He was travelling home on a stormy night when they shot him and left him for dead. An innocent man severely wounded on the orders of an avaricious Marcher Lord. They should have made sure he was dead but they didn't realise their mistake until a raiding party came back over Offa's Dyke to exact their revenge. Soon men were dying and the Welsh Marches were not a safe place for the Norman English Lords. The mistakes of one Marcher Lord soon

grew into a full scale rebellion in Wales. A Welsh Prince emerged to challenge the English occupation.

In a world where web services can make real-time data accessible to anyone, how can the government leverage this openness to improve its operations and increase citizen participation and awareness? Through a collection of essays and case studies, leading visionaries and practitioners both inside and outside of government share their ideas on how to achieve and direct this emerging world of online collaboration, transparency, and participation. Contributions and topics include: Beth Simone Noveck, U.S. Deputy Chief Technology Officer for open government, "The Single Point of Failure" Jerry Brito, senior research fellow at the Mercatus Center at George Mason University, "All Your Data Are Belong to Us: Liberating Government Data" Aaron Swartz, cofounder of reddit.com, OpenLibrary.org, and BoldProgressives.org, "When Is Transparency Useful?" Ellen S. Miller, executive director of the Sunlight Foundation, "Disrupting Washington's Golden Rule" Carl Malamud, founder of Public.Resource.Org, "By the People" Douglas Schuler, president of the Public Sphere Project, "Online Deliberation and Civic Intelligence" Howard Dierking, program manager on Microsoft's MSDN and TechNet Web platform team, "Engineering Good Government" Matthew Burton, Web entrepreneur and former intelligence analyst at the Defense Intelligence Agency, "A Peace Corps for Programmers" Gary D. Bass and Sean Moulton, OMB Watch, "Bringing the Web 2.0 Revolution to Government" Tim O'Reilly, founder and CEO of O'Reilly Media, "Defining Government 2.0: Lessons Learned from the Success of Computer Platforms" Open Government editors: Daniel Lathrop is a former investigative projects reporter with the Seattle Post Intelligencer who's covered politics in Washington state, Iowa, Florida, and

This book was translated from German into English by means of artificial intelligence (machine translation). This academic paper deals with both civil (securities) law and regulatory (securities) law aspects. Thus, a summary of the property law is provided, which deals with the classification of tokens under Liechtenstein law. Furthermore, dematerialized securities, which have been known to the Liechtenstein legal system for almost 100 years, will be discussed. The civil and corporate law focus is on Liechtenstein, while the Swiss corporate law and the general civil law of Austrian law are also taken into account. The supervisory part of the work is clearly in the focus of Union law, but also takes into account national specialties of Liechtenstein, Austria and Germany in addition to European legal acts. Thus, tokens and token-based business models are also examined in the light of European legal acts such as MiFIR, MiFID II, CRR, CRD IV, CSDR, EMIR, AIFMD, UCITS, E-Money Directive II, PSD II, MAD/MAR, Prospectus Regulation, 5th AML Directive and other regulations, directives, as well as implementing regulations and delegated regulations. A special focus is placed on crypto exchanges and decentralized trading places (DEX). In addition, a focus will be placed on consumer law in terms of tokens and distance selling contracts, taking into account the Consumer Rights Directives. In this context, tokens as data or software and thus as digital content and consequently merchandise are also dealt with in more detail and the parallels to tokens as tokens with intrinsic value or virtual currencies in contrast to fiat money are shown. Furthermore, the author aims at explaining deposit business, e-money transactions and financial instruments as communicating vessels in contrast to virtual currencies. Although this is primarily a legal work, technical aspects of

Distributed Ledger Technologies, such as the blockchain, smart contracts, agoric computing, self-sovereign identity, etc. - as far as this is necessary for the legal assessment - are also explained in more detail. The present discussion is to be understood as scientific work with practical relevance for advice in connection with blockchain based business models.

As Ignazio Visco, Governor of the Bank of Italy, says in his Foreword, all economic policy makers today need to re-examine our history to help them confront the challenges of today. This edited volume focuses specifically on the theme of financial innovation and how financial resiliency was achieved in Naples. To highlight both the achievements of the public banks of Naples and their lessons for financial resiliency, the book focuses on financial crises and how they were overcome in Naples in contrast to other European financial systems. The first section focuses on the development of the public banks unique to Naples. The second section compares those with other banking systems and how they responded to the same shock in 1622, caused by the full mobilization of European belligerents to finance their efforts in the Thirty Years War. The next section compares lessons learned in the rest of Europe over the next century and a half. The final section comes back to original start of the narrative arc to suggest ways that today's policymakers and thinkers could use the historical experience of the public banks of Naples to deal better with the ongoing problems stemming from the financial crisis of 2007-08.

