--John Crupi, Distinguished
 Engineer, Sun
 Microsystems, coauthor of
 Core J2EE Patterns. Core

Security Patterns is the
 hands-on practitioners
 guide to building robust
 end-to-end security into
 J2EE™ enterprise
 applications, Web
 services, identity
 management, service
 provisioning, and personal
 identification solutions.

Written by three leading
 Java security architects,
 the patterns-driven
 approach fully reflects
 today's best practices for
 security in large-scale,

industrial-strength
 applications.

With " Core Security
 Patterns " as a trusted
 security advisor, you will
 learn how these
 architectural patterns and
 best practices fit in
 securing real world
 software development
 process, and how you can
 leverage them to solve
 your security and identity
 related problems. Chris
 Steel, Ramesh Nagappan
 and Ray Lai.
