JULISSA MICHAELA

The Psychology of Learning SAGE

This indispensable handbook provides helpful strategies for dealing with both the everyday challenges of university teaching and those that arise in efforts to maximize learning for every student. The suggested strategies are supported by research and adaptable to specific classroom situations. Rather than suggest a "set of recipes" to be followed mechanically, the book gives instructors the tools they need to deal with the ever-changing dynamics of teaching and learning. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. Pengantar Pengembangan Bahan dan Media Ajar Cengage Learning

An essential resource for understanding the main principles, concepts, and research findings of key theories of learning—especially as they relate to education—this proven text blends theory, research, and applications throughout, providing readers with a coherent and unified perspective on learning in educational settings. Key features of the text include: Vignettes at the start of each chapter illustrating some of the principles discussed in the chapter, examples and applications throughout the chapters, and separate sections on instructional applications at the end of each chapter. A new chapter on Self-Regulation (Chapter 9). Core chapters on the neuroscience of learning (Chapter 2), constructivism (Chapter 6), cognitive learning processes (Chapter 7), motivation (Chapter 8), and development (Chapter 10) all related to teaching and learning. Updated sections on learning from technology and electronic media and how these advancements effectively promote learning in students (Chapters 7 & 10) Detailed content-area learning and models of instruction information form coherence and connection between teaching and learning in different content areas, learning principles, and processes (Chapters 2-10). Over 140 new references on the latest theoretical ideas, research findings, and applications in the field.

A Dialogue of Theory and Practice Addison Wesley Longman
Provides a collection of teaching models that can be incorporated into a curriculum.

Buku ajar ini penulis tulis sebagai salah satu rujukan bagi mahasiswa Program Studi Pendidikan Guru Sekolah agar dengan mudah untuk mengetahui serta memahami tentang pengelolaan kelas di sekolah dasar.

Accelerated Learning for the 21st Century UAD PRESS

This unique program teaches listeners how to "decode" and reply to non-verbal signals from friends and business associates when those signals are often vague and thus frequently ignored.

The Six-Step Plan to Unlock Your Master-Mind National Academies Press

This sixth edition provides an essential introduction to the major theoretical approaches in counselling and psychotherapy today. Comprehensive and accessible, it now includes two brand new chapters on Mindfulness and Positive Therapy, as well as additional content on ethics, on new developments in each approach, including the latest research and updated references. Following a clearly-defined structure, each chapter describes the origin of the therapeutic approach, a biography of its originator, its theory and practice, discusses case material and further developments, and suggests further reading. Each chapter also contains review and personal questions. Richard Nelson-Jones' authoritative and practical textbook is the ideal companion for students on introductory courses and those embarking on professional training.

PSIKOLOGI PENDIDIKAN DAN PEMBELAJARAN Penerbit Lakeisha

The Psychology of Learning: An Introduction for Students of Education provides a comprehensive coverage of educational psychology. The title tackles various psychological variables that play a critical role in education. The text first deals with learning theories, such as classical conditioning, operant conditioning, and the Gestalt theory. Next, selection deals with the concept of memory, which includes perception, short- and long-term memory, and forgetting. The text also talks about motivation, along with skills and language. Chapter 7 covers thinking and problem-solving, while Chapter 8 tackles intelligence and ability.

The coverage of the title also includes personality and morality. The book will be of great use to student teachers, instructors, and behavioral scientists.

