This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

To extract maximum performance, an engine needs an efficient, well-designed, and properly tuned exhaust system. In fact, the exhaust system's design, components, and materials have a large impact on the overall performance of the engine. Engine builders and car owners need to carefully consider the exhaust layout, select the parts, and fabricate the exhaust system that delivers the best performance for car and particular application. Master engine builder and award-winning writer Mike Mavrigian explains exhaust system principles, function, and components in clear and concise language. He then details how to design, fabricate, and fit exhaust systems to classic street cars as well as for special and racing applications. Air/exhaust-gas flow dynamics and exhaust system design are explained. Cam duration and overlap are also analyzed to determine how an engine breathes in air/fuel, as the exhaust must efficiently manage this burned mixture. Pipe bending is a science as well as art and you're shown how to effectively crush and mandrel bend exhaust pipe to fit your header/manifold and chassis combination. Header tube diameter and length is taken into account, as well as the most efficient catalytic converters and resonators for achieving your performance goals. In addition, Mavrigian covers the special exhaust system requirements for supercharged and turbocharged systems. When building a high-performance engine, you need a high-performance exhaust system that's tuned and fitted to that engine so you can realize maximum performance. This comprehensive book is your guide to achieving ultimate exhaust system performance. It shows you how to fabricate a system for custom applications and to fit the correct prefabricated system to your car. No other book on the market is solely dedicated to fabricating and fitting an exhaust system in high-performance applications.

This book touches briefly on my youngest brothers' life growing up, and how we lost track of each other numerous times but always seemed to re-unite. The love we had for each other was fully tested during a period in his life where he was finally growing up and taking responsibility on. Tragic circumstances derailed his life, and because of a critical lapse in judgment on night, the lives of many were permanently changed forever. He tried to deal with the death of his girlfriend who died after an accident they had on his motorcycle, but after six weeks he have up and lost the battle and took his own life. This book is about a gut wrenching, knock down, no punches pulled fight to keep him alive, because I saw in his eyes that he no longer wanted to live with the pain from his actions. Two totally different families were involved in this tragedy, which took two young lives, and things sometimes got out of control. This book will take you on a mental ride that I would not wish on

anyone. Trying to justify his suicide was impossible, but I tried. The human mind can withstand an enormous amount of pain, I found that out. It also has a breaking point, and my brother found that out as well. The aftermath of suicide especially for a loved one, is sometimes unbearable, but you have to go on. This book deals with his love, his life, the accident scene, the hospital, legal situations, his suicide, the funeral, and how some of the members of both families, were affected. I have come through this ordeal mentally intact, but I still live with the thought "could I have stopped my brother from taking his life"? I am afraid to answer that.
