"Prealgebra is designed to
meet scope and sequence
requirements for a one-

semester prealgebra
course. The text
introduces the
fundamental concepts of
algebra while addressing
the needs of students with
diverse backgrounds and
learning styles. Each topic
builds upon previously
developed material to
demonstrate the
cohesiveness and
structure of mathematics.
Prealgebra follows a
nontraditional approach in

its presentation of
content. The beginning, in
particular, is presented as
a sequence of small steps
so that students gain
confidence in their ability
to succeed in the course.
The order of topics was
carefully planned to
emphasize the logical
progression throughout
the course and to
facilitate a thorough
understanding of each
concept. As new ideas are

presented, they are explicitly related to previous topics."--BC Campus website.

Changes in society and the workplace require a careful analysis of the algebra curriculum that we teach. The curriculum, teaching, and learning of yesterday do not meet the needs of today's students.
