Los Angeles transportation's epic scale--its iconic freeways, Union Station, Los Angeles International Airport and the giant ports of its shores--has obscured many offbeat transit stories of

moxie and eccentricity. Triumphs such as the Vincent Thomas Bridge and Mac Barnes's Ground Link buspool have existed alongside such flops as the Santa Monica Freeway Diamond Lane and the Oxnard-Los Angeles Caltrain commuter rail. The City of Angels lacks a propeller-driven monorail and a freeway in the paved bed of the Los Angeles River, but not for a lack of public promoters. Horace Dobbins built the elevated California Cycleway in Pasadena, and Mike Kadletz deployed the Pink Buses for Orange County kids hitchhiking to the beach. Join Charles P. Hobbs as he recalls these and other lost episodes of LA-area transportation lore.

Susan Orlean's bestseller and New York Times Notable Book is "a sheer delight...as rich in insight and as varied as the treasures contained on the shelves in any local library" (USA TODAY)—a dazzling love letter to a beloved institution and an investigation into one of its greatest mysteries. "Everybody who loves books should check out *The Library Book*" (The Washington Post). On the morning of April 28, 1986, a fire alarm sounded in the Los Angeles Public Library. The fire was disastrous: it reached two thousand degrees and burned for more than seven hours. By the time it

was extinguished, it had consumed four hundred thousand books and damaged seven hundred thousand more. Investigators descended on the scene, but more than thirty years later, the mystery remains: Did someone purposefully set fire to the library—and if so, who? Weaving her lifelong love of books and reading into an investigation of the fire, award-winning New Yorker reporter and New York Times bestselling author Susan Orlean delivers a “delightful...reflection on the past, present, and future of libraries in America” (New York magazine) that manages to tell the broader story of libraries and librarians in a way that has never been done before. In the “exquisitely written, consistently entertaining” (The New York Times) *The Library Book*, Orlean chronicles the LAPL fire and its aftermath to showcase the larger, crucial role that libraries play in our lives; delves into the evolution of libraries; brings each department of the library to vivid life; studies arson and attempts to burn a copy of a book herself; and reexamines the case of Harry Peak, the blond-haired actor long suspected of setting fire to the LAPL more than thirty years ago. “A book lover’s dream...an ambitiously researched, elegantly written book that serves as a portal into a place of history, drama, culture, and stories” (Star Tribune, Minneapolis), Susan Orlean’s thrilling journey through the stacks reveals how these beloved institutions provide much more than just books—and why they remain an essential part of the heart, mind, and soul of our country. *Richard Wright* Arcadia Publishing

The Three R’s Plus Carson-Dellosa Publishing

The Three R’s Plus was first published in 1956. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. Do the schools still teach the three R’s or are they neglecting these fundamentals? Should boys and girls be made to study things that don’t interest them? What’s happened to the report card? Have drill and memorization a place in today’s teaching methods? What are the basic ideas behind modern education? Questions like these are constantly being asked by parents and other responsible citizens in a sincere effort to learn more about what the public schools are doing and why. Such questions deserve thoughtful and thorough answers that will provide a basis for realistic understanding and constructive thinking about present-day schools. In this book, educators themselves explain, in understandable terms, the concepts, the methods, and the aims that underlie our public school teaching today. Thirty-one experts contribute chapters about their particular fields. The chapters are arranged in sections on Changed and Changing Conceptions, Subjects and Services, and Issues and Interest. The book explains modern educational philosophy and describes the methods of teaching, as applied to specific subject fields, that are based on these theories. The final section discusses such controversial problems as the financial support of the schools and the role of religion in the public school. The majority of the contributors are members of the faculty of the University of Minnesota but among the authors are included also several administrators in the Minneapolis and St. Paul public school systems.

An introduction to the rapidly growing category of New Adult (NA) literature, this text provides a roadmap to understanding and introducing NA books to young people in high school, college, libraries, and other settings. As a window into the experiences and unique challenges that young and new adults encounter, New Adult literature intersects with but is distinct from Young Adult literature. This rich resource provides a framework, methods, and plentiful reading recommendations by genre, theme, and discipline on New Adult literature. Starting with a definition of New Adult literature, Kane demonstrates how the inclusion of NA literature helps support and encourage a love of reading. Chapters address important topics that are relevant to young people, including post-high school life, early careers, relationships, activism, and social change. Each chapter features text sets, instructional strategies, writing prompts, and activities to invite and encourage young people to be reflective and engaged in responding to thought-provoking texts. A welcome text for professors of literacy and literature instruction, first-year college instructors, researchers, librarians, and educators, this book provides new ways to assist students as they embark upon the next stage of their lives and is essential reading for courses on

teaching literature.

The American Journal of Sociology Taylor & Francis

How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan’s Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan’s story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Supplementary Education Scholastic Inc.

In *Supplementary Education*, the editors argue that while access to schools that enable and expect academic achievement is a necessary ingredient for the education of students, schools alone may not be sufficient to ensure universally high levels of academic development. Supplemental educational experiences may also be needed. The idea of supplementary education is based on the assumption that high academic achievement is closely associated with exposure to family and community-based activities and learning experiences that occur both in and out of school in support of academic learning. For low income and some ethnic minority student groups, opportunities to participate in such activities are generally under-resourced and underutilized in comparison to the access to and participation in such activities by many European- and Asian-Americans from mid to high socio-economic backgrounds. This book makes the case for supplementary education. Specifically, it focuses on the need for universal access to high levels of academic achievement, and the challenge of reducing the ‘achievement gap’ that exists between Asian American and European American students and their African American, Latina/o, and Native American counterparts. Having posed the problem, the editors define the construct and provide in-depth descriptions of some of the more colloquial expressions of supplementation in after school care, youth development, and other forms of supplemental education. The editors close with a discussion of the emerging institutionalization and need for more thoughtful and rigorous research of the supplementary education movement.

NEW YORK TIMES BESTSELLER • From the governor of Maryland, the “compassionate” (People), “startling” (Baltimore Sun), “moving” (Chicago Tribune) true story of two kids with the same name: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly

killed a police officer in a spectacularly botched armed robbery. The police were still hunting for two of the suspects who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn't shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods,

both were fatherless; they'd hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, *The Other Wes Moore* tells the story of a generation of boys trying to find their way in a hostile world.