Psikologi pendidikan dan pembelajaran menawarkan sejumlah gagasan segar untuk memberikan daya rangsang bahwa, psikologi pendidikan Islam merupakan bagian yang tidak terpisahkan dalam kehidupan sehari-hari, di manapun dan kapanpun berada. Karena dengan mempelajari dan mendalami dengan seksama, kita akan terbawa arus, menjadikan hidup kita akan teratur karena dipengaruhi oleh mindset apa yang sedang kita baca, kita pikirkan, dan kita rasakan akan menjadi habit, yakni tindakan yang kita lakukan secara berulang-ulang, baik itu sadar ataupun tidak sadar, akan menjadi kebiasaan dalam hidup dimanapun dan kapanpun. Saat kita melihat seorang mahasiswa katakanlah mahasiswa A. Ia selalu rajin mengerjakan tugas, tidak pernah terlambat, kuta bisa kagum padanya. Tetapi apa yang dikatakan Aristoteles, bahwa itu bukan keunggulan perbuatan, tapi karena ia terbiasa melakukannya, bisa juga dikatakan, mereka yang melakukan hal-hal yang luar biasa berulang kali sehingga yang tampak hebat di mara kita adalah yang biasa di mata mereka, karena terbiasa melakukannya. Begitu pula sebaliknya. Di sini Habit juga selalu dipengaruhi oleh apa, dan dari mana konsumsi yang kita makan, dengan demikian kondisi mindset kita juga akan terpancar dari sumbernya, kalau sumber nutrisi yang di makan tidak sesuai dengan hati nurani, maka habit yang ada adalah mengarah pada hal-hal yang tidak sesuai dengan hati nurani, namun apabila sumber nutrisi itu sesuai dengan hati nurani, maka habit yang keluaranya pun sesuai dengan habit dari hati nurani, seperti apa yang dibaca, dipikir, dirasa, diucapkan sama dengan apa yang dilakukan dalam kehidupan sehari-hari, begitu pula sebaliknya. Oleh karena itu, dalam berbagai aktifitas tidak terlepas dari proses psikologi pendidikan dan pembelajaran, menjadikan insan-insan menjadi lebih baik dan lebih teratur, karena tahu makna dibalik belajar psikologi pendidikan dan pembelajaran untuk membiasakan belajar secara baik dan benar.

Training Needs Assessment Bloomsbury Publishing

Abstract: An instructional text for teachers focuses on the effective use of media in teaching and on the unique characteristics of individual learners. The text is intended for use in conjunction with carefully planned classroom and laboratory activities. Topics include the systematic approach to teaching and its application; the learning process and the teacher's role; school learning objectives; instruction evaluation; teaching cognitive, affective, and motor skills objectives; teaching strategies; the role of instructional media; media selection; the uses of various media types; and characteristics of the instruction management model. A brief listing of audiovisual materials and resources is appended. Instructional component objectives and numerous exercises are given throughout the text. (wz).

A leading educator discusses the importance of the first six years to a child's normal physical and emotional development

Introduction to Psychology Simon and Schuster
Around the globe religion is under attack. Humanists, secularists and atheists depict believers as deluded and dangerous. The aim of this book is to challenge this perception. Sensible Religion defends the validity and emphasises the excitement of the religious quest across the faiths. It demonstrates that the practice of sensible religion is often a courageous path pitted against religious extremism and secularism. Written by committed believers from the major world's faiths, the book endorses the term 'sensible' as expressing religious reasonableness as well as sensitivity to criticism and new insights. Followers of the different traditions live ordinary lives in the mainstream of the world. This volume therefore addresses beliefs and the manner in which these convictions relate to social, political and ethical action. Countering the argument that religion is at root extremist and irrational, Sensible Religion brings together thoughtful and critical reflections by leading thinkers about humanity's spiritual quest. Bloomsbury Publishing

This comprehensive introduction gives basic how-to information on the use of online systems, discusses topics for which there are no accepted paradigms, and presents alternative points of view within a framework of previous research. Expanding on their immensely popular and critically acclaimed first edition, the authors have added extensive new material addressing Internet

search and retrieval techniques as well as the more traditional Dialog and Lexis-Nexis services.

Educating for Character Educational Technology

"This text is intended primarily for students of college grade in normal schools, teachers colleges, schools of education, and departments of universities engaged in the training of teachers. Its aim is to set forth the psychology that teachers need for the specific work of teaching and of guiding the development of the mental life of growing children. The text presents the facts of psychology that teachers can use in their work." (PsycINFO Database Record (c) 2010 APA, all rights reserved).

