 Dostoevsky's Russian chauvinism and anti-Semitism have long posed problems for his readers and critics. How could the author of *The Brothers Karamazov* also be the source of the slurs against Jews in *Diary of a Writer*? And where is the celebrated Christian humanist in the nationalist outbursts of *The Idiot*? These enigmas—the coexistence of humanism and hatred, faith and doubt—are linked, Susan McReynolds tells us in *Redemption and the Merchant God*. Her book analyzes Dostoevsky's novels and *Diary* to show how the author's anxieties about Christianity can help solve the riddle of his

anti-Semitism as well as that of his Russian messianism. McReynolds' reading demonstrates Dostoevsky suffered from a profound discomfort with the crucifixion as a vehicle for redemption. Through his work, she traces this ambivalence to certain beliefs and values that Dostoevsky held consistently throughout his life. And she reveals how this persistent ambivalence about the crucifixion led Dostoevsky to project what he didn't like about Christianity onto the Jews—and to invest those aspects of the crucifixion that he could approve with the "Russian idea." A radical rereading of one of the Western canon's most revered and perplexing authors, McReynolds' book is also a major reconfiguring of Dostoevsky's intellectual biography and a significant contribution to literary and cultural studies.

As the energy market restructures into a significantly more competitive industry, many companies are considering distributed (DG) as a part of a new customer-focused corporate strategy. Energy companies can use DG to retain existing customers or to capture new retail markets otherwise unavailable to utility providers. End-users can implement DG for standby power, combined heat and power, peak shaving, grid support, and as a stand-alone power.

How to Read It Edward Elgar Publishing
Through the history of a charitable institution, the Tung Wah Hospital, Elizabeth Sinn reshapes and greatly deepens our understanding of the evolving interactions between the Chinese community in Hong Kong and the colonial rulers. She traces the rise to power of the Chinese merchants who organized and operated the Hospital and the complex relationships that the Hospital developed with the colonial regime, Mainland Chinese officials and the Chinese people of Hong Kong. As the first organized merchant elite recognized by the colonial government, the Tung Wah Hospital Committee played a crucial political role in nineteenth-century Hong Kong, mediating between ordinary Chinese and the colonial administration. Elizabeth Sinn's classic and pioneering study shows the great extent to which the Hospital's history is the history of Hong Kong itself. The author highlights the problems encountered by the Hong Kong government in managing a foreign population and the role of the Chinese local elite in a colonial situation, while also exploring the complex but fascinating relations between the Chinese residents in Hong Kong and Chinese officials on the Mainland, and between Hong Kong and other Chinese communities. Based on primary source materials, this is an original and refreshing contribution to the study of Hong Kong and modern Chinese history which reveals and discusses many fundamental issues that are entirely relevant today. In a new preface to this paperback edition, Dr. Sinn reconsiders her work in the light of subsequent research on Hong Kong's history and connects it to recent developments in international scholarly work especially with respect to the study of philanthropy and to ideas of world history. "An excellent blend of history and ethnography. Power and Charity is one of the best books available on the everyday practice of colonialism in British Hong Kong. Sinn provides unique insights into a system that is fast becoming a distant memory. This book is required reading for anyone interested in colonialism, medical history, or urban anthropology." —James L. Watson, Professor of Anthropology, Harvard University "Dr. Sinn's book . . . is essential reading for anyone wishing to understand Hong Kong society and politics in the nineteenth century." —Ian Scott, Journal of the Hong Kong Branch of the Royal Asiatic Society "(Dr. Sinn's) book is a fascinating and awesomely researched account of the (Chinese) community's efforts to hold its own in a foreign-dominated enclave." —Philip Snow, Far

Infrastructure investment is critical to economic growth, quality of life, poverty reduction, access to education, health care, and the achievement of many of the goals of a robust economy. But infrastructure is difficult for the public sector to get right. Public-private partnerships (PPPs) can help; they can provide more efficient procurement, focus on consumer satisfaction and lifecycle maintenance, and provide new sources of investment, in particular through limited recourse debt. But PPPs present challenges of their own. This book provides a practical guide to PPPs for policy makers and strategists, showing how governments can enable and encourage PPPs; providing a step-by-step analysis of the development of PPP projects; and explaining how financing works, what contractual structures look like, and how risk allocation works in practice. It includes specific discussion of each infrastructure sector, with a focus on the strategic and policy issues essential for successful development of infrastructure through PPPs. This second edition includes new sections on institutional frameworks, mechanisms for leveraging public financing, small scale PPP projects and more.

Leonards gave Fort Worth a special identity, a distinctiveness, and an attraction to the city's center. When Tandy bought Leonards and later sold it to Dillard's, Fort Worth's image and character changed.

