Look for Robyn's new book, *The Best of Us*, a story about family, second chances and choosing to live your best life—order your copy today! Welcome to Grace Valley, California— where blood runs thicker...ties are stronger...and love is all the more sweet. Visitors to the town often remark about the valley's peace and beauty—both of which are plentiful. Unlocked doors, front porches, pies cooling in the windows—this is country life at its finest. But visitors don't always see what lies at the heart of a community. Or just beyond... June Hudson grew up in Grace Valley, the daughter of the town doctor. Leaving only to get her medical training, she returned home and followed in her father's footsteps. Some might say she chose the easy, comfortable route...but June knows better. For June, her emergency room is wherever she's needed—or wherever a patient finds her. She is always on call, her work is her life and these people are her extended family. Which is a good thing, since this is a town where you should have picked your husband in the ninth grade. Grace Valley is not exactly the place to meet eligible men—until an undercover DEA agent suddenly starts appearing at all sorts of strange hours. Everybody has secrets down in the valley. Now June has one of her own.

A Grizzly on the other hand just seems to have a cantankerous nature that causes him to challenge anything that enters his territory. I had been told that the last Grizzly in these mountains had been killed over fifty years ago. Someone was wrong in this assessment, because these claw marks were fresh. They had to have been made within the last day or two because the cuts in the bark were deep and still bleeding with sap. I stopped and pointed them out to Gale. She turned pale. She took out her camera and said. "Dad is not going to believe this."

This work examines the social reality of a Hindu woman's involvement in the transmission of religious knowledge. The two-year ethnographic study traces the steps of Dalit women in an urban village in New Delhi, India, in which Dr. Yim explores the mother's role in life cycle rituals, festivals, vrats (ritual fasts), and daily life. In this study, Yim attempts to bridge the gap between the word of religious texts and the reality of the women's lives. Despite the tradition of religious texts to overlook the role of women as teachers, this study found that women are the primary agents of religious knowledge transmission. The Dalit women in this study convey their erudition through informal education, such as observation; worship; imitation; and family responsibilities. The implications of this study are not only to validate informal education as an effective means of teaching, but to confirm the central role Hindu women have in the transmission of religious knowledge to their children.

This unforgettable odyssey into the distant past carries us back to the awesome mysteries of the exotic, primeval world of The Clan of the Cave Bear,

and to Ayla, now grown into a beautiful and courageous young woman. Cruelly cast out by the new leader of the ancient Clan that adopted her as a child, Ayla leaves those she loves behind and travels alone through a stark, open land filled with dangerous animals but few people, searching for the Others, tall and fair like herself. The short summer gives her little time to look, and when she finds a sheltered valley with a herd of hardy steppe horses, she decides to stay and prepare for the long glacial winter ahead. Living with the Clan has taught Ayla many skills but not real hunting. She finally knows she can survive when she traps a horse, which gives her meat and a warm pelt for the winter, but fate has bestowed a greater gift, an orphaned foal with whom she develops a unique kinship. One winter extends to more; she discovers a way to make fire more quickly and a wounded cave lion cub joins her unusual family, but her beloved animals don't fulfill her restless need for human companionship. Then she hears the sound of a man screaming in pain. She saves tall, handsome Jondalar, who brings her a language to speak and an awakening of love and desire, but Ayla is torn between her fear of leaving her valley and her hope of living with her own kind.

A lyrical and poignant novel from one of America's greatest storytellers, the author of *To Dance with the White Dog*. On a sunny summer day in 1948, Noah Locke arrives in Bowerstown, a small North Carolina community bordered by lakes and set deep in the Valley of Light. A quiet, simple man and a war veteran, Noah has a mystical gift for fishing, yet he remains haunted by the war and by the terrible scenes he witnessed when his infantry unit liberated Dachau. His wandering—doing odd jobs and catching fish for sale or trade—is both an escape from his past and a search for a place to call home. In the valley, Noah is initially treated with amusement by the locals he meets at Taylor Bowers's general store—until he begins fishing. Once they see his almost magical skills, however, he becomes the talk of the valley and is urged to stay long enough to participate in the annual school fishing contest. He agrees, accepting a job offer by Taylor to paint his store when he isn't filling orders for fish. He finds lodging in an abandoned shack by a small lake the locals call the Lake of Grief and, also, the Lake of No Fish, because they think all the fish have disappeared. Noah knows they are wrong. Beneath the water is a warrior bass waiting to test Noah's gift. In the way that innocence creates powerful events, Noah meets Eleanor Cunningham, a young widow whose husband supposedly killed himself after returning home from the war. Over the course of a week, Noah will be led into the secret lives of the residents of the Valley of Light, will join them as they mourn a tragedy, and will experience a miracle that will guide him home at last. Luminous, memorable, and deeply moving, *The Valley of Light* is the finest work to date from a brilliant storyteller.

