This first volume examines how sexual mores and behavior, religious dogma and practice, and artistic creativity and authenticity have influenced, and been influenced by, the existentialist thought of Kierkegaard, Heidegger, Sartre, Nietzsche, Husserl and Buber, and the writings of Camus, Dostoevsky, Beckett, Kafka and Shostakovich. It compares the author's personality theory with those of Freud, Jung, Fairbairn, Karl Abraham and Melanie Klein, and Buddhist, Gnostic, Christian and Muslim mysticism with Jewish Kabbalah. It explains society's harsh treatment of Carlo Gesualdo, Vincent van Gogh and Antonin Artaud, and analyzes the existentialist approach to existence, absurdity, human dialogue, and suicide. It will appeal to students and professionals in fields as diverse as philosophy, psychology, sociology, anthropology, religion, law, music, art, drama, literature and biology.

Prayer is a major topic within Christian theology. The biblical text has various references to various recorded and reported prayers. In fact, references to prayer are found within the rich diversity of the various books, corpora and genres of Scripture. As can be expected, much has been written about prayer in the biblical text. However, a comprehensive Biblical Theology dealing with the concept of prayer in Scripture has not been published before, and this book intends to fill this gap, assuming that such an approach can provide a valuable contribution to the theological discourse on prayer and related concepts. This book aims to investigate prayer and its related elements - including worship, praise, thanksgiving, adoration, petition, intercession, lament and confession - in the Old Testament on a book-by-book or corpus-by-corpus basis. The investigation follows a Biblical Theological approach, reading the Old Testament on a book-by-book basis in its final form to uncover the Old Testament's overarching theology of prayer, understanding the parts in relation to the whole. By doing this, the discrete nuances of the prayers of the different Old Testament books and corpora can be uncovered, letting the books and corpora speak for themselves. In addition, the advantage of this approach is that it provides findings that can benefit the modern Christian community and contribute to the practice of Reformed theology in Africa. This book is of significant value to scholars. It will inspire scholars to think about prayer and use the Bible as the major 'prayer handbook' in their spiritual lives.

Comics are a pervasive art form and an intrinsic part of the cultural fabric of most countries. And yet, relatively little has been written on the translation of comics. *Comics in Translation* attempts to address this gap in the literature and to offer the first and most comprehensive account of various

aspects of a diverse range of social practices subsumed under the label 'comics'. Focusing on the role played by translation in shaping graphic narratives that appear in various formats, different contributors examine various aspects of this popular phenomenon. Topics covered include the impact of globalization and localization processes on the ways in which translated comics are embedded in cultures; the import of editorial and publishing practices; textual strategies adopted in translating comics, including the translation of culture- and language-specific features; and the interplay between visual and verbal messages. Comics in translation examines comics that originate in different cultures, belong to quite different genres, and are aimed at readers of different age groups and cultural backgrounds, from Disney comics to Art Spiegelman's *Maus*, from Katsuhiro Ōtomo's *Akira* to Goscinny and Uderzo's *Astérix*. The contributions are based on first-hand research and exemplify a wide range of approaches. Languages covered include English, Italian, Spanish, Arabic, French, German, Japanese and Inuit. The volume features illustrations from the works discussed and an extensive annotated bibliography. Contributors include: Raffaella Baccolini, Nadine Celotti, Adele D'Arcangelo, Catherine Delesse, Elena Di Giovanni, Heike Elisabeth Jüngst, Valerio Rota, Carmen Valero-Garcés, Federico Zanettin and Jehan Zitawi.

Catholic theology has to face a certain number of fundamental questions: what is the nature and content of Christian revelation, what are the sources of revelation, how are the mysteries of the faith to be understood in relation of one to another, and how do the truths of the Catholic faith relate to the acquisitions of natural reason. In the contemporary context, Catholic theology is marked by a diversity of approaches, many of which are seemingly incompatible or estranged from one another. How might we think about the unity of Catholic theology over and above the diversity of forms? What role, if any, can Aquinas play as a common doctor in facilitating exchanges between theological traditions in the Church? *Principles of Catholic Theology* seeks to address directly the nature of Catholic theology and the challenge of its contemporary articulation with an eye towards its articulation in its Thomistic key. This book is also the first of a series of collections of essays by Thomas Joseph White, OP, extending over a range of fundamental topics in Catholic dogmatic theology.

