## CARTER MCMAHON

Being the Rhind Lectures in Archæology for 1888 Manchester University Press  
 The 15 papers in this volume, delivered to an international conference held at the Katholieke Universiteit Leuven in the Fall of 2001, offer a systematic investigation into Polybius's many critiques and attempt to assess their potentially distortive effects.

Catalogue of Scientific Papers (1800-1900): Supplementary volume. 1800-1883 Walter de Gruyter GmbH & Co KG

An examination of groups and individuals in Rome who were not Roman Catholic, or not born so. It demonstrates how other religions had a lasting impact on early modern Catholic institutions in Rome.

*European Democratic Institutions and Administrations* Getty Publications

Looking at Catholic charity and social policy in past times, this book focuses on 'unrespectable' women and children in Italy, and their treatment at the hands of charities and the law. It looks at prostitutes and women engaged in sexual relationships outside formal marriage, and foundlings, many of whom were abandoned because they were born out of wedlock. A wide-ranging synoptic survey, this study considers the practical complications and consequences of communities' decisions to accommodate and regulate activities considered bad but irrepressible: of the belief that licensed prostitution and controlled abandonment could be used to avert greater evils, from sodomy and adultery to infanticide and abortion. Accessibly written, *Tolerance, regulation and rescue* discusses social problems which are still the subject of debate, and should appeal not only to academics and students, but also to general readers.

TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks, as well as studies that provide new insights by approaching language from an interdisciplinary perspective. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

**(parte prima)** Walter de Gruyter GmbH & Co KG

Taking a new approach to the study of cross-cultural trade, this book blends archival research with historical narrative and economic analysis to understand how the Sephardic Jews of Livorno, Tuscany, traded in regions near and far in the seventeenth and eighteenth centuries. Francesca Trivellato tests assumptions about ethnic and religious trading diasporas and networks of exchange and trust. Her extensive research in international archives—including a vast cache of merchants' letters written between 1704 and 1746—reveals a more nuanced view of the business relations between Jews and non-Jews across the Mediterranean, Atlantic Europe, and the Indian Ocean than ever before. The book argues that cross-cultural trade was predicated on and generated familiarity among strangers, but could coexist easily with religious prejudice. It analyzes instances in which business cooperation among coreligionists and between strangers relied on language, customary norms, and social networks more than the progressive rise of state and legal institutions.

*Language and Philology in Romance* Good Press

The general scope of the present volume is to present a variety of approaches and topics within the growing field of research on Byzantine aesthetics. Theurgy in Neoplatonic and Christian contexts is represented by the contributions of W.-M. Stock and L. Bergemann; theories of beauty are at the

centre of interest of the papers by S. Mariev and M. Marchetto. A. Pizzone approaches Byzantine aesthetics by looking for aesthetic experience in the literary texts, while the remaining contributions explore issues related to the iconoclast controversy: An important moment in the development of Byzantine philosophy on the eve of iconoclasm is the primary interest of A. del Campo Echevarria, who looks at the question of universals in John of Damaskos. The relationship between image and text in Byzantine illustrated manuscripts occupies the attention of B. Crostini. D. Afinogenov explores from a philological perspective the fate of important iconophile terminology in Old Bulgarian, while L. Lukhovitskij reconstructs from historical and philological perspectives the historical memory of the iconoclast controversy during the Late Byzantine Period.

**Studies in Early Monastic Literature and Scriptural Interpretation** BRILL

This book is the first major study in English of a group of late twelfth-century religious enthusiasts, the early Humiliati, who were condemned by the Church as heretics in 1184. However, in a remarkable transition, they were reconciled seventeen years later and went on to establish a highly successful religious order in north Italy. The Humiliati have been accorded little attention in previous studies both because of their local nature and because of the suppression of the Order in 1571, after one of their number made a disastrous attempt to murder Charles Borromeo. Using a combination of a wide range of sources, the nature of the early movement and its processes of institutional development are reconstructed. The book also includes a Bullarium Humiliatorum, a calendar of papal and episcopal letters and privileges, which will be of great use to scholars in the field.

