along with the hard stuff: from harrowing accidents to breakups and breakdowns. Reminiscent of Sloan Crosley's essays and Lena Dunham's

Girls, Graduates in Wonderland is an intimate, no-holds-barred portrait of two young women as they embark upon adulthood.

*The Master Key to Act Science* Princeton Review

Why is ACT Science often considered the most frustrating and chaotic section on the ACT? What kind of science does it actually test? The Master Key to ACT Science is systematically designed to thoroughly crack this dreaded chaos and provide both motivated and frustrated self-studiers with a crystal-clear roadmap to mastering the science section of the ACT and maximizing their ACT Science scores. FEATURES include The big picture of ACT Science: what's actually tested & what to focus on for the best results. The strategic MASTER KEY FORMULA = the shortest way to reach correct answers with speed and accuracy, outsmarting the test's overwhelming rush and chaos. All QUESTION PATTERNS on ACT Science = Your key to beating the clock! ACT Science questions follow consistent patterns. With the whole science section broken down into repeated patterns, mastering these patterns, you master the test! Recognizing which pattern the question at hand belongs to and knowing how to handle it allow you to think much less about what to do and answer it far faster with a minimal amount of reading. Tips, skills, and strategies specifically designed for every question pattern: each pattern is described in-depth in a separate sub-chapter with detailed examples to walk you through, so you will be able to recognize and master each, and eventually all, of the patterns there are on ACT Science. Sound strategies for swiftly reading and tackling the "Debating Scientists" or "Conflicting Viewpoints" passage to help

you ace what many students consider the hardest one. 20 drills + 4 chapter tests (full-length) to apply each and every pattern learned to real-test-style questions for total familiarity. 3 full-length science practice tests, formatted just like the real ACT Science Test, to exercise what you've acquired from this guide to master ACT Science and raise your score. A comprehensive review of "outside" science knowledge that covers all of the content pertaining to biology, chemistry, physics, and earth/space sciences tested by the ACT for perfect scorers. 6 real ACT Science Tests thoroughly explained! To maximize your ACT science score, you must know what the real testing experience feels like and thus cannot afford to do without ultimately practicing on real ACT Science questions, the diamond benchmark of authenticity set by the makers of the ACT that nobody can emulate. Thorough references to real ACT Science questions that fit the patterns described in this guide and in-depth answer explanations for the science sections of 6 real ACT Tests are provided herein, including ACT 74FPRE and ACT 72CPRE. While the real tests themselves are copyrighted materials and thus are not included in this book, many of them - floating around on the Internet - are publicly accessible. This perfect practice will let you apply what you've mastered from this guide to optimize your fluency with ACT Science and ensure that very few science questions will, if ever, surprise you on your ACT test day.

**BONUS!** Owning a copy of THE MASTER KEY TO ACT SCIENCE entitles you to free access to a continuously updated databank of ACT Science prep resources available online (see inside). You can keep practicing your way to perfection with guidance on applying the essence

of this guide to more real ACT Science questions and in-depth answer explanations for the science sections of the latest Official ACT Prep Guide!

Walking his two young children to school every morning, Thad Carhart passes an unassuming little storefront in his Paris neighborhood. Intrigued by its simple sign—Desforges Pianos—he enters, only to have his way barred by the shop's imperious owner. Unable to stifle his curiosity, he finally lands the proper introduction, and a world previously hidden is brought into view. Luc, the atelier's master, proves an indispensable guide to the history and art of the piano. Intertwined with the story of a musical friendship are reflections on how pianos work, their glorious history, and stories of the people who care for them, from amateur pianists to the craftsmen who make the mechanism sing. The Piano Shop on the Left Bank is at once a beguiling portrait of a Paris not found on any map and a tender account of the awakening of a lost childhood passion. Praise for *The Piano Shop on the Left Bank*: "[Carhart's] writing is fluid and lovely enough to lure the rustiest plunker back to the piano bench and the most jaded traveler back to Paris." —San Francisco Chronicle "Captivating . . . [Carhart] joins the tiny company of foreigners who have written of the French as verbs. . . . What he tries to capture is not the sight of them, but what they see." —The New York Times "Thoroughly engaging . . . In part it is a book about that most unpredictable and pleasurable of human experiences, serendipity. . . . The book is also about something more difficult to pin down, friendship and community." —The Washington Post "Carhart writes with a

sensuousness enhanced by patience and grounded by the humble acquisition of new insight into music, his childhood, and his relationship to the city of Paris.”