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's *Book of the Damned* was originally published, the strange phenomenon presented in this book remains largely unexplained by

modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

This is an exploration of house churches, especially in Poland. The book begins with a review of literature about the "global house church movement" and continues with an article on the early Christian transition from house churches to purpose-built buildings for churches. Next is an article regarding the concept of "sacred space" in relation to house churches. The first half concludes with a chapter on methodology of research for a qualitative interview approach to studying house churches. The thesis then presents a theological method for using the qualitative interviews to develop ecclesiology. Sixteen interviews from thirteen house churches are presented. The thesis continues the theological method by attempting to answer the question "why is it going on" and presents a thematic analysis from the qualitative interviews that includes input from sociological research done in Poland. The thesis concludes by using scriptural and academic sources in conversation with house church interviews from the interviews and global house church literature to present four primary conclusions in a practical-prophetic ecclesiology.

A History of Preaching brings together narrative history and primary sources to provide the most comprehensive guide available to the story of the church's ministry of proclamation. Bringing together an impressive array of familiar and lesser-known figures, Edwards paints a detailed, compelling picture of what it has meant to preach the gospel. Pastors, scholars, and students of homiletics will find here many opportunities to enrich their understanding and practice of preaching. Volume 1, appearing in the print edition, contains Edwards's magisterial retelling of the story of Christian preaching's development from its Hellenistic and Jewish roots in the New Testament, through the late-twentieth century's discontent with outdated forms and emphasis on new modes of preaching such as narrative. Along the way the author introduces us to the complexities and contributions of preachers, both with whom we are already acquainted, and to whom we will be introduced here for the first time. Origen, Chrysostom, Augustine, Bernard, Aquinas, Luther, Calvin, Wesley, Edwards, Rauschenbusch, Barth; all of their distinctive contributions receive careful attention. Yet lesser-known figures and developments also appear, from the ninth-century reform of preaching championed by Hrabanus Maurus, to the reference books developed in the thirteenth and

fourteenth centuries by the mendicant orders to assist their members' preaching, to Howell Harris and Daniel Rowlands, preachers of the eighteenth-century Welsh revival, to Helen Kenyon, speaking as a layperson at the 1950 Yale Beecher lectures about the view of preaching from the pew. Volume 2, contained on the enclosed CD-ROM, contains primary source material on preaching drawn from the entire scope of the church's twenty centuries. The author has written an introduction to each selection, placing it in its historical context and pointing to its particular contribution. Each chapter in Volume 2 is geared to its companion chapter in Volume 1's narrative history. Ecumenical in scope, fair-minded in presentation, appreciative of the contributions that all the branches of the church have made to the story of what it means to develop, deliver, and listen to a sermon, *A History of Preaching* will be the definitive resource for anyone who wishes to preach or to understand preaching's role in living out the gospel. "...This work is expected to be the standard text on preaching for the next 30 years," says Ann K. Riggs, who staffs the NCC's Faith and Order Commission. Author Edwards, former professor of preaching at Seabury-Western Theological Seminary, is co-moderator of the commission, which studies church-uniting and church-dividing issues. 'A History of Preaching is ecumenical in scope and will be relevant in all our churches; we all participate in this field,' says Riggs...." from EcuLink, Number 65, Winter 2004-2005 published by the National Council of Churches

Following 9/11, increased attention has been given to the place of religion in the public sphere.

Across the world, Law and Religion has developed as a sub-discipline and scholars have grappled with the meaning and effect of legal texts upon religion. The questions they ask, however, cannot be answered by reference to Law alone therefore their work has increasingly drawn upon work from other disciplines. This Research Handbook assists by providing introductory but provocative essays from experts on a range of concepts, perspectives and theories from other disciplines, which can be used to further Law and Religion scholarship.
