LESTER BRODERICK

Federal Register Aviation Supplies & Academics

From Aviation Supplies & Academics, trusted publisher of Federal Aviation Administration resources. This book is also available bundled with ASA Inspection Authorization Test Prep. This FAA-CT-8080-8D is the most current testing supplement, released by the FAA in June 2008. It supersedes the earlier FAA-CT-8080-8C, dated 2005. This publication was prepared by the Flight Standards Service of the Federal Aviation Administration (FAA) for the specific purpose of Inspection Authorization (IA) testing at selected testing centers. Applicants for Inspection Authorization Certificates will be required to use FAA-CT-8080-8D, Computer Testing Supplement for Inspection Authorization, to answer the computer-assisted IA airman knowledge test questions. The supplement material consists of excerpts of selected advisory circulars, airworthiness directives, Code of Federal Regulations, type certificate data sheets, aircraft specifications, FAA orders, and forms. Applicants should note that reference material contained in this supplement is for testing purposes only. To ensure current material is available for use in day-to-day certification activities, users should be aware that they must initiate and order

the publications desired, and maintain contact with the managing FAA office for the latest information, forms, and guidance.

Piedmont Hangar Tales: Stories from Fifty Years of Aviation
In Central North Carolina
Lulu Press, Inc
DIANE Publishing

A native of rural Guilford County, North Carolina, Charles Causey has been involved in the aviation field most of his life as a pilot, aircraft mechanic, and aircraft parts manufacturer. He was just thirteen years old when he learned to fly and seventeen years old when he earned his private pilot certification.

During those many years in the business, most days proved to be mundane and routine. Some days, however, held excitement and challenges. In *Piedmont Hangar Tales*, Causey shares a collection of stories from his experiences working in the aviation industry. Some of the narratives are humorous, some are family stories, some are almost unbelievable (but actually happened), and some are historical. Though he grew up on the farm, he didn't make his living by farming.
