Learn vocabulary, terms, and more with flashcards, games, and other study tools. 38-3 The Excretory System Flashcards | Quizlet The human excretory system functions to remove waste from the human body. This system consists of specialized structures and capillary networks that assist in the excretory process. The human excretory system includes the kidneys and their functional unit, the nephron. The excretory activity of the kidneys is modulated by specialized hormones ... Human Excretory System - CliffsNotes A B; kidney: organ that removes urea, excess water, and other waste products from the blood and passes them to the ureter: ureter: tube that carries urine from the kidney to the urinary bladder Quia - Section 38.3: The Excretory System Three excretory systems evolved in organisms before complex kidneys: vacuoles, flame cells, and Malpighian tubules. Contractile Vacuoles in

Microorganisms The most fundamental feature of life is the presence of a cell. In other words, a cell is the simplest functional unit of a life. 41.3 Excretion Systems - Biology 2e | OpenStax The Digestive and Excretory Systems chapter of this Prentice Hall Biology course helps students learn the essential science lessons associated with the human digestive and excretory systems. Prentice Hall Biology Chapter 38: Digestive and Excretory ... Section 38-3 The Excretory System (pages 985-989) Key Concepts • What are the functions of the kidneys? • How is blood filtered? Functions of the Excretory System (page 985) 1. The process by which metabolic wastes are eliminated is called . 2. List four organs that are used for excretion. a. c. b. d. 3. WB Chapter 38 - karnsbiology.com Chapter 38 Digestive and Excretory Systems Section 38-1 Food and Nutrition (pages 971-977) This section identifies the nutrients your body needs and explains why water is such an important nutrient. Food and Energy (page 971) 1. Cells convert the chemical

energy in glucose and other molecules into . 2. Digestive and Excretory Systems Chapter 38 Digestive And Excretory Systems Excretory System Given the QUESTION, identify the ANSWER. Formats: Info Page: Worksheet / Test Paper: Quiz: Review: Multiple choice. Your Performance 1. Which of these is not a function of kidneys? A. Maintenance of acid base balance. B. Excretion of nitrogenous waste products. Excretory System - Multiple choice Kidneys are part of the urinary, or excretory, system in the human body. This is the system that helps us remove waste – such as carbon dioxide, salt, excess minerals, toxins, and unused water – from our bodies. The excretory organs include the lungs, kidneys, liver and skin, but today, we are going to focus only on the kidneys (see Figure 2). Just Passing Through - Lesson - TeachEngineering The excretory system functions to remove waste from the body. This can happen via two pathways. First, kidneys filter metabolic wastes from the blood and excrete them via urine. Second, organs of the GI tract (such as the liver, small

intestine, and colon) filter toxic substances and waste products from food and excrete it via feces; therefore ...
