The Nazis' dark secrets are revealed, in a tense and compelling thriller from bestselling author Ian Slater. June 1944. The moment has come. The Allied pincers are closing in. Hitler has already ordered his jet fighters, V-1 flying bombs, and V-2 rockets into action. Now, in a desperate bid to keep his war machine churning, it is time for the führer to use the most secret weapon of all. For G.I. David Adam, it's a mission into hell. To stop Hitler's mad plan will take him and others into the lion's den, under the shadow of the SS—where exposure means death, but being killed is better than being taken alive... Only a handful of courageous men and women can stop Hitler's terrifying superweapon, and helped by French resistance fighters, Jewish slave laborers, and members of the

Polish underground, these few will fight the most critical battle of the entire war.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
