 Australia's English raises many questions
 among experts and the general public.
 What is it like? How has English changed
 by being transplanted to other parts of
 the world? Does the rise of AusE and
 other varieties endanger the role of

English as a world language? Past
 studies have often been selective,
 focusing on the esoteric and non-typical,
 and ignoring the contact situation in
 which Australian English has developed.
 This book and its companion, Australia's
 Many Voices. Ethnic Englishes,
 Indigenous and Migrant Languages.
 Policy and Education, develop and apply
 a comprehensive and integrative
 approach that anchors English in the
 entire 'habitat' of Australia's languages
 that it both upset and transformed.
 Based on a wide range of data and on
 the assumption that all manifestations of
 Australian English must cohere as a
 system, this book retraces the social,
 psycholinguistic and linguistic history of
 the language. It locates the contact with
 indigenous and migrant languages and

with American English in the appropriate sociohistorical context and shows how several layers of migration have shaped it. As it stratified, it was gradually accepted and developed into a fully-fledged national variety or epicentre of English that could be raised to the status of national language. Implications on educational policy and attempts to reach out into the Asia-Pacific region have followed logically from national status. The study is of interest for specialists of English and Australian Studies as well as a range of other disciplines. Its discursive, non-technical style and presentation makes it accessible to non-specialists with no background in linguistics.

The Individuals with Disabilities
 Education Act (IDEA) of 2004 has placed
 a renewed emphasis on the importance
 of the regular classroom, the regular
 classroom teacher and the general
 curriculum as the primary focus of
 special education. This book contains
 over 100 topics that deal with real issues
 and concerns regarding the regular
 classroom and the special education
 process. These concerns range from
 requirements for referring a child for an
 individual evaluation, school discipline,
 classroom-based assessment, IEP
 meetings, inclusion and mainstreaming,
 and various legal requirements relating

to IDEA, Section 504 of the
 Rehabilitation Act of 1973, and the No
 Child Left Behind act. It stresses the
 importance that every child with a
 disability must have goals "to enable the
 child to be involved in and make
 progress in the general education
 curriculum." Other issues interspersed
 within this text include classroom needs,
 the planning of individualized education
 programs, and participation in all
 aspects of the general curriculum. In
 order to achieve these goals, support for
 the regular classroom teacher must be
 provided so that children with disabilities
 can be involved in, and make progress
 in, the curriculum and participate in
 nonacademic activities.

English Paper-1 & 2 (Set of 5 Books) (For

Over the last forty years, the functionalist approach to linguistic description and explanation has given rise to several major schools of thought that share two crucial assumptions: (i) form is not independent of meaning/function or language use; and (ii) linguistic description and explanation need to take into account the communicative function of language. This volume offers readers interested in

functional linguistics a selected sample of studies that jointly prove the efficacy of the analytical tools and procedures broadly accepted within the functionalist tradition in order to investigate language and discourse, with special focus on key pragmatic/discourse notions such as contextualization, grammaticalisation, reference, politeness, (in-)directness, discourse markers, speech acts, subjective evaluation and sentiment analysis in texts, among others. In addition, this volume offers specific corpus-based techniques for the objective contextualisation of linguistic data, which is crucial given the central role allotted to context in both functional linguistics and pragmatics/discourse analysis.
