A is for Alphabet...because you probably need a refresher. If you're not laughing by the end of this book...well, you're probably slower than molasses on a cold day. Or maybe you're just as sharp as a cue ball. But the rest of us sure will find plenty of guffaws in this side-splittingly uproarious ABC, which takes comic aim at the redneck lifestyle. It's got 26 letters (yes, that's how many there are) worth of fun, all illustrated with hilarious cartoons of rednecks and their more refined and proper dogs. G is for grandmother (who's also your aunt and your sister). L is for Lottery-otherwise known as the redneck retirement plan. And V is for the velvet Elvis painting that

probably hangs in your trailer. This'll be hotter than a mess of collard greens on the back burner of a \$4 stove! And because we know how difficult the alphabet can be for those rednecks, we have several extra usages of the letters in the alphabet.

About the Book: In the quest to improve the quality of engineering education, it is not just enough to teach engineering principles and design procedures. An equal emphasis should be stressed to the manufacturing processes and in preparation of production drawings. Keeping this in mind, the contents of the book are planned and developed. A production drawing is an important document, as the entire production depends on the design of the

component, which may include the selection of the process also. The production drawing is a guide not only to the artisan in the shop floor but also to the design engineer-in successful manufacture of a product. Realising the practical importance of production drawings, the subject is nowadays introduced as a full course at both diploma and degree level. The book is the first of its kind incorporating the latest principles of drawings as per BIS, SP-46: 1988. The topics covered include: Limits, fits and tolerances including geometrical tolerances Surface roughness Specification of materials and standard mechanical components Preparation of working drawings for (i) single components, (ii) mating components and (iii) assemblies Process sheets and

component manufacture in typical cases
 Tool drawings Jigs and fixtures
 Inspection and gauging tool drawings

Toast a marshmallow, be a tree in winter, read braille -- Paul B. Janeczko and Richard Jones invite you to enjoy an assortment of poems that inform and inspire. Today I walked outside and spied a hedgehog on the hill. When she and I met eye to eye, she raised up straight and still. Be they practical (how to mix a pancake or how to bird-watch) or fanciful (how to scare monsters or how to be a snowflake), the poems in this book boast a flair and joy that you won't find in any

instruction manual. Poets from Kwame Alexander to Pat Mora to Allan Wolf share the way to play hard, to love nature, and to be grateful. Soft, evocative illustrations will encourage readers to look at the world with an eye to its countless possibilities. Contributors include: Kwame Alexander Calef Brown Rebecca Kai Dotlich Margarita Engle Ralph Fletcher Douglas Florian Helen Frost Martin Gardner Charles Ghigna Nikki Grimes Anna E. Jordan Karla Kuskin Irene Latham J. Patrick Lewis Marjorie Maddox Elaine Magliaro Pat Mora Christina Rossetti Monica Shannon Marilyn Singer Robert Louis Stevenson Charles Waters April Halprin Wayland Steven Withrow Allan Wolf

A is for anonymous (who's the one who farted') B is for bloated (watch out...coming soon!) F IS FOR FLATULENCE and...H IS FOR HILARIOUS! You've never seen an ABC book like this before! It's the wickedest, wackiest alphabet ever, all centered around the sound and smell of that always uproarious, occasionally uncontrollable bodily function: the fart. Colorful classic cartoons'including an ever-present ominous green, gassy cloud'bring out all the entertaining fun of Left Cheek Squeak; Noxious (people wearing gas masks); and the Fart and

Run Technique. And don't forget "S" for Silent But Deadly! It's even more side-splitting than a whoopee cushion. Just be glad there's no smellovision, though! *5 Steps to Drawing Faces* Child's World People who love kids spend a sizeable amount of their adult life obsessing about how their lives would be with kids in it. They wonder how they can be good parents and be their kids' ultimate companion. They actively or passively prepare for this period of their lives and try to figure out ways to connect with their kids. The kids came with a need to express themselves, and it turns out that drawing is one of these needs. Herein lies the problem; the parent cannot draw. If this is your story, we understand how hard it is for you to confront that wrong notion that you cannot be there

for your kids. You do not have to feel this way because you can always get help. Now, that help has come in the form of this drawing book. You do not have to feel like you are not doing enough for your kids in the area of creative expression because now, you can always bring out this book and guide them on how to use it to fulfill their drawing needs. The best part of this is that you will be doing it together; you learn as

they learn and at the same time, you get to connect with them on a deeper level. So yes, you may not have much artistic or drawing skill, but you can help your kids develop theirs, and this book and the drawing guides in it will help you get them there. You and your kids are about to have the most amazing creative experience - one that you will talk about for years to come.
