This document's purpose is to spell out the Church's understanding of the nature of revelation--the process whereby God communicates with human beings. It touches upon questions about Scripture, tradition, and the teaching authority of the Church. The major concern of the document is to proclaim a Catholic understanding of the Bible as the "word of God." Key elements include: Trinitarian structure, roles of apostles and bishops, and biblical reading in a historical context.

The International status of education about the Holocaust University of Toronto Press

This book covers theoretical aspects of Catholic Religious Education in schools and examines them from multiple theoretical and contextual perspectives. It captures the contemporary academic and educational developments in the field of Religious Education while discussing in detail the challenges that Religious Educators face in different European, Asian, African, Australian, American and Latin American countries. The edited collection investigates how to pass on a Catholic heritage as

a "living tradition" in diversely populated schools and communities. In this way it explores and asserts the proper identity of Catholic Religious Education in dialogue with Catechetics and with the wider discipline of Religious Education. As the different articles of this publication demonstrate - through a series of interesting and critical points of view - Catholic Religious Education is confronted with many challenges from the risk of marginalization to the confusion produced by a religious indifferentism leading to a strictly comparative or neutral method in the study of religions. It is essential to take into account in our research perspectives that Catholic Religious Education is not only a subject but also a mission in the light of the diakonia of truth in the midst of humanity H.E. Cardinal Zenon Grocholewski, Prefect, Congregation for Catholic Education, Holy See, Vatican City
Religious education teachers cannot by themselves overcome the ills of society, but religious education...can help to create better citizens of the world as some authors argue

throughout this collection. could not ask more from such timely and provocative collection. It is a gift to the profession and to Catholic Religious Education. Prof. Gloria Durka, Fordham University, New York, NY, USA

Introduction to Sociology

2e Musson Book Company

This edited collection brings together scholars from Canadian and international institutions to discuss educationalization, a trend in modern societies that involves transferring social responsibilities onto the school system. This book brings a new dimension to the literature on educationalization by examining the concept in relation to Catholicism, Indigenous issues, the right to education, and historical studies grounded in both Canada and Chile. In these contributions, the book represents an attempt to both deepen the current discussion on the construction and use of educationalization as a concept as well as invite further exploration of this subject in relation to the increasing digitalization of life in the twenty-first century.

How the Politics of Literacy Shape Thinking in the Classroom Houghton Mifflin Harcourt

Sociology of Education in Canada utilizes a contemporary theoretical focus to analyze how education in Canada is affected by pre-existing and persistent inequalities among members of

society. It presents the historical and cultural factors that have shaped our current education system, examines the larger social trends that have contributed to present problems, discusses the various interest groups involved, and analyzes the larger social discourses that influence any discussion of these issues. To achieve this, Karen Robson uses many current, topical, and relatable issues in Canadian education to ensure that readers fully comprehend the information being presented and leave with an appreciation of how the sociology of education is inextricably linked to issues of stratification.

Heterosexism and Transphobia in Canadian Catholic Schools Paulist Press

This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum

analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

Dei Verbum Penguin UK
 Jesus of Nazareth is the most famous Jew who ever lived, yet remains profoundly alienated from his own people. At best he is viewed as the founder of a new religion which for millennia was hostile to Judaism. At worst he is seen as the source of world anti-Semitism, with the charge that the Jews were responsible for his death being the impetus for the murder of countless Jews throughout the ages. But the historical Jesus is also foreign to most Christians who are oblivious to the life he lived as a Jew, his real mission in ancient Judea, the source of most of his celebrated teachings, and his firm attachment to his people. Shmuley Boteach offers us a view of Jesus, based on Jewish and Christian sources, that will serve as a bridge between two faith communities.