Valley of Opportunity recreates an age when Indians, colonists, and post-Revolutionary settlers embraced a similar dream: to create a successful economy in the rural hinterland of the middle colonies. Peter C. Mancall draws on abundant evidence from seldom-used archives in the region, as well as from libraries on both sides of the Atlantic, to reconstruct their daily economic life. The author describes the varied economic transformations that took place in the area, considering these changes from an environmental as well as an economic standpoint. He shows how different groups of people perceived the resources of the region and how their perceptions shaped settlement patterns, land use, and the formation of commercial networks. Ultimately, each of the three peoples looked beyond the mountains that set the boundaries of their physical world and tried to establish ties to the larger commercial network that linked North America to Europe. Mancall offers connections between the development of a particular region, previously overlooked by most historians, and the wide pattern of American economic change. He breaks through old ethnocentric barriers of settlement history by portraying Indian people in their full diversity and by including Indians and whites as actors of comparable significance, and he shows how attitudes that developed in the colonial period affected economic patterns well beyond the Revolution. Integrating a range of disciplines, from anthropology through ecology and geography to zoology, he seeks to answer the questions: what did different groups of people make of the natural resources of this river valley and how did they allocate the rewards? His answers provide a novel overview of the economic culture of the eighteenth century. Studded with sharp insights and attention-catching quotations that mirror everyday life of the times, *Valley of Opportunity* will appeal to those interested in the development of the American economy, the impact of the Revolution on urban Americans, and the relations between the peoples who together created a vibrant world along the edges of European settlement in North America.

Arizona's San Pedro Valley is a natural corridor through which generations of native peoples have traveled for more than 12,000 years, and today many tribes consider it to be part of their ancestral homeland. This book explores the multiple cultural meanings, historical interpretations, and cosmological values of this extraordinary region by combining archaeological and historical sources with the ethnographic perspectives of four contemporary tribes: Tohono O'odham, Hopi, Zuni, and San Carlos Apache. Previous research in the San Pedro Valley has focused on scientific archaeology and documentary history, with a conspicuous absence of indigenous voices, yet Native Americans maintain oral traditions that provide an anthropological context for interpreting the history and archaeology of the valley. The San Pedro Ethnohistory Project was designed to redress this situation by visiting archaeological sites, studying museum collections, and interviewing tribal members to collect traditional histories. The information it gathered is arrayed in this book along with archaeological and documentary data to interpret the histories of Native American occupation of the San Pedro Valley. This work provides an example of the kind of interdisciplinary and politically conscious work made possible when Native Americans and archaeologists collaborate to study the past. As a methodological case study, it clearly articulates how scholars can work with Native American stakeholders to move beyond confrontations over who "owns" the past, yielding a more nuanced, multilayered, and relevant archaeology.

A Commentary on THE MINOR PROPHETS University Press of America

There is a perception that the region of north-east India maintained its 'splendid isolation' and remained outside the reach of the Mughals and did not have a pre-colonial past. The present book is an attempt to decenter and demolish the said perceptions and asserts that north-east India had a 'medieval' past through linkage with the dominant central power in India - the Mughals. The eastern frontier of this Mughal Empire was constituted by

a number of states like Bengal, Koch Bihar, Assam, Manipur, Dimasa, Jaintia, Cachar, Tripura, Khasi confederation, Chittagong, Lushai and the Nagas. Of these, some areas like Bengal were an integral part of the Mughal Empire, while others like Koch Bihar and Assam were in and out of the empire. Tripura, Manipur, Jaintia and Cachar were frequently overrun by the Mughals whenever the State was short of revenue and withdrew soon without incorporating them in the state. Despite not being a formal part of the Mughal Empire, the society, economy, polity and culture of the north-east India, however, had been majorly impacted by the Mughal presence. The brief, but effective advent of the Mughals had supplanted certain political and revenue institutions in various states. It generated trade and commerce, which linked it to the rest of India. A number of wondering Sufi saints, Islamic missionaries, imprisoned Mughal soldiers and officers were settled in various states, which resulted in a substantial Muslim population growth in the region. Besides the population, there are numerous Islamic and syncretic institutions, cultures, and shrines which dot the entire region.

In the 1970s, while their contemporaries were protesting the computer as a tool of dehumanization and oppression, a motley collection of college dropouts, hippies, and electronics fanatics were engaged in something much more subversive. Obsessed with the idea of getting computer power into their own hands, they launched from their garages a hobbyist movement that grew into an industry, and ultimately a social and technological revolution. What they did was invent the personal computer: not just a new device, but a watershed in the relationship between man and machine. This is their story. *Fire in the Valley* is the definitive history of the personal computer, drawn from interviews with the people who made it happen, written by two veteran computer writers who were there from the start. Working at InfoWorld in the early 1980s, Swaine and Freiburger daily rubbed elbows with people like Steve Jobs and Bill Gates when they were creating the personal computer revolution. A rich story of colorful individuals, *Fire in the Valley* profiles these unlikely revolutionaries and entrepreneurs, such as Ed Roberts of MITS, Lee Felsenstein at Processor Technology, and Jack Tramiel of Commodore, as well as Jobs and Gates in all the innocence of their formative years. This completely revised and expanded third edition brings the story to its completion, chronicling the end of the personal computer revolution and the beginning of the post-PC era. It covers the departure from the stage of major players with the deaths of Steve Jobs and Douglas Engelbart and the retirements of Bill Gates and Steve Ballmer; the shift away from the PC to the cloud and portable devices; and what the end of the PC era means for issues such as personal freedom and power, and open source vs. proprietary software.

