Art and design students today face a wide range of writing tasks - from reflective and self-promotional pieces to reviews, essays and dissertations.

This book is an answer to art and design students and staff, disheartened by negative past experiences, who say that they loathe writing, and encourages different approaches to writing - integrating it into studio practice, and promoting the notion of 'warm up' preparations. This very practical volume, written for tutors and students, nurtures writing's creative role in the process of art and design. It uses short exercises and creative writing tec.

This book is for secondary subject matter teachers and administrators who work with English language learners (ELLs) in subject matter classes. It is also for college professors who prepare pre-service teachers to work with those students. The book brings together insights from linguistic, socio-cultural, educational, cognitive, developmental perspectives of what it means for ELLs to learn both English and subject matter knowledge in English as a second language. It delineates unique challenges that ELLs experience, offers ELLs' learning stories, and suggests concrete strategies with classroom teaching examples across academic disciplines. The 2nd edition broadens the scope of the 1st edition in several aspects. Specifically, it includes two chapters about secondary ELLs' previous educational experiences in their home countries, a chapter on subject matter lesson planning with ELLs in mind with teacher collaborative strategies, and more principle-based and field-tested effective instructional and assessment strategies for working with ELLs.

Academic Writing Now: A Brief Guide for Busy Students—with MLA 2016 Update Rowman & Littlefield Publishers

The double-entry journal strategy is easy to implement but should be used frequently to be effective. Students write in their own language about what they are learning. For teachers and students, entries influence learning by revealing problems, questions, connections, and concerns. Although it is a strategy most commonly found in language arts, social studies, science, reading, and math, students in elective classes such as "mythology and Computer sciences," "Shop," and fine arts can benefit as well. Double-entry journals serve a variety of purposes. Students record their thoughts and feelings or reactions to text excerpts or short films, online research, and/or to their own questions and areas of interest relating to the area being studied Our notebooks are preformatted with two columns already laid out with a topic and date header atop each page. The left column is labeled "From the text" as a simple prompt reminder that the left column is for referencing the page numbers and source material being studied. In the left column of the double-entry journal, students should reference vocabulary words, short quotations, or other passages from or features of the text that interest them or that elicit a strong response. They record the word, quotation or brief passage, either verbatim or in paraphrased form. In the right-hand column, (which we have labeled "From Your Mind") students record their reactions, feelings, interpretations, or other responses to the text segments/features they have selected. How does the double-entry journal help students? Some examples: To react to a writer's main idea, topic development, argument, etc. To keep track of their learning during question and answer sessions To look at specific lines and passages for clarity of meaning To interpret a line of poetry or to decide how they feel about a character (words, actions, etc.) To explore a topic or idea. (By being asked to explain what specific words or phrases mean, students will be able to reference reasons and evidence to support their views, their understandings.) Literacy in Grades 4-8 Routledge

How does language comprise the implicit or explicit curriculum of teaching and learning in multicultural science settings? Building on a growing interest in the ways in which language and literacy practices interact with science teaching and learning to facilitate or obstruct successful student outcomes, this book contributes to scholarship on the role of language in developing classroom scientific communities of practice, expands that work by highlighting the challenges faced specifically by ethnic- and linguistic-"minority" students and their teachers in joining those communities, and showcases exemplary teaching and research initiatives for helping to meet these challenges. Offering teacher practitioners and researchers in the fields of science education and multicultural education lenses through which they can critically consider the myriad of classroom settings, instructional approaches, curricular materials, and scientific topics involved in what it means to teach science while pointedly addressing concerns about equity of educational opportunity, this volume serves as a powerful resource for linking theory and practice. End-of-chapter reflection questions and engagement activities facilitate discussion round these issues and provide rich opportunities for the reader to consider the implications of each chapter for science instruction and research and to apply insights developed in a real-world science teaching and learning contexts.

Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are. Thoreau's account of his solitary and self-sufficient home in the New England woods remains an inspiration to the environmental movement - a call to his fellow men to abandon their striving, materialistic existences of 'quiet desperation' for a simple life within their means, finding spiritual truth through awareness of the sheer beauty of their surroundings.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization. *Teaching Language Arts to English Language Learners* Corwin Press

Closely aligned with the reflections standards set by INTASC, NCATE, and NBPST, this book is essential as universities and colleges seek to have reflection as a standard skill set for classroom teachers and educational administrators. Using this text as an easily accessible resource, a discussion and activities guide, and a support for professional development, Education Departments' reflection goals and objectives are met and students enter the classroom confident in their ability to think in diverse ways, meet the challenges of the classroom, and respond to changing educational environments.
