Frontiers in Offshore Geotechnics III Springer Nature

The world is beset by a pandemic of obesity and type 2 diabetes and the need for new drugs is startlingly clear; recent years have seen a huge increase in research activity to fill this gap. The development of new drugs for diabetes and obesity must be founded upon a sound appreciation of the pathophysiology of these common disorders. The dual defects of insulin resistance and impaired insulin secretion are fundamental to the pathogenesis and progression of obesity-associated type 2 diabetes. There is a need to explain how new drugs can counter insulin resistance and insulin deficiency to a broad range of professionals, from clinical scientists active in early (and later) phase drug development to specialist physicians and increasingly primary care doctors who must tailor drug regimens to the individual patient. Clinical research methods for measuring insulin action and insulin secretion have become well-established in proof-of-mechanism studies; however, selection of the best techniques is by no means straightforward. The

purpose of the book is to aid the selection of the most appropriate techniques for assessing insulin action, insulin secretion and body composition in humans (with particular reference to new drugs) in phase 1 and 2 studies and aid the understanding of drug effects and non-drug treatment strategies on key biochemical-hormonal defects of obesity and type 2 diabetes. The book will assume a working knowledge of human physiology relating to glucose metabolism and will be of interest to biomedical scientists, pharmacologists, academics involved in metabolic research and clinicians practicing in these specialties.

The 8th International Conference on Physical Modelling in Geotechnics (ICPMG2014) was organised by the Centre for Offshore Foundation Systems at the University of Western Australia under the auspices of the Technical Committee 104 for Physical Modelling in Geotechnics of the International Society of Soil Mechanics and Geotechnical Engineering. This quadrennial conference is the traditional focal point for the physical modelling community of academics, scientists and engineers to present and exchange the latest developments on a wide range of physical modelling aspects associated with geotechnical engineering. These proceedings, together with the seven previous

proceedings dating from 1988, present an inestimable collection of the technical and scientific developments and breakthroughs established over the last 25 years. These proceedings include 10 keynote lectures from scientific leaders within the physical modelling community and 160 peer-reviewed papers from 26 countries. They are organised in 14 themes, presenting the latest developments in physical modelling technology, modelling techniques and sensors, through a wide range of soil-structure interaction problems, including shallow and deep foundations, offshore geotechnics, dams and embankments, excavations and retaining structures and slope stability. Fundamental aspects of earthquake engineering, geohazards, ground reinforcements and improvements, and soil properties and behaviour are also covered, demonstrating the increasing complexity of modelling arising from state-of-the-art technological developments and increased understanding of similitude principles. A special theme on education presents the latest developments in the use of physical modelling techniques for instructing undergraduate and postgraduate students in geotechnical engineering.

Addressing all major advanced practice nursing competencies, roles, and issues, *Advanced Practice Nursing: An Integrative Approach*, 5th Edition provides a clear, comprehensive, and current introduction to APN today. It applies APN core competencies to the major APN roles - including the burgeoning Nurse Practitioner role - and covers topics ranging from the evolution of APN to evidence-based practice, leadership, ethical decision-making, and health policy. This edition includes a new chapter on the international development of APN, new and enhanced illustrations, and a colorful new reader-friendly format for improved readability. From internationally known APN experts Ann Hamric, Charlene Hanson, Mary Fran Tracy, and Eileen O'Grady, along with a host of internationally recognized APN contributors, *Advanced Practice Nursing* introduces you to APN and helps you identify an APN role, develop key competencies for that role, and succeed as an APN. Coverage of APN core competencies defines and describes all competencies, including direct clinical practice, guidance and coaching, consultation, evidence-based practice (EBP), leadership, collaboration, and ethical decision-making. Operationalizes and applies APN core competencies to the major APN specialties including the Clinical Nurse Specialist, the Primary Care Nurse Practitioner, the Acute Care Nurse Practitioner, the Certified Nurse-Midwife, and the Certified Registered Nurse Anesthetist. Content on managing APN environments addresses such factors as business planning and reimbursement; marketing, negotiating, and contracting; regulatory, legal, and credentialing requirements; health policy issues; and nursing outcomes and performance improvement research. Unique Exemplar boxes provide real-life scenarios, showing APN competencies in action. In-depth discussions of educational strategies show how nurses develop competencies as they progress into advanced practice. Discussions of APN role development clearly explain the career trajectory that you can anticipate as you transition to advanced practice. EXPANDED international focus includes a NEW International Development of Advanced Practice Nursing chapter that addresses common issues such as the public image and status of APN, dealing with physician resistance, discrepancies in titling, and educational standardization. ENHANCED reader-friendly format includes more headings, tables, and illustrations in lieu of long stretches of unbroken text. REVISED Evidence-Based Practice chapter emphasizes the key competency of evidence-based practice (EBP) and includes a comprehensive history and explanation of the steps of the EBP process. UPDATED Health Policy chapter covers key U.S. initiatives affecting APN including the Patient Protection and Affordable Care Act, the Institute of Medicine's Future of Nursing report, the Consensus Model of APRN Regulation, and how APNs can engage in the political process. ENHANCED Exemplar boxes (case studies), including Day in the Life vignettes of each APN specialty, emphasize innovative practices and coverage of advanced practice roles. Increased interprofessional content emphasizes the subjects of ethics, collaboration, and consultation. Enhanced integration of Doctor of Nursing Practice (DNP) considerations and literature makes this text ideal for DNP programs.

Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions Springer Nature

Model Uncertainties in Foundation Design is unique in the compilation of the largest and the most diverse load test databases to date, covering many foundation types (shallow foundations, spudcans, driven piles, drilled shafts, rock sockets and helical piles) and a wide range of ground conditions (soil to soft rock). All databases with names prefixed by NUS are available upon request. This book presents a comprehensive evaluation of the model factor mean (bias) and coefficient of variation (COV) for ultimate and serviceability limit state based on these databases. These statistics can be used directly for AASHTO LRFD calibration. Besides load test databases, performance databases for other geo-structures and their model factor statistics are provided. Based on this extensive literature survey, a practical three-tier scheme for classifying the model uncertainty of geo-structures according to the model factor mean and COV is proposed. This empirically grounded scheme can underpin the calibration of resistance factors as a function of the degree of understanding - a concept already adopted in the Canadian Highway Bridge Design Code and being considered for the new draft for Eurocode 7 Part 1 (EN 1997-1:202x). The helical pile research in Chapter 7 was recognised by the 2020 ASCE Norman Medal.

Geotechnical and Geophysical Site Characterization 4 CRC Press

Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions contains invited, keynote and theme lectures and regular papers presented at the 7th International Conference on Earthquake Geotechnical Engineering (Rome, Italy, 17-20 June 2019). The contributions deal with recent developments and advancements as well as case histories, field monitoring, experimental characterization, physical and analytical modelling, and applications related to the variety of environmental phenomena induced by earthquakes in soils and their effects on engineered systems interacting with them. The book is divided in the sections below: Invited papers Keynote papers Theme lectures Special Session on Large Scale Testing Special Session on Liquefact Projects Special Session on Lessons learned from recent earthquakes Special Session on the Central Italy earthquake Regular papers *Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions* provides a significant up-to-date collection of recent experiences and developments, and aims at engineers, geologists and seismologists, consultants, public and private contractors, local national and international authorities, and to all those involved in research and practice related to Earthquake Geotechnical Engineering.

Remington: The Science and Practice of Pharmacy, Twenty Third Edition, offers a trusted, completely updated source of information for education, training, and development of pharmacists. Published for the first time with Elsevier, this edition includes coverage of biologics and biosimilars as uses of those therapeutics have increased substantially since the previous edition. Also discussed are formulations, drug delivery (including prodrugs, salts, polymorphism). With clear, detailed color illustrations, fundamental information on a range of pharmaceutical science areas, and information on new developments in industry, pharmaceutical industry scientists, especially those involved in drug discovery and development will find this edition of *Remington* an essential reference. Intellectual property professionals will also find this reference helpful to cite in patents and resulting litigations. Additional graduate and postgraduate students in Pharmacy and Pharmaceutical Sciences will refer to this book in courses dealing with medicinal chemistry and pharmaceuticals. Contains a comprehensive source of principles of drug discovery and development topics, especially for scientists that are new in the pharmaceutical industry such as those with trainings/degrees in chemistry and engineering Provides a detailed source for formulation scientists and compounding pharmacists, from produg to excipient issues Updates this excellent source with the latest information to verify facts and refresh on basics for professionals in the broadly defined pharmaceutical industry

Download CPT Study Material for December 2017. ICAI has released CPT Time Table for Dec 2017. So it's time start CPT Preparation. CPT Students will get CA CPT Study material (Text Books) after completion of CA CPT Registration. ICAI Will send CPT Text books through speed post courier to students who register for CA CPT Course. But it takes too much time. So Students, don't worry about your CPT Exam preparation. Here you can get soft copies of CA CPT Study material 2017 in pdf format of both Hindi and English.

Practice Test for the American Academy of Professional Coders' CPC Exam Elsevier Health Sciences *Frontiers in Offshore Geotechnics III* comprises the contributions presented at the Third International Symposium on Frontiers in Offshore Geotechnics (ISFOG, Oslo, Norway, 10-12 June 2015), organised by the Norwegian Geotechnical Institute (NGI). The papers address current and emerging geotechnical engineering challenges facing those working in off **Accounting and Finance for Bankers - JAIB Exam 2022 (Paper 2) | 5 Full-length Mock Tests With Detailed Solutions** EduGorilla Community Pvt. Ltd.