The European Group on Tort Law presents the results of its extensive research project, the Principles of European Tort Law. They were drafted on the basis of several comparative studies on the most fundamental questions of tortious liability and the law of damages. The Principles are not a mere restatement of the common core of tort law in Europe, but rather a proposal for a comprehensive system of tortious liability for the future, though necessarily linked to existing regimes. They are meant to stimulate discussion both among academics and practitioners and could serve as guidelines for national legislatures, thereby fostering gradual harmonization. The text of the Principles,

which is offered in English and several other languages, is accompanied by commentaries on the various parts elaborating their intended meaning and interplay.

Progress in Improving Project Management at the Department of Energy Maggioli Editore

This book explores how to design and implement planning & control (P&C) systems that can help organizations to manage their growth and restructuring processes in a sustainability perspective. The book is not designed to enable the reader to become an experienced system dynamics modeler; rather, it aims to develop the reader's capabilities to design and implement performance management systems by using a system dynamics approach. More specifically, the book shows how to develop system dynamics models that can better support an understanding of: -What is organizational performance and how to frame and measure it; -How to identify and map the processes underlying performance; -How to design and implement a dynamic performance management system and link it to strategic planning; -How to tie strategic resource dynamics to processes and performance indicators; -How to link strategic resources, and performance indicators to responsibility and incentive systems. Using a dynamic performance management approach can improve an organization's capability to understand and manage the forces driving performance over time, as well as set goals and objectives that may properly and selectively gauge results and match them to the key responsibility areas in the planning process. The dynamic performance management approaches covered in the book are beneficial to performance management analysts, enabling them to frame their professional field within the broader context of the system. The book also includes numerous case studies and dynamic performance management models for providing examples of how dynamic performance management works in practice. In addition, a literature review is included to provide a guideline for further improvements to those readers who wish to develop relevant, specific, and detailed system dynamics modeling skills and to establish the foundation for teaching system dynamics applied to performance management in organizational and inter-organizational contexts. This is particularly relevant for graduate students who have taken system dynamics courses and need to apply their own skills to business and public management.

What do Catharine MacKinnon, the legacy of Brown v. Board of Education, and Lani Guinier have in common? All have, in recent years, become flashpoints for different approaches to legal reform. In the last quarter century, the study and practice of law have been profoundly influenced by a number of powerful new movements; academics and activists alike are rethinking the interaction between law and society, focusing more on the tangible effects of law on human lives than on its procedural elements. In this wide-ranging and comprehensive volume, Gary Minda surveys the current state of legal scholarship and activism, providing an indispensable guide to the evolution of law in America.

Where do Islamic courts still operate in the modern world? What training does an Islamic judge receive? How does an Islamic court deal with a criminal case? What proof and evidence does it accept? What penalties may an Islamic judge impose in criminal matters? What law and practice do the Islamic judges apply to transgressions by Westerners in Saudi Arabia, whether they be accused of murder, adultery or drinking alcohol? This book attempts to answer all the above crucial, basic yet difficult questions of Islamic law. A formidable array of judicial talent considers all aspects of Islamic criminal procedure with the firm emphasis on its practical application in modern states today. Controversial cases are dealt with and explained from an Islamic point of view with the aim of informing a Western audience of the objectivity and fair process inherent in the Islamic system. Salespeople are looking for answers. The fastest, easiest answers that work every time. The good news is, the answers exist. The bad news is, in order to be able to

become a successful salesperson, you have to understand, practice, and master the answers. You would think with all the answers contained in this book, that anyone who reads it would automatically become a better salesperson. You would be thinking wrong. To become a better salesperson, the first thing you have to do is read it. The second thing to do with this book is read it again. The third thing to do with this book is try one answer every day. If it does not work exactly right the first time, or the outcome was not what you expected, try it again and tweak it a little bit. The fourth thing you have to do is practice the answer until you feel that it is working. The fifth thing you have to do is become the master of it. Blend each answer to your selling situation and do it in a way that fits your style, and your personality. Think about the way you ask for an appointment. The way you leave a voice-mail message. The way you follow up after a sales call. The way you begin a sales presentation. The way you ask for a sale. The way you respond to an angry customer. The way you earn a referral. Or the way you get a testimonial. Wouldn't you love to have the perfect answer for every one of these situations?