A Brief Guide to Maritime Strategy is a deliberately compact introductory work aimed at junior seafarers, those who make decisions affecting the sea services, and those who educate seafarers and decision-makers. It introduces readers to the main theoretical ideas that shape how statesmen and commanders make and execute maritime strategy in times of peace and war. Following in the spirit of Bernard Brodie's Layman's Guide to Naval Strategy, a World War II-era book whose

title makes its purpose plain, it will be a companion volume to such works as Geoffrey Till's Seapower and Wayne Hughes's Fleet Tactics and Coastal Combat, the classic treatise that explains how to handle navies in fleet actions. It takes the mystery out of maritime strategy, which should not be an arcane art for practitioners or policy-makers, and will help the next generation think about strategy.

Unlike more technical texts stuffed with formulae and theories, this book explains in plain English how power is created and replaces formulae with everyday examples and easy-to-understand illustrations. It opens with an explanation of how electricity is generated, then covers the planning and development of electric power stations, emphasizing modern considerations of merchant power plants, repowering, and the growth of gas turbine generation. The "facts" of generation are covered in part two--boilers, turbines, generators, hydro and pumped storage, and "alternative" generations sources, suchs geothermal, tidal, solar, and wind. Maintenance and operations are covered in basic overview format. Finally, environmental considerations--again, an increasing concern in light of deregulation and environmental law--are reviewed. In addition, the authors cover specific features and fuel-types in nontechnical terms. Industry newcomers will appreciate this clear explanation of how power is created.

An 800-CEO-READ Staff Pick Shortlisted for the Thinkers50 Breakthrough Idea Award A Financial Times Business Book of the Month "For any would-be activists who hear the voice: 'not me' or 'not now,' Merchant makes the strong case for 'yes you' and 'yes now'—and even shows you how to jump in." —Van Jones, host of CNN's The Messy Truth, author of Rebuild the Dream and The Green Collar Economy "The Power of Onlyness is a book for our times. . . . Merchant forces us to dig deep,

into the book and ourselves, and it goes beyond self-knowledge and self-empowerment, obliterating the fear of otherness with an understanding of the onliness of us all.” —Sally Haldorson, 800-CEO-READ An innovation expert illuminates why your power to make a difference is no longer bound by your status. If you’re like most people, you wish you had the ability to make a difference, but you don’t have the credentials, or a seat at the table, can’t get past the gatekeepers, and aren’t high enough in any hierarchy to get your ideas heard. In *The Power of Onliness*, Nilofer Merchant, one of the world’s top-ranked business thinkers, reveals that, in fact, we have now reached an unprecedented moment of opportunity for your ideas to “make a dent” on the world. Now that the Internet has liberated ideas to spread through networks instead of hierarchies, power is no longer determined by your status, but by “onliness”—that spot in the world only you stand in, a function of your distinct history and experiences, visions and hopes. If you build upon your signature ingredient of purpose and connect with those who are equally passionate, you have a lever by which to move the world. This new ability is already within your grasp, but to command it, you need to know how to meaningfully mobilize others around your ideas. Through inspirational and instructive stories, Merchant reveals proven strategies to unleash the centrifugal force of a new idea, no matter how weird or wild it may seem. Imagine

how much better the world could be if every idea could have its shot, not just the ones that come from expected people and places. Which long-intractable problems would we solve, what new levels of creativity would be unlocked, and who might innovate a breakthrough that could benefit ourselves, our communities, and especially our economy. This limitless potential of onliness has already been recognized by Thinkers 50, the Oscars of management, which cited it one of the five ideas that will shape business for next twenty years. Why do some individuals make scalable impact with their ideas, regardless of their power or status? *The Power of Onliness* unravels this mystery for the first time so that anyone can make a dent. Even you.

Collisions are expensive! Learning, understanding and remembering the International Regulations for Preventing Collisions at Sea (COLREGs) is essential for anyone venturing onto the water. Leisure boaters, as much as professional mariners, need to know the rules, and a firm understanding is required to pass many nautical exams. But with the COLREGs

stretching to over 12,000 words, this is no small task. This is where Paul Boissier’s excellent book comes in. Paul knows the COLREGs backwards having used them extensively in his career with the Royal Navy – from the bridges of submarines and warships which he has commanded, with each giving a rather different perspective on other shipping! He also knows the other side well with his extensive cruising experience, from his early years with his father to now, sailing his own yacht. These experiences mean that he knows and understands the COLREGs from both sides and this gives him the ability to take you through the COLREGs from a mariners’ and sailors’ perspective. He brings the vital, but dry, document to life, going through it not in order, but by topics which are relevant to the mariner and sailor. Paul explains the intention of each rule and how it should be applied when at sea. He includes personal anecdotes (not all favourable to him!) which make everything real and tells us how he remembers different aspects of the Regulations through mnemonics and other devices. Finally, each chapter ends with a self-test to reinforce what has been learnt – other tests are also available online on the Fernhurst Books’ website. This new edition has been updated with the 2016 changes to the COLREGS. Whether you want to increase your confidence, pass an exam, require an on-board reference, or wish to improve your understanding of the nautical rules of the road, this is the ideal book for you.