1. 100% Based on NCERT Guidelines. 2. Important questions have been include chapterwise and unitwise. 3. Previous year questions with answers of board examinations have been included. 4. Solved Model Test Papers for board examination preparation for the current year have been included. 1. Accounting for Not-for-Profit Organizations, 2. Accounting for Partnership Firms : Fundamentals, 3. Reconstitution of Partnership—Change in Profit-Sharing Ratio among the Existing Partners, 4. Goodwill : Meaning, Nature, Factors Affecting and Methods of Valuation, 5. Reconstitution of Partnership : Admission of a Partner, 6. Reconstitution of Partnership : Retirement of a Partner, 7. Reconstitution of Partnership : Death of a Partner, 8. Dissolution of a Partnership Firm, 9. Issue, Forfeiture and Re-issue of Shares, 10 . Issue of Debentures, 11. Redemption of Debentures, 12. Financial Statements of a Company : Balance Sheet of A Company, 13. Financial (Statements) Analysis, 14. Tools of Financial Analysis : Comparative Statements, 15. Accounting Ratios, 16. Cash Flow Statement. Model Paper Set 1-2(BSEB) (With OMR Sheet) Board Examination Paper (CBSE).

FUNDAMENTALS OF ACCOUNTING FOR CPT S. Chand Publishing

This exciting collection tours virtual reality in both its current therapeutic forms and its potential to transform a wide range of medical and mental health-related fields. Extensive findings track the contributions of VR devices, systems, and methods to accurate assessment, evidence-based and client-centered treatment methods, and—as described in a stimulating discussion of virtual patient technologies—innovative clinical training. Immersive digital technologies are shown enhancing opportunities for patients to react to situations, therapists to process patients' physiological responses, and scientists to have greater control over test conditions and access to results. Expert coverage details leading-edge applications of VR across a broad spectrum of psychological and neurocognitive conditions, including: Treating anxiety disorders and PTSD. Treating developmental and learning disorders, including Autism Spectrum Disorder, Assessment of and rehabilitation from stroke and traumatic brain injuries. Assessment and treatment of substance abuse. Assessment of deviant sexual interests. Treating obsessive-compulsive and related disorders. Augmenting learning skills for blind persons. Readable and relevant, *Virtual Reality for Psychological and Neurocognitive Interventions* is an essential idea book for neuropsychologists, rehabilitation specialists (including physical, speech, vocational, and occupational therapists), and neurologists. Researchers across the behavioral and social sciences will find it a roadmap toward new and emerging areas of study.

Dynamics of decision making: from evidence to preference and belief Springer

The development of the Chronic Care Model (CCM) for the care of patients with chronic diseases has focused on the integration of taking charge of the patient and his family within primary care. The major critical issues in the implementation of the CCM principles are the non-application of the best practices, defined by EBM guidelines, the lack of care coordination and active follow-up of clinical outcomes, and by inadequately trained patients, who are unable to manage their illnesses. This book focuses on these points: the value of an integrated approach to some chronic conditions, the value of the care coordination across the continuum of the illness, the importance of an evidence-based management, and the enormous value of the patients involvement in the struggle

against their conditions, without forgetting the essential role of the caregivers and the community when the diseases become profoundly disabling.

CPT 2012 CRC Press

This book, written for the benefit of engineering students and practicing engineers alike, is the culmination of the author's four decades of experience related to the subject of electrical measurements, comprising nearly 30 years of experimental research and more than 15 years of teaching at several engineering institutions. The unique feature of this book, apart from covering the syllabi of various universities, is the style of presentation of all important aspects and features of electrical measurements, with neatly and clearly drawn figures, diagrams and colour and b/w photos that illustrate details of instruments among other things, making the text easy to follow and comprehend. Enhancing the chapters are interspersed explanatory comments and, where necessary, footnotes to help better understanding of the chapter contents. Also, each chapter begins with a "recall" to link the subject matter with the related science or phenomenon and fundamental background. The first few chapters of the book comprise "Units, Dimensions and Standards"; "Electricity, Magnetism and Electromagnetism" and "Network Analysis". These topics form the basics of electrical measurements and provide a better understanding of the main topics discussed in later chapters. The last two chapters represent valuable assets of the book, and relate to (a) "Magnetic Measurements", describing many unique features not easily available elsewhere, a good study of which is essential for the design and development of most electric equipment - from motors to transformers and alternators, and (b) "Measurement of Non-electrical Quantities", dealing extensively with the measuring techniques of a number of variables that constitute an important requirement of engineering measurement practices. The book is supplemented by ten appendices covering various aspects dealing with the art and science of electrical measurement and of relevance to some of the topics in main chapters. Other useful features of the book include an elaborate chapter-by-chapter list of symbols, worked examples, exercises and quiz questions at the end of each chapter, and extensive authors' and subject index. This book will be of interest to all students taking courses in electrical measurements as a part of a B.Tech. in electrical engineering. Professionals in the field of electrical engineering will also find the book of use.