An Educational Perspective Pearson College Division

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind, Acquire, Search, Trigger, Exhibit, and Review), and is enhanced by the latest findings on the value of emotion and memory on the process of learning. Combined with motivational stories of success applying these principles, and putting forth a clear vision of how the United States can dramatically improve the education system to remain competitive in the next century, Accelerated Learning into the 21st Century is a dynamic tool for self-improvement by individuals as diverse as schoolchildren and corporate executives.

A View of what Education Might Become National Education Assn
Perception and Communication covers the significant advances in understanding the association between perception and communication. This book is composed of 12 chapters and starts with an overview of the value of auditory studies and the basic principles of perception and behavior theory. The next chapters

deal with the theoretical interpretation of the experiments concerning selective listening to speech and some of the distinctive features of human verbal behavior. These topics are followed by discussions of the role of communication channels in listening; the effects of noise on behavior; the general nature of vigilance; some data on individual differences related to extraversion and decrement in non-vigilance tasks; and the nature of extinction. The closing chapters consider the problems of multi-channeling listening and the selective nature of learning. These chapters also provide a summary of principles of perception and communication. This book will prove useful to applied psychologists, behaviorists, and researchers.

Learning Theories MacMillan Publishing Company
Identifies different learning styles and offers strategies for increasing learning potential and improving memory skills

Psikologi Pendidikan Routledge

Calls for renewed moral education in America's schools, offering dozens of programs schools can adopt to teach students respect, responsibility, hard work, and other values that should not be left to parents to teach.

Adanya tatanan dunia baru dalam era digital ini agaknya memengaruhi sikap, karakter, serta kecenderungan personal bahkan psikologis generasi muda yang sebagian besar berada pada usia sekolah baik pada level dasar, menengah, atas maupun perguruan tinggi. Sikap, karakter, serta kecenderungan personal generasi muda usia sekolah ini berperan besar dalam munculnya berbagai isu problem belajar di sekolah mulai dari motivasi, bahan ajar, dan media ajar. Sebagai contoh problem motivasi belajar siswa khususnya Generasi Z kerap dijumpai karena derasnya gempuran media sosial berikut segenap atributnya seperti influencer, gamer, youtuber dan sebagainya. Banyak anak-anak sekolah lebih termotivasi mendapatkan popularitas seperti role model mereka masing-masing di media sosial dibanding prestasi akademik karena umumnya penggiat media sosial memang tidak mengangkat tema akademis. Hal tersebut pada dasarnya bukan hal yang bersifat negatif mengingat di era digital ini bahkan keterampilan mengelola media sosial dapat menjadi aset yang sangat berharga. Akan tetapi, hal ini banyak

disalah artikan oleh Generasi Z sehingga menurunkan motivasi belajar dan menimbulkan problem bagi sekolah, guru, maupun orangtua.

Psikologi Belajar Random House of Canada

The Visual Dictionary of Graphic Design is a comprehensive guide to the numerous terms used within graphic design and associated disciplines. Over 250 terms are explained and contextualized, with concise definitions accompanied by illustrations and

examples taken from historical and contemporary graphic design. The dictionary covers traditional practice and process terms as well as modern terminology. It also defines a wide variety of practical terms, such as Perfect binding, Deboss and Strikethrough, as well as movements and styles including Surrealism, Psychadelia and Postmodernism.

Perception and Communication Deepublish

Belajar adalah suatu kata yang sudah akrab dengan semua lapisan masyarakat. Masalah pengertian belajar ini, para ahli

psikologi dan pendidikan mengemukakan rumusan yang berlainan sesuai dengan bidang keahlian mereka masing-masing. James O. Whittaker, misalnya, merumuskan belajar sebagai proses di mana tingkah laku ditimbulkan atau diubah melalui latihan atau pengalaman. Cronbach berpendapat bahwa learning is shown by change in behavior as a result of experience. Belajar sebagai suatu aktivitas yang ditunjukkan oleh perubahan tingkah laku sebagai hasil dari pengalaman.