The role of religion was of paramount importance in the change of attitudes and approaches to health care and charity which took place in the centuries following the Council of Trent. *Health Care and Poor Relief in Counter-Reformation Europe*, examines the effects of the Counter-Reformation on health care and poor relief in Southern Catholic Europe in the period between 1540 and 1700. As well as a comprehensive introduction discussing issues of the nature of the Catholic or Counter-Reformation and the welfare provisions of the period, *Health Care and Poor Relief* sets the period in its social, economic, religious and ideological context. The book draws on the practices in different localities in Southern Europe, ranging from the Republic of Venice and the Kingdom of Naples to Germany and Austria. These examples establish how and why a revitalised and strengthened post-Tridentine Catholic church managed to reshape and reinvigorate welfare provisions in Southern Europe.

Routledge

An incisive, unified account of modern poetry in the Western tradition, arguing that the emergence of the lyric as a dominant verse style is emblematic of the age of the individual. Between the end of the eighteenth century and the beginning of the twentieth, poetry in the West was transformed. The now-common idea that poetry mostly corresponds with the lyric in the modern sense—a genre in which a first-person speaker talks self-referentially—was foreign to ancient, medieval, and Renaissance poetics. Yet in a relatively short time, age-old habits gave way. Poets acquired unprecedented freedom to write obscurely about private experiences, break rules of meter and syntax, use new vocabulary, and entangle first-person speakers with their own real-life identities. Poetry thus became the most subjective genre of modern literature. *On Modern Poetry* reconstructs this metamorphosis, combining theoretical reflections with literary history and close readings of poets from Giacomo Leopardi to Louise Glück. Guido Mazzoni shows that the evolution of modern poetry involved significant changes in the way poetry was perceived, encouraged the construction of first-person poetic personas, and dramatically altered verse style. He interprets these developments as symptoms of profound historical and cultural shifts in the modern period: the crisis of tradition, the rise of individualism, the privileging of self-expression and its paradoxes. Mazzoni also reflects on the place of poetry in mass culture today, when its role has been largely assumed by popular

music. The result is a rich history of literary modernity and a bold new account of poetry's transformations across centuries and national traditions.

Il testo si propone di offrire ai laureati in scienze giuridiche, iscritti alla Scuola per le professioni legali dell'Università Cattolica, gli elementi utili per un approfondimento dello studio del diritto amministrativo. In un corso di laurea universitario lo studio del diritto amministrativo ha necessariamente un carattere istituzionale. Di conseguenza deve concentrarsi su alcune nozioni fondamentali, che in genere, per ragioni didattiche, vengono illustrate nei loro termini più netti e consolidati. Chi conosce il diritto amministrativo sa bene, però, che la materia è caratterizzata da una particolare problematicità degli istituti e dei suoi stessi fondamenti, e questa problematicità è testimoniata dalla varietà delle posizioni che sono espresse quotidianamente dalla giurisprudenza e dalla dottrina anche rispetto a profili nodali. D'altra parte il diritto amministrativo rispecchia in modo intenso e diretto le caratteristiche e le contraddizioni della società: la circostanza che su molti temi la discussione non sia pervenuta a risultati definitivi rappresenta forse, anzi, uno dei motivi di fascino della materia. Per i laureati che intendano affrontare più da vicino lo studio della materia non è sufficiente una preparazione secondo il modello dei corsi universitari: è necessario confrontarsi più da vicino con dibattiti spesso ancora aperti. Agli allievi della Scuola per le professioni legali è chiesto perciò di acquisire una consapevolezza dei maggiori temi in discussione e comunque di riuscire a disporre di tutti gli strumenti essenziali per poter comprendere le diverse tesi. In questo modo è possibile attingere alla cultura in cui è ambientato il diritto amministrativo, cultura alla quale, si spera, anche i nostri laureati daranno in futuro un contributo. Questa, appunto, è la ragione del testo curato da Giovanni D'Angelo. Tratto dalla Presentazione

**Reflecting on the Theory and Practice of Mosaic Conservation** University of Texas Press

In 150 years Italy transformed itself from a poor and backward country into one where living standards are among the highest in the world. In *Measuring Wellbeing*, Giovanni Vecchi provides an innovative analysis of this change by drawing on family accounts that provide engaging insights into life and are the "micro" data that create the foundations for the "macro" picture of variations and fluctuations in the development of Italy. Vecchi provides a nuanced account of the changes. He emphasizes that the concept of wellbeing is multidimensional and must include non-monetary aspects of life: nutrition, health and education, as well as less tangible elements such as freedom or the possibility to exercise one's political rights. The book deals with this polyhedral nature of wellbeing. Among the insights are that Italians succeeded in combining growth with equity, but that the gap between the North and South did not narrow; the while longevity has increased, education has not improved as much as it could have; and that for close to three decades, Italy's virtuous path has come to a halt: the wellbeing of the Italian people is at the crossroads between progress and decline. *Measuring Wellbeing* engagingly combines a unique dataset and an innovative statistical method that can be adapted to other countries.