Primary Care in Practice Springer Science & Business Media

The culmination of more than 25 years of clinical work and research, this is the authoritative presentation of cognitive processing therapy (CPT) for posttraumatic stress disorder (PTSD). Written by the treatment's developers, the book includes session-by-session guidelines for

implementation, complete with extensive sample dialogues and 40 reproducible client handouts. It explains the theoretical and empirical underpinnings of CPT and discusses how to adapt the approach for specific populations, such as combat veterans, sexual assault survivors, and culturally diverse clients. The large-size format facilitates photocopying and day-to-day use. Purchasers also get access to a Web page where they can download and print the reproducible materials. CPT is endorsed by the U.S. Departments of Veterans Affairs and Defense, the International Society of Traumatic Stress Studies, and the U.K. National Institute for Health and Care Excellence (NICE) as a best practice for the treatment of PTSD.

Issues in Geology and Mineralogy / 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Hydrometallurgy. The editors have built *Issues in Geology and Mineralogy: 2013 Edition* on the vast information databases of ScholarlyNews.™ You can expect the information about Hydrometallurgy in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of *Issues in Geology and Mineralogy: 2013 Edition* has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

IOS Press

This book addresses the questions of what constitutes the integrative learning of theory and practice (ILTP), and how this learning progresses over time - these are important questions that have been overlooked to date. It introduces a new way of looking at the theory-practice integration and presents the conceptual and empirical research that has led to such a view. The conceptualisation of the ILTP and the description of the phenomenon of integration draw on psychological aspects of epistemological beliefs in TVET, and on philosophical aspects of social reasoning. In this inferentialist, non-dualistic epistemological perspective, theory and practice are distinguished in terms of their use in reasoning, rather than as intrinsically different forms of knowledge. In particular, the integrative learning is presented in terms of qualitative changes in chains of reasoning that connect theoretical and practical considerations. This work represents a contribution to further educational research, as it advances a novel operationalisation of the

inferentialist framework. Finally, this work contributes to educational practice, as it offers evidence-based guidelines for practitioners concerned with instructional design in T-VET. The reported empirical investigations involved in-depth qualitative research methods and were conducted at a micro-level of instruction in alternating school-based and work-based programmes, in the field of Chemicals Processing Technology (CPT).

Advanced Practice Nursing HC Pro, Inc.

At the core of the many debates throughout cognitive science concerning how decisions are made are the processes governing the time course of preference formation and decision. From perceptual choices, such as whether the signal on a radar screen indicates an enemy missile or a spot on a CT scan indicates a tumor, to cognitive value-based decisions, such as selecting an agreeable flatmate or deciding the guilt of a defendant, significant and everyday decisions are dynamic over time. Phenomena such as decoy effects, preference reversals and order effects are still puzzling researchers. For example, in a legal context, jurors receive discrete pieces of evidence in sequence, and must integrate these pieces together to reach a singular verdict. From a standard Bayesian viewpoint the order in which people receive the evidence should not influence their final decision, and yet order effects seem a robust empirical phenomena in many decision contexts. Current research on how decisions unfold, especially in a dynamic environment, is advancing our theoretical understanding of decision making. This Research Topic aims to review and further explore the time course of a decision - from how prior beliefs are formed to how those beliefs are used and updated over time, towards the formation of preferences and choices and post-decision processes and effects. Research literatures encompassing varied approaches to the time-scale of decisions will be brought into scope: a) Speeded decisions (and post-decision processes) that require the accumulation of noisy and possibly non-stationary perceptual evidence (e.g., randomly moving dots stimuli), within a few seconds, with or without temporal uncertainty. b) Temporally-extended, value-based decisions that integrate feedback values (e.g., gambling machines) and internally-generated decision criteria (e.g., when one switches attention, selectively, between the various aspects of several choice alternatives). c) Temporally extended, belief-based decisions that build on the integration of evidence, which interacts with the decision maker's belief system, towards the updating of the beliefs and the formation of judgments and preferences (as in the legal context). Research that emphasizes theoretical concerns (including optimality analysis) and mechanisms underlying the decision process, both neural and cognitive, is presented, as well as research that combines experimental and computational levels of analysis.
