When a young bilingual child experiences language difficulties, it can be hard to tell if those challenges are due to a disorder or just limited exposure to the English language. That's a critical distinction-- because while limited language exposure will fix itself over time, a language impairment is a clinical issue that will cause the child difficulties in school without timely and effective intervention. Now there's a valid, reliable assessment that specifically responds to the needs of young Spanish-English bilingual children. For use with children ages 4 through 6 years who have varying degrees of bilingualism, the Bilingual English-Spanish Assessment (BESA) was developed to: identify phonological and/or language impairment in bilingual children and English language learners using a standardized protocol differentiate between a delay in English language acquisition and a true language disorder document children's speech and language strengths and needs monitor children's progress in both languages and use the

information to make decisions about intervention How BESA Works Through a combination of subtests for students and surveys for teachers and parents, BESA reveals the big picture of a young bilingual child's language development.

Comprehensive assessment with BESA includes: 3 subtests (in both English and Spanish). These three standardized- norm-referenced subtests address the key domains of morphosyntax, semantics, and phonology. The subtests are administered with children one-on-one in a quiet, well-lit, well-ventilated room free of distractions. 2 questionnaires. The SLP gathers more information by interviewing both parents and teachers. Bilingual Input-Output Survey (BIOS): determines Spanish and English use at home and school and pinpoints which language(s) need testing Inventory to Assess Language Knowledge (ITALK): identifies the parent's and teacher's perception of the child's performance in each language and highlights areas of possible concern. Pragmatic activity. This 5- to 10-minute warmup activity, in which children are asked to "help wrap a present" with the examiner, is used to establish rapport with

the child and give clinicians an idea of how collaborative and interactive the child will be during the rest of the assessment. BESA Benefits Valid and reliable. There are very few assessment tools for bilingual children, and even fewer that are valid and reliable. BESA answers the call for a bilingual assessment backed up with solid evidence of validity and reliability. Culturally and linguistically appropriate. BESA subtests are different for each language; the Spanish subtest isn't just a translation of the English one. Dialects were taken into consideration--the norming sample included 17 Spanish dialects and 7 regional dialects for English--and items were developed for each language based on the markers, structure, and culture of that language. Uncovers the full picture of a child's language development. Not only does BESA identify language impairments, it also helps you gauge progress in both languages and document a child's dominant language across different domains of speech and language. This critical information will help you plan interventions and educational programming for bilingual children. Flexible and convenient. You can use each

BESA component independently or combine them as part of an assessment battery. Choose which component you want to give--you're not required to administer both the English and Spanish subtests. BESA can also be given over multiple sessions, so you can easily fit it into your schedule. Acción Cultural Española's fourth edition of the AC/E Digital Culture Annual Report follows an editorial policy of familiarising professionals of the culture sector with the main digital trends they need to be aware of over the coming years. Since 2015, a committee has been advising us on the choice of subjects and authors for the first part of the report. This year, a group of experts analyse issues such as content curation as a means of tackling digital overload, neuroscience applied to technology, the latest advances in artificial intelligence, the Internet of Things and Big

Data applied to culture, and the use of digital technology in music. Each year's edition also includes a field study: the Focus, which reports on cases of good practice in digital technology in a specific discipline. The first edition examined the impact of digital in the world of the performing arts; the second focused on museums; and the third on the use of digital devices at fifty Spanish and international culture festivals. This fourth edition surveys in depth the use of digital technology in the conservation, analysis and dissemination of our cultural heritage. This sector is rapidly growing, leading to a radical change in methodologies and formats which the author, David Ruiz Torres, analyses exhaustively.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.