How to repair the disconnect between designers and users, producers and consumers, and tech elites and the rest of us: toward a more democratic internet. In this provocative book, Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics, economics, and other inefficient, inharmonious human activities. We may love the immediacy of Google search results, the convenience of buying from Amazon, and the elegance and power of our Apple devices, but it's a one-way, top-down process. We're not asked for our input, or our opinions—only for our data. The internet is brought to us by wealthy technologists in Silicon Valley and China. It's time, Srinivasan argues, that we think in terms beyond the Valley. Srinivasan focuses on the disconnection he sees between designers and users, producers and consumers, and tech elites and the rest of us. The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy. In search of a more democratic internet, Srinivasan takes us to the mountains of Oaxaca, East and West Africa, China, Scandinavia, North America, and elsewhere, visiting the "design labs" of rural, low-income, and indigenous people around the world. He talks to a range of high-profile public figures—including Elizabeth Warren, David Axelrod, Eric Holder, Noam Chomsky, Lawrence Lessig, and the founders of Reddit, as well as community organizers, labor leaders, and human rights activists.. To make a better internet, Srinivasan says, we need a new ethic of diversity, openness, and inclusivity, empowering those now excluded from decisions about how technologies are designed, who profits from them, and who are surveilled and exploited by them.

*Named one of Wall Street Journal's Best Books of 2015 *Selected as a Military Times's Best Book of the Year "You're going up the Valley." Black didn't know its name, but he knew it lay deeper and higher than any other place Americans had ventured. You had to travel through a network of interlinked valleys, past all the other remote American outposts, just to get to its mouth. Everything about the place was myth and rumor, but one fact was clear: There were many valleys in the mountains of Afghanistan, and most were hard places where people died hard deaths. But there was only one Valley. It was the farthest, and the hardest, and the worst. When Black, a deskbound admin officer, is sent up the Valley to investigate a warning shot fired by a near-forgotten platoon, he can only see it as the final bureaucratic insult in a short and unhappy Army career. What he doesn't know is that his investigation puts at risk the centuries-old arrangements that keep this violent land in fragile balance, and will launch a shattering personal odyssey of obsession and discovery as Black reckons with the platoon's dark secrets, accumulated over endless hours fighting and dying in defense of an indefensible piece of land. The Valley is a riveting tour de force that changes our understanding of the men who fight our wars and announces John Renehan as one of the great American storytellers of our time.

Kashur-The Kashmiri Speaking People is the out come of a dedicated research where in the author on the basis of geological, archeological, chronological and linguistic evidences has presented a truthful and unbiased account of the group she herself belongs to. She projects, and rightly so, that the Kashur from the ancient eras possessed highly developed spiritual and intellectual caliber that helped these people per se to evolve into one of the richest social, religious and literary cultural linguistic group. In this effort she has analyzed and given clarification to certain commonly held

misconceptions. She explains that legends created by primitive ancestors are not myths made up as entertaining stories but are based on reality and are representations of the living truth that has been perceived by the compilers. Those interested in the rich cultural heritage of the Kashur, their architectural acumen, their proficiency in historicity, their mastery in languages, their zeal as torch bearers of various religions, and their ever-changing social order inclusive of their faults and foibles will find this book a great help and a guide. This book even records the excesses, hardships and tyrannies that the Kashur has had to face under the rule of various invaders and usurpers in their long political chronology of almost 5,000 years and the struggles they have had put in, to survive these onslaughts bravely and at times even slyly.

Major sections of Muslims presently living in Barak Valley were converted from local indigenous tribes due to the spiritual influence of holy Arabian saints coming from the Middle East. Tea tribes of Assam having only 150 years of history of settlement in Assam and the subjects of Ahom kings living in Assam are considered as indigenous, while Muslims, the subjects of contemporary Koch kings and Kachari kings, living in Assam with 700/800 years of settlement history have not been considered as indigenous or Assamese Khilonjia. This book explores the roots of Hindus and Muslims living in Barak Valley. Bengali Hindus and Muslims living in Assam should look back to their history if they want to live in Assam in a dignified manner. Our past history is our strength, not weakness.

The first installment in an epic historical trilogy by Helen Bryan, the bestselling author of War Brides and The Sisterhood, The Valley is a sweeping,

unforgettable tale of hardship, tenacity, love, and heartache. Left suddenly penniless, the Honorable Sophia Grafton, a viscount's orphaned daughter, sails to the New World to claim the only property left to her name: a tobacco plantation in the remote wilds of colonial Virginia. Enlisting the reluctant assistance of a handsome young French spy--at gunpoint-- she gathers an unlikely group of escaped slaves and indentured servants, each seeking their own safe haven in the untamed New World. What follows will test her courage and that of her companions as they struggle to survive a journey deep into a hostile wilderness and eventually forge a community of homesteads and deep bonds that will unite them for generations.
