collaborated for over 25 years with Franca Helg and at a time when professional male-female partnerships were virtually unknown. His museums and installation motifs changed the way Italians displayed historic artifacts. He composed novel suspension structures for dwellings, shops, galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects. Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space. His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities. He explored new fabrication technologies, from the scale of furniture to wide-span steel structures, yet he never abandoned the rigors of craft and detail in favor of mass-production. *Suspending Modernity* follows the evolution of Albini's most important buildings and projects, even as they reveal his apprehensive attitudes about the modern condition. Jones argues here that Albini's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period. So Not Happening Ashgate Publishing, Ltd.

New York's social darling just woke up in a nightmare: Oklahoma. Problem is, it's right where God wants her. Bella Kirkwood had it all--A-list friends, Broadway in her backyard, Daddy's credit card. Then her father decided to trade in her mother for a newer model. After that, her mom fell in love with a man she met on the Internet and moved the family to Truman, Oklahoma. To a farm no less! But that's just the beginning of Bella's problems. Her semi-pro-wrestler stepdad signs up the family for a reality TV show. As if having a camera crew follow her around isn't bad enough, Bella discovers a conspiracy against the Truman High prom queen candidates. And that's before the arrival of the Fritz Family Carnival with its creepy clown. Bella is one skinny-mocha frappe away from a total meltdown. How can a girl go on when her charmed life is gone and God appears to be giving her the total smack down?

New York's social darling just woke up in a nightmare: Oklahoma.

Problem is, it's right where God wants her. Bella Kirkwood had it all: A-list friends at her prestigious private school, Broadway in her backyard, and Daddy's MasterCard in her wallet. Then her father, a plastic surgeon to the stars, decided to trade her mother in for a newer model. When Bella's mom falls in love with a man she met on the Internet--a factory worker with two bratty sons--Bella has to pack up and move in with her new family in Truman, Oklahoma. On a farm no less! Forced to trade her uber-trendy NYC lifestyle for down-home charm, Bella feels like a pair of Rock & Republic jeans in a sea of Wranglers. At least some of the people in her new high school are pretty cool. Especially the hunky football player who invites her to lunch. And maybe even the annoying--but kinda hot--editor of the school newspaper. But before long, Bella smells something rotten in the town of Truman, and it's not just the cow pasture. With her savvy reporter's instincts, she is determined to find the story behind all the secrets. How can a girl go on when her charmed life is gone and God appears to be giving her the total smackdown?

Today, nearly a century after the National Fascist Party came to power in Italy, questions about the built legacy of the regime provoke polemics among architects and scholars. Mussolini's government constructed thousands of new buildings across the Italian Peninsula and islands and in colonial territories. From hospitals, post offices and stadia to housing, summer camps, Fascist Party Headquarters, ceremonial spaces, roads, railways and bridges, the physical traces of the regime have a presence in nearly every Italian town. The Routledge Companion to Italian Fascist Architecture investigates what has become of the architectural and urban projects of Italian fascism, how sites have been transformed or adapted and what constitutes the meaning of these buildings and cities today. The essays include a rich array of new arguments by both senior and early career scholars from Italy and beyond. They examine the reception of fascist architecture through studies of destruction and adaptation, debates over reuse, artistic interventions and even routine daily practices, which may slowly alter collective understandings of such places. Paolo Portoghesi sheds light on the subject from his internal perspective, while Harald Bodenschatz situates Italy among period totalitarian authorities and their symbols across Europe. Section editors frame, synthesize and moderate essays that explore fascism's afterlife; how the physical legacy of the regime has been altered and preserved and what it means now. This critical history of interpretations of fascist-era architecture and urban projects broadens our understanding of the relationships among politics, identity, memory and place. This companion will be of interest to students and scholars in a range

of fields, including Italian history, architectural history, cultural studies, visual sociology, political science and art history. *Expressman's Monthly* Heinemann Educational Books

Franco Albini's works of architecture and design, produced between 1930 and 1977, have enjoyed a recent revival but to date have received only sporadic scholarly attention from historians and critics of the Modern Movement. A chorus of Italian voices has sung his praises, none more eloquently than his protégé, Renzo Piano. Kay Bea Jones' illuminating study of selected works by Studio Albini will reintroduce his contributions to one of the most productive periods in Italian design. Albini emerged from the ideology of Rationalism to produce some of Italy's most coherent and poetic examples of modern design. He collaborated for over 25 years with Franca Helg and at a time when professional male-female partnerships were virtually unknown. His museums and installation motifs changed the way Italians displayed historic artifacts. He composed novel suspension structures for dwellings, shops, galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects. Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space. His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities. He explored new fabrication technologies, from the scale of furniture to wide-span steel structures, yet he never abandoned the rigors of craft and detail in favor of mass-production. *Suspending Modernity* follows the evolution of Albini's most important buildings and projects, even as they reveal his

apprehensive attitudes about the modern condition. Jones argues here that Albini's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period.