Annually published since 1930, the International bibliography of Historical Sciences (IBOHS) is an international bibliography of the most important historical monographs and periodical articles published throughout the world, which deal with history from the earliest to the most recent times. The works are arranged systematically according to period, region or historical discipline, and within this classification alphabetically. The bibliography contains a geographical index and indexes of persons and authors.

Walter de Gruyter

This book presents the results of extensive international comparative research into the effects of the economic and financial crisis on democratic institutions and social cohesion policies. The collected studies describe and analyse the measures (often referred to as "reforms") adopted to counter the crisis and the effects of these measures. It investigates three areas: the impact on the functioning of institutions, with respect to the relationship between representative institutions and governments, and the organisational structure of administrations at national and local levels; the impact that the austerity policies on public spending have on social rights; and the impact on traditional instruments of public action (administrative simplification, public services delivering, the use of common assets). The general findings highlight the effect of reducing the administrative and government capacity of the democratic institutions: the public sector, rather than being innovative and made more effective, declines, offering increasingly poor public services and making bad decisions, fuelling substantive or formal privatisation solutions, which in turn cause further weakening.

Sicily has been the fulcrum of the Mediterranean throughout history. The island's central geographical position and its status as ancient Rome's first overseas province make it key to understanding the development of the Roman Empire. Yet Sicily's crucial role in the empire has been largely overlooked by scholars of classical antiquity, apart from a small number of specialists in its archaeology and material culture. *Urbanism and Empire in Roman Sicily* offers the first comprehensive English-language overview of the history and archaeology of Roman Sicily since R. J. A. Wilson's *Sicily under the Roman Empire* (1990). Laura Pfunter traces the development of cities and settlement networks in Sicily in order to understand the island's political, economic, social, and cultural role in Rome's evolving Mediterranean hegemony. She identifies and examines three main processes traceable in the archaeological record of settlement in Roman Sicily: urban disintegration, urban adaptation, and the development of alternatives to urban settlement. By expanding the scope of research on Roman Sicily beyond the bounds of the island itself, through comparative analysis of the settlement landscapes of Greece and southern Italy, and by utilizing exciting evidence from recent excavations and surveys, Pfunter establishes a new empirical foundation for research on Roman Sicily and demonstrates the necessity of including Sicily in broader historical and archaeological studies of the Roman Empire.

This research focusses attention on the social-demographic, agricultural and tourist aspects of the 29 municipalities of the Molise Region, in order to provide new elements and details in a distributive and diachronic analysis and underline the link between new data and old problems which require collective actions to reach common purposes and to enhance the local resources according to the different vocations. After the examination of numerous statistical data which are also represented through GIS elaborations, quality of products and processes, multi-functional and inter-sectorial relationships, fast and slow scenarios, new or renewed forms of tourism accommodation, internet and tourist social technologies, social agriculture and neo-agrarianism, slow and creative tourism, the high environmental quality, enriched by historical and cultural heritage, become some of the keywords around which the geographical analysis is conducted. The present study seeks both to provide useful input for a meticulous and weighted planning, according to a resource-based approach, and to define a reference framework for people who are no longer live in Molise Region and Italy, but who are still emotionally attached to their native lands and keep alive the memories for their origins or for the origins of their parents.

**The Lake-Dwellings of Europe** University of Chicago Press

After colonizing the Aegean islands and the coast of Asia Minor, the ancient Greeks turned toward southern Italy and Sicily, driven by the unrest that troubled their homeland in the eighth and seventh centuries B.C. The new arrivals brought with them their language, as well as their cultural and religious traditions and the institution of the polis. In Italy they created an autonomous political community that eventually surpassed the cities of Greece in wealth, military power, and architectural and cultural splendor. Such forefathers of Western philosophy as Pythagoras, Parmenides, and Archimedes lived and worked within this civilization. The Greek Cities of Magna Graecia and Sicily presents an overview of Greek colonization in Italy and the principal historical events that took place in this area from the Archaic period until the ascendancy of the Romans. This comprehensive survey is followed by a review of the major archaeological sites in the region.
