The term "environmental health" isn't familiar to most Americans. When asked to guess what the term might mean, the most likely response is about how humans affect the environment, but not how the environment affects public

health. Many Americans assume health outcomes mostly result from individual choices about diet and exercise. Building an Understanding of Environmental Health Nancy Irwin Maxwell is the author of 'Understanding Environmental Health: How We Live in the World', published 2013 under ISBN 9781449665371 and ISBN 1449665373. [read more] Marketplace prices Understanding Environmental Health: How We Live in the ... Understanding Environmental Health is briefer than most introductory environmental health texts. It provides the essential information about environmental health needed by the Master of Public Health (MPH) student, and it is designed to stand alone in an introductory course for students in concentrations other than environmental

health—in fact, I first developed the book while teaching just such a course.
